**S. M. Yasir Arafat, Mohsen Rezaeian, Murad M. Khan**

*Daily Duas* Sheikh-Tahir Ali, 2017-03-25 Allah Almighty says in the Qur'an: When my servants ask you concerning me, (tell them) I am indeed close (to them). I listen to the prayer of every suppliant when he calls on me. [2:186] The place of dua is so high to Allah, that the Prophet had said: Nothing is more honourable to Allah the Most High than du'a. [Sahih al-Jami' no. 5268]. He also said: The most excellent worship is du'a. [Sahih Al-Jami' no. 1133];

*Therapeutic Exercise for Children with Developmental Disabilities* Barbara H. Connolly, Patricia Montgomery, 2024-06-01  
Therapeutic Exercise for Children With Developmental Disabilities has been expanded and updated to include everything a student or professional needs to know when working with children with developmental disabilities. Continuing the emphasis on evidence-based practice from the previous editions, this comprehensive Fourth Edition enhances critical thinking and evaluation skills. Throughout the course of the text, Drs. Barbara H. Connolly and Patricia C. Montgomery present case studies of 5 children with various developmental disabilities to bring a problem-solving approach to each individual chapter topic. The case studies include 2 two children with cerebral palsy (GMFCS Levels I and V), a child with myelomeningocele, a child with Down syndrome, and a child with developmental coordination disorder and attention-deficit hyperactivity disorder. Each chapter's examination, evaluation, and intervention recommendations are accompanied by specific treatment objectives and therapeutic activities, plus a companion website with 17 videos, which contains 90 minutes of content to illustrate concepts. Recent research and clinical recommendations, as well as related references, are also provided in each chapter. This Fourth Edition utilizes the American Physical Therapy Association's Guide to Physical Therapist Practice 3.0 and the World Health Organization's International Classification of Functioning, Disability, and Health--Children and Youth as its framework. The focus of the chapters is on children's participation and empowerment, rather than body function and structure. Examples of new and updated topics in the Fourth Edition: • Practice in the NICU • Early mobility strategies • Communication strategies with children and families • Aquatic therapy • Upper extremity constraint-induced therapy • Mirror therapy • Lower extremity treadmill training With helpful videos, informative figures, and compelling case studies, *Therapeutic Exercise for Children With Developmental Disabilities, Fourth Edition* is the perfect resource for both students and practicing clinicians.

**The Skeletal Muscle: Plasticity, Degeneration and Epigenetics** Li Li Ji,2025-09-30 Skeletal muscle is not an organ

merely for locomotion with simple anatomical and metabolic features as has been viewed for a long time. The understanding that physical activity plays a vital role in health promotion and disease prevention under the slogan of “exercise is medicine” has dramatically increased the enthusiasm and demand for knowledge about the skeletal muscle. This book, *The Skeletal Muscle: Plasticity, Degeneration and Epigenetics*, is a follow up of another book authored by the Editor, which provides the morphological, physiological, biochemical and molecular biological foundations for organ’s response and adaptation to functional demand, and for the mechanisms and prevention for the organ’s pathogenesis and degeneration. Research in the past several decades has demonstrated that skeletal muscle has a tremendous ability to undergo internal changes in response to functional, environmental, nutritional and genetic challenges, through various neural, endocrine and autocrine pathways for signal transduction. Although the contractile proteins show a relatively slow turnover, many organelles and constituents in the myocyte exhibit considerable remodeling throughout the muscle’s life cycle. In this regard, mitochondrion plays a central role in the crosstalk of signaling not only in its own turnover and quality control, but also in exerting important influences on other vital cellular functions. On the opposite side, skeletal muscle is highly vulnerable to disuse and misuse that can cause injury, inflammation, degeneration and atrophy. The various chapters in this book, contributed by the experts in the field, will introduce and review the most concurrent knowledge to address important issues related to muscle plasticity, pathogenesis, disease and aging. Potential strategies to prevent and ameliorate the above problems in a whole-body perspective will be highlighted to provide the readers with the inspiration to learn and work with this important and intriguing organ.

**Lord of Point Grey** P.B. Waite, 2011-11-01 Few university presidents could be considered 'to the manner born.' Larry MacKenzie was the exception. He discovered this talent when president of the University of New Brunswick from 1940 to 1944. He became president of the University of British Columbia in 1944 and served for eighteen years. Although UBC's present eminence owes much to many people, as biographer P.B. Waite points out, 'it is basically Larry MacKenzie's creation.' His importance to UBC is inestimable. No doubt demography alone enjoined UBC's considerable expansion, but

Larry gave it force and focus. He established the Faculty of Graduate Studies and introduced professional faculties such as law and medicine. He was a marvellous doer; but more important, he could recognize talent in others, like his 'chief expediter,' Gordon Shrum, UBC's redoubtable head of physics and dean of graduate studies. Larry's big archive at UBC has enabled Waite to essay the life of a marvellously adept and humane president who loved his work and his students, a vital and great-hearted Canadian who had lived and worked, as one could say, a mari usque ad mare.

**Role of Herbal Medicines** Amal Kumar Dhara, Subhash C. Mandal, 2024-02-26 Emergence of lifestyle diseases, e.g., type II diabetes, cancers, obesity, cardiovascular disorders, liver cirrhosis, etc., are exponentially increasing day by day. Modern drifts toward the utilization of herbal medicines in different healthcare aspects necessitate (demand) the replacement of synthetic molecules with phytoconstituents because of their biocompatibility, biodegradability, economic extraction process, and ready availability from the natural source. This book provides a thorough insight into the comprehensive and up-to-date trends of phytomedicines in the management of lifestyle diseases and its mechanisms, modern methods of extraction and purification of phytoconstituents, and chemical characterization as well as standardization of phytoconstituents using modern equipments.

*Medicinal Plants - Recent Advances in Research and Development* Hsin-Sheng Tsay, Lie-Fen Shyur, Dinesh Chandra Agrawal, Yang-Chang Wu, Sheng-Yang Wang, 2016-10-25 Since ancient times, plants have been used as a prime natural source of alternative medicines and have played an important role in our lives. The old tradition of medicinal plant application has turned into a highly profitable business in the global market, resulting in the release of a large number of herbal products. People have tried to find different sources of medicines to alleviate pain and cure different illnesses. Due to severe constraints of synthetic drugs and the increasing contraindications of their usage, there is a growing interest world over in the usage of natural products based on medicinal herbs, hence, there is an ever expanding market of herbs and herbal based medicinal preparations all over the world. This has culminated into an exponential increase in number of research groups in different geographical locations and generation of volume of research data in the field in a short span of time. The path breaking advancement in research methods and interdisciplinary approaches is giving birth to newer perspectives. Therefore, it becomes imperative to keep pace with the advancement in research and development in the field of medicinal herbs. There are a large number of researchers in different parts of the world working on various aspects of medicinal plants and 'herbal medicines'. The idea is to bring their recent research work into light in the form of a book. The proposed book contains chapters by the eminent researchers in different countries and working with different disciplines of medicinal plants. Articles pertain to different disciplines such as: 1. Resources and conservation of medicinal plants 2. Biosynthesis and metabolic engineering of medicinal plants 3. Tissue culture, propagation and bioreactor technology of medicinal plants 4. Phytochemical research on medicinal plants 5. Herbal medicines and plant-derived agents in cancer prevention and therapy

6. Herbal medicines and plant-derived agents in metabolic syndrome management 7. Herbal medicines and plant-derived agents in modulation of immune-related disorders 8. Herbal medicines and hepatotoxicity The book will prove itself an asset for the researchers, professionals and also students in the area of medicinal plants and mechanism of their action.

*From a Shattered Sun* Susan McKinnon, 1991 Among a growing number of ethnographies of eastern Indonesia that deal with cosmology, exchange, and kinship, *From a Shattered Sun* is the first to address squarely issues originally broached by Edmund Leach and Claude Lévi-Strauss concerning the relation between hierarchy and equality in asymmetric systems of marriage. On the basis of extensive fieldwork in the Tamimbar islands, Susan McKinnon analyzes the simultaneous presence of both closed, asymmetric cycles and open, asymmetric pathways of alliance--of both egalitarian and hierarchical configurations. In addition, Tamimbarese society is marked by the existence of multiple, differentially valued forms of marriage, affiliation, and residence. Rather than seeing these various forms as analytically separable types, McKinnon demonstrates that it is only by viewing them as integrally related--in terms of culturally specific understandings of houses, gender, and exchange--that one can perceive the processes through which hierarchy and equality are created.

**#WorkSchoolHours** Dr Ellen Joan Ford, 2024-03-04 Every working parent knows how hard the juggle is. Now we know the cause. It's time to get work to work better for people. Right now, we are expected to work as though we don't have kids and parent as though we don't have jobs. It is not sustainable. It's causing people to leave the workforce, or to sacrifice valuable family time - and simultaneously hurting organisations as retention and productivity take a nosedive.

**#WorkSchoolHours** offers us all a better framework - one that takes us far beyond how we structure our work schedules to deliver us better commercial outcomes for businesses, better careers for all working people, and better lives for everyone. Building on decades of research and lived experiences, **#WorkSchoolHours** gives us practical insights and immediately actionable solutions. Let's reduce hours spent working, so we can connect more with what matters in life - and do it in a way that is commercially smart for organisations. Praise for **#WorkSchoolHours** "A change-the-freaking-world book." - Mark Crysell, TVNZ SUNDAY correspondent "An absolute must-read that will linger in your thoughts long after you've turned the final page." - Steve Jurkovich - Chief Executive, KiwiBank "Even the skeptic in me is totally convinced." - Eric Chapman - Director of Business Transformation, EY "Ellen's precise wisdom is a game-changer" - Dr Ron McDowall, ONZM - Director of Rutherford Business Institute "A research-backed, implementable solution where everybody wins." - Stephania Varalli - Story Strategist, serial entrepreneur, and former CEO and owner of Women of Influence, Canada

*Suicidal Behavior in Muslim Majority Countries* S. M. Yasir Arafat, Mohsen Rezaeian, Murad M. Khan, 2024-06-07 The book is about suicidal behavior in Muslim majority countries. Islam is the second-largest religion in the world. There are also sizable Muslim populations in non-Islamic countries. Suicide is strongly prohibited in Islam and based on this tenet, suicide and self-harm remain criminalized acts in many Islamic countries. When compared to the global estimates for suicide rates and to non-Islamic countries, Muslim majority countries have lower rates, indicating that Islamic faith and practice may be protective against suicidal behaviors. However, several factors such as criminal status, stigma toward suicide, extreme dearth of research, low-quality data, and under-reporting make it difficult to draw any firm conclusions. Hence, this book aims to do a deeper study of suicidal behaviors in Muslim majority countries, covering epidemiology, risk factors, and the challenges of suicide prevention in Muslim majority countries.
