The Handbook of Attitudes Dolores Albarracín, Blair T. Johnson, Mark P. Zanna, 2014-04-04 This new handbook presents, synthesizes, and integrates the existing knowledge of methods, theories, and data in attitudes. The editors' goal is to promote an understanding of the broader principles underlying attitudes across several disciplines. Divided into three parts: one on definitions and methods; another on the relations of attitudes with beliefs, behavior, and affect; and a final one that integrates these relations into the broader areas of cognitive processes, communication and persuasion, social influence, and applications, the handbook also features an innovative chapter on implicit versus explicit attitudes. With contributions from the top specialists, this handbook features unique collaborations between researchers, some who have never before worked together. Every writer was encouraged to work from as unbiased a perspective as possible. A must have for researchers in the areas of social, political, health, clinical, counseling, and consumer psychology, marketing, and communication, the

handbook will also serve as an excellent reference for advanced courses on attitudes in a variety of departments.

The Concept of Jacksonian Democracy Lee Benson, 2015-03-08 Jacksonian Democracy has become almost a commonplace in American history. But in this penetrating analysis of one state-its voting cycles, party makeup, and social, ethnic, and religious patterns-Lee Benson shows that the concept bears little or no relation to New York history during the Jacksonian period. New York voters between 1816 and 1844 did not follow the traditional distinctions between Whigs and Democrats. Ethnic and religious ties were stronger social forces than income, occupation, and environment. Mr. Benson's examination suggests a new theory of American voting behavior and a reconsideration of other local studies during this period. Originally published in 1961. Liberating the Mind Linda Elder, 2019-12-13 Throughout history, thinkers within every part of society have been crippled by an ingrained bias toward their own views and the views of their preferred social groups. As these dangerous egocentric and sociocentric tendencies continue to pose the greatest threat to the advancement of rational societies, *Liberating the Mind* reveals a way forward. Dissecting the core of how humans naturally learn, think, and choose to act, internationally recognized critical thinking leader Linda Elder illuminates root causes of dysfunctional thought and shows us how to free ourselves from both selfishness and groupthink through explicit tools of rationality. This instant intellectual classic offers a

cohesive, integrated theory of mind that takes into account pathological tendencies shared by all humans, while offering a clear path toward the cultivation of fairminded critical thinking throughout the world. Elder illuminates how, by taking the intrinsic problems in our thinking seriously, we can follow the example of Socrates and live the examined life, even in times of upheaval and doubt.

The Social Influence Processes James T. Tedeschi, 2017-07-12 Social psychologists have always been concerned with two-person interactions and the factors enabling one person to gain dominance. Although social psychology has devised a revolutionary set of techniques to investigate the phenomenon of power, hypotheses are too often ambiguously stated, research programs end in cul-de-sacs, and experiments take on the character of one-shot studies. In an attempt to stimulate new directions in research and to provide cumulative emphasis on the development of scientific theory in the area of power relations, Tedeschi has assembled original and path breaking essays from a dozen outstanding scholars and researchers in the behavioral sciences. More tightly integrated than leading books in the field of power relations, *The Social Influence Processes* focuses on two-person interactions. A full explanation of the terms power and influence is followed by an analysis of the major variables in connections between two persons that must be taken into account in a scientific theory of social influence. The subsequent chapters respond to the categories established, attempting a comprehensive construction of social reality and offering suggestions and techniques for measuring and ordering its complexity. Particular areas of research and theory are isolated for consideration in depth--such topics as personality as a power construct (Power and Personality by Henry L. Minton), influence in exchange theory (The Tactical Use of Social Power by Andrew Michener and Robert W. Suchner), and leadership through charisma (Interpersonal Attraction and Social Influence by Elaine Walster and Darcy Abrahams). In the final chapter, Tedeschi, Thomas Bonoma, and Barry R. Schlenker attempt to provide a general theory of social influence processes as they affect the target individual by reviewing the research literature in their own theoretical terms. This remarkable volume will be of interest to students as well
