Yuval Noah Harari

Sapiens [Tenth Anniversary Edition] Yuval Noah Harari, 2025-02-18 New York Times Readers' Pick: Top 100 Books of the 21st Century The tenth anniversary edition of the internationally bestselling phenomenon that cemented Yuval Noah Harari as one of the most prominent historians of our time—featuring a new afterword from the author. One hundred thousand years ago, at least six human species inhabited the earth. Today there is just one. Us. Homo sapiens. How did our species succeed in the battle for dominance? Why did our foraging ancestors come together to create cities and kingdoms? How did we come to believe in gods, nations, and human rights; to trust money, books, and laws; and to be enslaved by bureaucracy, timetables, and consumerism? And what will our world be like in the millennia to come? In *Sapiens*, Professor Yuval Noah Harari spans the whole of human history, from the very first humans to walk the earth to the radical—and sometimes devastating—breakthroughs of the Cognitive, Agricultural, and Scientific Revolutions. Drawing on insights from biology, anthropology, paleontology, and economics, and incorporating full-color illustrations throughout the text, he explores how the currents of history have shaped our human societies, the animals and plants around us, and even our personalities. Can we ever free our behavior from the legacy of our ancestors? And what, if anything, can we do to influence the course of the centuries to come? Bold, wide-ranging, and provocative, *Sapiens* integrates history and science to challenge everything we thought we knew about being human: our thoughts, our actions, our heritage...and our future.

Summary of Sapiens: a Brief History of Humankind - by Yuval Noah Harari *Sapiens* Editorial, 2017-09-13 ABOUT THE ORIGINAL BOOK: *Sapiens* presents a pleasant and simple narrative about the extraordinary story of the evolution of mankind. In this work, it shows a detailed vision that everything we learn in school about history doesn't teach us anything about how our species spread throughout the world. How big cities and empires occurred, what made us believe in Gods,

why did money arise? From that curious and interesting past, we are also presented with a projection into the future, towards the millenniums to come. It is a well narrated chronicle of life. From the first humans that inhabited the earth, all the way to the considerable progress like the great cognitive, agricultural and scientific revolutions. This work has drawn interest from universities and the public. Making the young writer an international celebrity.--CONTENT: The Origin Humans And Their History A Singular Being The Expansion Inheritance From Gathering To Harvesting The Future Writing Culture Universal Order How Much Is It? The Imperial Vision The Scientific Revolution A Costly Union, Science And Technology Conquering Mentality A Bear Hug The Industrial Engine When Do I Fit In This History? Where Are We Heading?

From Animals Into Gods Yuval Noah Harari, 2012-07-16 About 100,000 years ago, Homo sapiens was still an insignificant animal minding its own business in a corner of Africa. Our ancestors shared the planet with at least five other human species, and their role in the ecosystem was no greater than that of gorillas, fireflies, or jellyfish. Then, about 70,000 years ago, a mysterious change took place in the mind of Homo sapiens, transforming it into the master of the entire planet and the terror of the ecosystem. Today it stands on the verge of becoming a god, acquiring divine abilities of creation and destruction. * How did Homo sapiens conquer Earth? * What befell the other human species? * When did money, states and religion appear, and why? * How did science and capitalism become the dominant creeds of the modern era? * Does history have a direction? * Is there justice in history? * Did people become happier as history unfolded? * And what are the chances that Homo sapiens will still be around in a hundred years?

THE HISTORY OF HUMANKIND: Written by Yuval Noah Harari, Sapiens: A Brief History of Humankind explores the cultural evolution of Homo sapiens throughout the ages. It begins with early man, several species under the Homo genus, and continues chronologically through the ages. Harari's explanations of human biology, psychology, and history is connected to the basis that humankind has not evolved in a very long time, and they are essentially the same hunter gatherers they always have been on a psychological level, only now they're living in an industrial world.

THE FOUR MAJOR ERAS: PART ONE: The Cognitive Revolution... where mankind has evolved to have imagination, the basis for creating the fictions and myths that would dominate the creation of societies and bonds between strangers that allow for mass cooperation between human beings. PART TWO: The Agriculture Revolution... how humankind navigated the slow process of domesticating plants and animals, eventually leading to mankind's settlement lifestyle that allowed for the existence of ruling classes. PART THREE: The Unification of Humankind... which covers the creation and acceptance of money, politics, economics, religion, and the many constructs that truly allows for large civilizations. Within this section is a heavy focus on empires and how they have shaped history ever since imperial ambitions began. PART FOUR: The Scientific Revolution... based around the idea that during the last 500 years the explosion of knowledge and technology as a result of humankind acknowledging their ignorance and lack of answers for everything. Leading up to modern day humans, this section focuses heavily not only on scientific advancements, but how politics, religion, and capitalism shape scientific discoveries for better or worse.

Summary of Sapiens: A Brief History of Humankind by Yuval Noah Harari Peter Cuomo, Complete summary of Yuval Noah Harari's book Sapiens A genetic mutation 70,000 years ago gave humans (Homo sapiens) the ability to imagine and believe things that aren't true, which, Harari argues, had a profound impact on humanity's ability to cooperate in large groups. The Cognitive Revolution is one of the key turning points in human history that Harari examines in great detail. There are also references to the Agricultural Revolution (10,000 years ago) and the Industrial Revolution (300 years ago), both of which saw humanity migrate from foraging in the wild to farming in more permanent communities.
