A Textbook Of Business Communication Mr. Jeetendra Barulkar,2024-02-02 During the last several years, there has been a significant shift in the way business communication is conducted; however, the fundamental ideas have not changed. The concepts of communication that have been around for centuries are combined with those that are more contemporary in this book, which results in a smooth balance between the theoretical and practical sides of the subject matter. Effective management depends significantly on effective communication. To achieve success in a professional corporate setting, it is very necessary to have an in-depth comprehension of the fundamental communication technologies. The purpose of this book is to provide students with in-depth content that will help them improve their grasp of corporate communication. In addition to assisting in the development of interpersonal relationships, they also assist in maintaining good business relationships, which are essential for both individual and workplace development. This book describes the principles of business communication and defines, outlines, and elucidates the key concepts. The book also discusses the new abilities that workers are required to have in today's demanding business climate. These skills are becoming more important.

Agricultural Extension Communication And Role Of ICT Ashish Kumar Nagar,2023-10-16 "Agricultural Extension Communication and the Role of ICT" is a revolutionary work that examines the vital relationship between conventional agricultural extension and current ICT. It examines how ICT may transform agriculture and make information and technology more accessible to farmers globally. Leading agricultural and communication specialists and academics wrote the book, presenting insights and real-world case examples. Human knowledge and technology innovation are used in the book to

tackle agricultural extension holistically. It emphasizes the need to understand local settings and work with rural populations to ensure that technology supports traditional knowledge. Practical case studies demonstrate the effective use of mobile apps, social media, remote sensing, and big data analytics in different agricultural situations.

Fundamentals of Library and Information Science Prakash Gouda S U, 2024-02-28 Fundamentals of Library and Information Science is a fundamental work that investigates the ideas, beliefs, and practices that are associated with the

subject of library and information science. It explores the history of libraries and how they have developed throughout time, from the first library that included scrolls to the most recent digital collections. The book sheds light on the function of libraries as portals to information, culture, and knowledge, highlighting the value of libraries in fostering literacy, education, and intellectual liberation. The purpose of this book is to provide the groundwork for your journey into the fascinating and fulfilling field of library and information science by providing you with a suitable starting point. Both present and future information workers need to maintain a high level of knowledge and adaptability to keep up with the fast evolution of the field of library and information science (LIS), which is being driven by developments in technology and shifts in how people use information. Whether you are a student who is thinking about pursuing a career in library and information science (LIS), a practicing librarian who is looking to expand your knowledge, or simply someone who is interested in understanding how information is managed and accessed in today's society, the purpose of this book is to provide you with a solid foundation in the practice and principles of library and information science.

Informing Science Volume One: Concepts and Systems T. Grandon Gill,2016 The two volume Informing Science series is the first attempt to survey and synthesize research in the informing science transdiscipline. Part textbook, part collection of readings, the two volumes present both important research findings relating to the field and highlight fertile directions for future research. Volume One: Concepts and Systems focuses on the key building blocks of informing science. It begins with an overview of the transdiscipline, tracing its evolution from Cohen's original proposal to its present state. Next, it considers a series of concepts that frequently elude attempts at rigorous definition. Among these: theory, research, information, knowledge and complexity. With working definitions established, it goes on to explore basic systems theory, introducing the concept of an informing system. The key elements of such systems—the channel, the sender/informer, and the receiver/client—are then examined individually. The volume concludes with two overview chapters. The first of these looks at the analysis of a basic informing system, in which a single informer interacts directly with a clearly specified client or set of clients. The last chapter extends these ideas to the more complex topologies (e.g., multiple channels, multiple informers, multiple clients, layers of informing) that are more typical in real world informing contexts.

Reengineering Clinical Workflow in the Digital and AI Era Kai Zheng,Johanna Westbrook,Vimla L. Patel,2025-03-31 This timely new edition addresses gaps in the understanding of how health information technology (IT) impacts clinical workflows and how this impact is central to the safe and effective delivery of care to patients. The research in this area has advanced substantially in the past few years since the publication of the first edition, marked by milestone events such as the widespread and matured use of health IT, particularly electronic health records, and a new wave of innovations stimulated by the clinical application of AI-enabled systems such as ambient documentation technologies. This book has been expanded to reflect these new developments in the field and features clearly structured chapters covering a wide range of topics, including aspects of clinical workflows relevant to both practitioners and patients, tools for recording clinical workflow data,

and techniques for potentially redesigning health IT-enabled care coordination. Reengineering Clinical Workflow in the Digital and AI Era: Toward Safer and More Efficient Care enables readers to develop a deeper understanding of clinical workflows and how they can potentially be modified to facilitate greater efficiency and safety in care provision, offering a valuable resource for both biomedical and health informatics professionals and trainees.

Strategic Communications' Role in Counter-Terrorism Munir Zamir, Christian Kaunert, 2025-04-30 This book examines the use of communications efforts in preventing and challenging extremist narratives online. These efforts are part of the expansive and well-resourced sector of preventing and countering violent extremism (P/CVE). They leverage technology tools (algorithms, direct messaging, and audience targeting) to communicate counter-extremist messaging across various digital platforms. The research and discussion focus on the role of strategic communications in deradicalizing and changing the behavioral features of 'vulnerable' and 'at-risk' audiences susceptible to extremist messaging. This approach views radicalization pathways toward violence as a key issue to tackle within online P/CVE communication efforts. This book investigates this problem and seeks to understand and assess the role, efficacy, and implications of such efforts within the broader counter-terrorism (CT) landscape, using UK counter-terrorism efforts (via the Prevent Strategy) as its primary contextual source. This analysis applies the theory of socialization, referred to in this study as 'socialization and reasoned action strategic communication' (SoRaSCo). The authors identify strategic communications deficiencies and offer insights for developing a roadmap for strategic communications in P/CVE in the UK and globally. Drawing on extensive research, the book provides crucial insights for policymakers, researchers, and the public interested in new trends in P/CVE, counter-terrorism, strategic communications, and policing interventions.
