Institutional Variety in East Asia Werner Pascha,Cornelia Storz,Markus Taube,2011 This illuminating book broadly addresses the emerging field of 'diversity of Capitalism' from a comparative institutional approach. It explores the varied patterns for achieving coordination in different economic systems, applying them specifically to China, Japan and South Korea. These countries are of particular interest due to the fact that they are often considered to have developed their own peculiar blend of models of capitalism. The expert contributors take a common institutional approach, focusing on institutions at the macro level. They present case studies to demonstrate the diversity of institutional patterns at the advent of the 21st century, both within the East Asian region and elsewhere. Examples of stability within existing institutions are illustrated alongside examples of comprehensive institutional change. Underpinning the case studies are a set of theoretical and empirical challenges for researchers concerned with national institutional settings, path dependence and endogenous dynamics.

Doctoral Training in Engineering Wilson R. Nyemba, Keith F. Carter, 2024-03-07 The book provides a comprehensive analysis of Engineering Education in industrialising countries, with Southern Africa as the case study, benchmarked on

institutions from the industrialised world, with UK institutions as the reference. This was motivated by the perennial shortage of engineers and engineering skills to drive industry in Southern Africa, compounded by the mismatch of skills between those produced by tertiary institutions and those required by industry. This book focuses on the insufficiencies in training, through addressing the gap where the majority of engineering academics' qualifications at MSc/MEng level fall short of the internationally acceptable PhD/DEng/DTech. In order to address such insufficiencies, the book proposes and advocates for reskilling and doctoral training of engineering academics through the proposed and established DTCs within the region. The book is targeted at graduate students, engineering academics, researchers, university administrators, foreign aid agencies, captains of industry and policy-makers in governments. To all these readers, the book offers:

Global Education Monitoring Report Global Education Monitoring Report Team, UNESCO, 2021-12-10 El papel de los actores no estatales no se limita a la escolarización, sino que se extiende a las intervenciones en varios niveles educativos y esferas de influencia. Junto con su examen de los progresos realizados en la consecución del Objetivo de Desarrollo Sostenible (ODS) 4, incluidos los nuevos datos sobre la repercusión de la pandemia de COVID-19, el Informe de Seguimiento de la Educación en el Mundo 2021/2022 insta a los gobiernos a considerar que todas las instituciones, el alumnado y el personal docente forman parte de un único sistema. Las normas, la información, los incentivos y la rendición de cuentas deben ayudar a los gobiernos a proteger, respetar y cumplir el derecho a la educación de todas las personas, sin apartar la vista de los privilegios o la explotación. La educación financiada con fondos públicos no tiene por qué ser pública, pero hay que abordar la disparidad en los procesos educativos, los resultados del estudiantado y las condiciones de trabajo del personal docente. La eficiencia y la innovación, en lugar de ser secretos comerciales, han de ser difundidas y practicadas por todas las personas. Para ello, es necesario mantener la transparencia y la integridad en el proceso de las políticas públicas de educación para bloquear los intereses privados.
