**Museums in China** Tracey Lie Dan Lu, 2013-11-20 From the earliest museums established by Western missionaries in order to implement religious and political power, to the role they have played in the formation of the modern Chinese state, the origin and development of museums in mainland China differ significantly from those in the West. The occurrence of museums in mainland China in the late nineteenth century was primarily a result of internal and external conflicts, Westernization and colonialism, and as such they were never established solely for enjoyment and leisure. Using a historical and anthropological framework, this book provides a holistic and critical review on the establishment and development of museums in mainland China from 1840 to the present day, and shows how museums in China have been used by a wide range of social, political, and state actors for a number of economic, religious, political and ideological purposes. Indeed, Tracey L-D Lu examines the key role played by museums in reinforcing social segmentation, influencing the economy, protecting cultural heritage and the construction and enhancement of ethnic identities and nationalism, and how they have throughout their history helped the powerful to govern the less powerful or the powerless. More broadly, this book provides important comparative insights on museology and heritage management, and questions who the key stakeholders are, how museums reflect broader social and cultural changes, and the relationship between museum and heritage management. Drawing on extensive archival research and anthropological fieldwork, as well as the author's experience working as a museum curator in mainland China in the late 1980s, *Museums in China* such will be of great interest to students and scholars working across museology, heritage studies, tourism studies Chinese culture and Chinese history.

*Beijing Urban Memory* Fang Wang, 2016-05-04 From the cross-disciplinary perspective of urban management and planning, geography and architecture, this book explores the theory and methods of urban memory, selecting Beijing's historic buildings, historic areas, central areas and city walls as research cases. It is divided into three parts: factors analysis, modeling and practical application. It lays a scientific foundation and provides practical methods for the management of historical spaces, residents' and commercial activities, optimizing the layout and structure of the historic spaces, updating the protection of old buildings, promoting the organic growth of historic sites and the sustainable development of urbanization with new concepts.

Visiting the Art Museum Eleonora Redaelli, 2023-04-23 *Visiting the Art Museum: A Journey Toward Participation* is a book

about the visitor experience. It is written as a companion for visitors to and inside the art museum. The volume engages readers in transforming a common experience, the museum visit, into a sophisticated epistemological inquiry. The study of the visitor experience through an epistemological approach consists of the untangling of the academic disciplines that study and inform each step of this experience: urban studies, architecture, design, art history, art education, and nonprofit management. This journey follows a transformative bottom-up trajectory from experiential to epistemological, and, finally, reveals itself as empowering. The book unfolds as an edited volume, with chapters by different authors who are enthusiastic scholars in each discipline and addresses undergraduate students as citizens, master's students as professionals, and scholars as teachers and researchers. Each reader will discover a kaleidoscopic world made of ideas, values, and possibilities for participation.

**The Rise and Fall of the Ming Dynasty** Daniel R. Faust, 2016-07-15 Coming to power between Mongol and Manchu rule, the Ming Dynasty represented the last ethnic Han dynasty to rule China. Following the Mandate of Heaven, the first Ming emperor launched nearly 300 years of cultural and political transformation. This compelling volume traces the ascendancy, demise, and legacy of the Ming Dynasty, chronicling the development of its governmental structure, its expansion of trade and its economy, its extension and enhancement of the Great Wall of China, and many other achievements. Readers will also learn about the effect of the Little Ice Age and its role in the Ming's demise.

**The Best Art You've Never Seen** Julian Spalding, 2010-10-04 Across the globe there are scores of beautiful and unusual works of art that are largely unseen or fail to receive the critical acclaim they deserve. Why? The Best Art You've Never Seen restores to view 100 wonderful treasures of world art. Ranging from Peru to Papua New Guinea, it uncovers neglected wonders in offbeat corners of the world or locked away in the store rooms of the world's great museums. Some are hidden accidentally: by a rock-fall, a shift in a trade route, or through the drift of history. Others are hidden deliberately, buried as loot or destroyed by hate - like the fabulous Mount Kailash Temple in India. Many are hidden by changes of taste, marginalized because they don't fit into established ideas of art - works by artists such as Norman Rockwell, Nek Chand, and Niki de St Phalle. Other great works, like the the dazzling Très Riches Heures manuscript and the Mona Lisa, are being virtually hidden by the demands of conservation. And there are plenty of treasures still waiting to be revealed - the Q'in Emperor's tomb or Leonardo's lost fresco The Battle of Anghiari. Author and former museum director Julian Spalding takes you into a world of beautiful and arresting artifacts and reveals their amazing stories. He sets forth a surprising and unfamiliar alternative canon of works that offers a fresh and controversial take on the world of art.

The Life and Journeys of a Dabizi Albert Riley, 2020-01-24 A very personal look at the development of China from 1973 to 2013 - from Mao to Hu. The author was in the Advance Party that reestablished U.S. relations with China in May 1973 during the time of Mao and Zhou Enlai. His intimate connection to China over the next 40 years provides a unique perspective as he examines the history and culture of China, and especially the development of China since 1973. His journeys took him to China eighteen times covering every administrative area except Macao. This book covers China as they went from drab to ultra modern, from steam engines to super high speed trains, from famine to food exports. We look at religion, education, health care, and more. Finally, we take a close look at the most important historical landmarks in China. This is an autobiography, a history book, a travel book - a perfect read for anyone with an interest in China.

*On the Digital Semiosphere* John Hartley, Indrek Ibrus, Maarja Ojamaa, 2020-12-24 It is only since global media and digital communications became accessible to ordinary populations - with Telstar, jumbo jets, the pc and mobile devices - that humans have been able to experience their own world as planetary in extent. What does it mean to be one species on one planet, rather than a patchwork of scattered, combative and mutually untranslatable cultures? One of the most original and prescient thinkers to tackle cultural globalisation was Juri Lotman (1922-93). *On the Digital Semiosphere* shows how his general model of the semiosphere provides a unique and compelling key to the dynamics and functions of today's globalised digital media systems and, in turn, their interactions and impact on planetary systems. Developing their own reworked and updated model of Lotman's evolutionary and dynamic approach to the semiosphere or cultural universe, the authors offer a unique account of the world-scale mechanisms that shape media, meanings, creativity and change - both productive and destructive. In so doing, they re-examine the relations among the contributing sciences and disciplines that have emerged to explain these phenomena, seeking to close the gap between biosciences and humanities in an integrated 'cultural science'

approach.
