Addiction Treatment Daniel Hood,2017-09-08 Addiction Treatment is an ethnography that compares two types of residential drug-free treatment programs-religious, faith-based programs and science-based, secular programs. Although these programs have originated from significantly different ideological bases, in examining the day-to-day operations of each, Daniel E. Hood concludes that they are far more alike than they are different. Drug-free treatment today, whether in secular or religious form, is little more than a remnant of the temperance movement. It is a warning to stop using drugs. At its best, treatment provides practical advice and support for complete abstinence. At its worst, it demeans users for a form of behavior that is not well understood and threatens death if they do not stop. Hood argues that there is no universal agreement on what addiction is and that drug abuse is little more than a catch-all term of no specific meaning used to condemn behavior that is socially unacceptable. Through extensive participatory observations, intimate life history interviews, and informal conversations with residents and staff, Hood shows how both programs use the same basic techniques of ideological persuasion (mutual witnessing), methods of social control (discourse deprivation), and the same proposed zero tolerance, abstinent lifestyle (Christian living vs. Right living) as they endeavor to transform clients from addicts to citizens or from sinners to disciples.

*Overcoming Prescription Drug Addiction* Rod Colvin,2008-06-01 DIVDIV Prescription drug addiction is now one of the nation's most serious drug problems. More Americans are abusing controlled prescription drugs more than cocaine, hallucinogens, inhalants, and heroin combined. With the exception of marijuana, prescription painkillers are the most widely abused drug in the U.S. Many who are addicted to prescription drugs are &“unwitting addicts&”—they have no history of drug abuse, but become addicted after taking a drug for legitimate reasons. Rod Colvin understands this problem. His 35-year old brother died as a result of his long-term addiction to painkillers and tranquilizers. Drawing from his personal experience and his background as a counselor, Colvin offers help to those suffering from addiction as well as their families. In this new, third edition, Colvin discusses dynamics of addiction and the newest treatment options; he also offers compelling

personal stories from addicts who describe their journeys into recovery. These anecdotes are accompanied by advice from addiction medicine specialists. The Book Answers These Questions: &· How does addiction &“rewire&” the brain? &· What are the symptoms of addiction? &· Who's at risk for addiction? &· Why are more teens abusing prescription drugs? &· When does proper medical use of a drug turn into addiction? &· What happens if the drugs are stopped abruptly? &· What are the symptoms of withdrawal? &· What is the difference between addiction and physical dependence? &· What are the top 20 most-abused prescription drugs? STRONGHow Can You Leave Prescription Drugs Behind? Read stories of recovery from individuals who are in recovery &· Learn how they become addicted &· Find out how they made it into recovery &· What were the turning points in their lives that made them seek recovery?

*Recover All* Robert G. Reid,2007-10-01 *Recover All* is a needed and telling guide enabling family members, companions, and friends of a chemically dependent person to comprehend the process of addiction. Written from a unique, dynamic perspective, the book equips loved ones of a chemically dependent person with practical tools to find help for the one close to them. Having been diagnosed a chemically dependent polysubstance abuser at age twelve, author Rob Reid entered treatment more than nine times. After his ultimate recovery from the addictive hopelessness he once knew, Reid worked in a long-term residential drug and alcohol recovery program for men. While working hands-on with addicts and their families, Reid noticed a dire need to bridge the chasm of understanding between chemically dependent persons and their loved ones. The work opens by addressing what addiction is, how it develops, and the dynamics of the addictive personality. Most, however, this book shares real-life experiences from both the personal and treatment-administration perspectives. Such rare, two-perspective insight communicates the experience, strength, and hope that any person with a chemically dependent loved one longs for. *Recover All* not only shares information about addiction, but it also addresses fundamental issues and questions facing loved ones of those struggling with addiction. These issues include identifying the signs of addiction, dealing with denial both in the addict and among the addict's family and friends, overcoming rationalization, identifying and

preventing manipulation, dealing with selfishness, and saying no effectively. Recover All provides a sensible, realistic overview of chemical dependency treatment options as well as a simple method for determining the usefulness of each treatment option in specific circumstances. Reid concludes by outlining the phenomenon of relapse and by providing the ten most detrimental behaviors a family member or friend could exhibit in a loved one's recovery process.
