The Capital Order Clara E. Mattei, 2022-11-17 A Financial Times Best Book of the Year A must-read, with key lessons for the future.—Thomas Piketty A groundbreaking examination of austerity's dark intellectual origins. For more than a century, governments facing financial crisis have resorted to the economic policies of austerity—cuts to wages, fiscal spending, and public benefits—as a path to solvency. While these policies have been successful in appeasing creditors, they've had devastating effects on social and economic welfare in countries all over the world. Today, as austerity remains a favored policy among troubled states, an important question remains: What if solvency was never really the goal? In *The Capital Order*, political economist Clara E. Mattei explores the intellectual origins of austerity to uncover its originating motives: the protection of capital—and indeed capitalism—in times of social upheaval from below. Mattei traces modern austerity to its origins in interwar Britain and Italy, revealing how the threat of working-class power in the years after World War I animated a set of top-down economic policies that elevated owners, smothered workers, and imposed a rigid economic hierarchy across their societies. Where these policies “succeeded,” relatively speaking, was in their enrichment of certain parties, including employers and foreign trade interests, who accumulated power and capital at the expense of labor. Here, Mattei argues, is where the true value of austerity can be observed: its insulation of entrenched privilege and its elimination of all alternatives to capitalism. Drawing on newly uncovered archival material from Britain and Italy, much of it translated for the first time, *The Capital Order* offers a damning and essential new account of the rise of austerity—and of modern economics—at the levers of contemporary political power.

The Economics of Small Businesses Giorgio Calcagnini, Ilario Favaretto, 2011-01-07 Is small still beautiful? The recent economic and financial crisis has shown that developed countries in which firms are smaller suffered the biggest GDP plunges. Today, economic growth depends more than in the past on sound and well-organized firms, which means more innovation, a better educated labor force, higher likelihood of access to financial resources and efficient investments. This does not mean the end of small-sized firms, but that they need to be different from the way they were in the past. This book provides an international perspective on analyses and policy recommendations for how small businesses can reinforce their role in modern economies.

Proceedings of the 11th Toulon-Verona International Conference on Quality in Services Rocco Moliterni, Jacques Martin, 2008 The Toulon-Verona Conference was founded in 1998 by prof. Claudio Baccarani of the University of Verona, Italy, and prof. Michel Weill of the University of Toulon, France. It has been organized each year in a different place in Europe in cooperation with a host university (Toulon 1998, Verona 1999, Derby 2000, Mons 2001, Lisbon 2002, Oviedo 2003, Toulon 2004, Palermo 2005, Paisley 2006, Thessaloniki 2007, Florence, 2008). Originally focusing on higher education institutions, the research themes have over the years been extended to the health sector, local government, tourism, logistics, banking services. Around a hundred delegates from about twenty different countries participate each year and nearly one thousand research papers have been published over the last ten years, making of the conference one of the major events in the field of quality in services.

International Bibliography of Economics 1998 Compiled by the British Library of Political and Economic Science, 1999-12-16 Renowned for its international coverage and rigorous selection procedures, this series provides the most comprehensive and scholarly bibliographic service available in the social sciences. Arranged by topic and indexed by author, subject and place-name, each bibliography lists and annotates the most important works published in its field during the year of 1997, including hard-to-locate journal articles. Each volume also includes a complete list of the periodicals consulted.

Agriculture and Intellectual Property Rights V. Santaniello, 2000 Plant breeding patents, the ownership to biological innovation and associated intellectual property rights (IPR), are the subject of increased attention worldwide. They are particularly relevant in the field of agricultural biotechnology. They are affecting public and private sector organisations and

companies, and are significant for developing as well as developed countries. These issues have until recently evoked little policy analysis. This book presents the perspectives of policy-makers and economists on such issues and includes discussions of public research and property rights, implications for developing countries, IPR of wild genetic resources and IPR under the Convention of Biological Diversity, among others.

Interfirm Networks Anna Grandori,1999-08-12 This volume examines the nature of interfirm networks and their role in promoting industrial competitiveness. Where previous work in this area has tended to be descriptive, the distinguished contributors to this volume present a balanced theoretical and empirical approach to interfirm networking drawing on a variety of international case studies.
