Children's and YA Books in the College Classroom Emily Dial-Driver, Jim Ford, Sara N. Beam, 2015-03-23 Using children's and young adult literature is a great way to enhance a variety of college classes in fields as varied as biology, computer game development, political science and history. This collection of new essays by educators from a number of disciplines describes how to use such works as *Where the Wild Things Are*, *The Tale of Peter Rabbit*, *Swamp Thing*, *Percy Jackson*, and *Harry Potter* to introduce complex concepts and spark interest in difficult subjects. The contributors describe innovative teaching strategies using dystopian fiction, graphic narratives, fairy tales and mythology. Often overlooked or dismissed by teachers, children's literature can support student learning by raising levels of academic rigor, creativity and critical thinking.

Goodnight Moon 60th Anniversary Edition Margaret Wise Brown, 1977-10-01 In a great green room, tucked away in

bed, is a little bunny. Goodnight room, goodnight moon. And to all the familiar things in the softly lit room—to the picture of the three little bears sitting in chairs, to the clocks and his socks, to the mittens and the kittens, to everything one by one—he says goodnight. In this classic of modern children's literature, beloved by generations of readers and listeners, the quiet poetry of the words and the gentle, lulling illustrations combine to make a perfect book for the end of the day.

Books, Media and the Internet Shelley S. Peterson, Carol Jupiter, 2009-10-09 As editors of *Books, Media, and the Internet*, David Booth, Carol Jupiter, and Shelley S. Peterson present the work of colleagues from the conference "A Place for Children's Literature in the New Literacies Classrooms," April 2008. Within these pages, teachers, librarians, and others concerned with literacy will find inspiration and strategies for melding technology and children's literature from practitioners who have found effective ways to engage young people with text, both in print and on screen. The contributors to this anthology include classroom teachers, librarians, university educators, and journalists. They speak not only to the technologically capable and media-savvy teachers but also to the curious, who seek starting points for using new technologies alongside traditional print media in their classrooms. They show how multimedia and digital technologies expand our approaches to literacy education -- and how to extend and enrich our use of stories, whatever the media, with all ages. Their articles cover a vast range of subjects arranged into 5 sections. This book provides current information, classroom examples, and anecdotes as practical tools to help teachers use digital, media, and print texts to extend students' learning. The helpful "Teaching Tools" section at the end of the book explains how to use a variety of digital tools in the classroom.

Deployment Karen Petty, 2009-04-24 Children with parents in the military face unfamiliar and complicated emotions. This comprehensive handbook is for civilians and military personnel who work with or care for children who experience separation through deployment, death, or divorce. Written by an internationally known, hands-on trainer and presenter in the field, this book contains theory-based, practice-driven strategies for handling separation and helping young through elementary-age children move forward and live full lives.

SuperBaby Jenn Mann, 2010-09-07 The first three years of life are the most important for nurturing a child's full potential: that's when they start forming attachments, developing a sense of self, and learning to trust. During this time, there are critical windows of opportunity that parents can take advantage of—if they know how. In a dozen succinct yet information-packed chapters, award-winning columnist and professional therapist Dr. Jenn Berman gives parents the knowledge they need. Her enlightening sidebars, bulleted lists, and concrete, easy-to-use strategies will help parents raise happy, healthy babies...who grow to be flourishing toddlers and successful adults.

Young Children and Families in the Information Age Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory, research and practice on information and technology literacy as it relates to the education

of young children. Because computers have made it so easy to disseminate information, the amount of available information has grown at an exponential rate, making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users. Although much has been written about information literacy and technology literacy in secondary education, there is very little published research about these literacies in early childhood education. Recently, the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs. This statement recommends more research "to better understand how young children use and learn with technology and interactive media and also to better understand any short- and long-term effects." Many assume that today's young children are "digital natives" with a great understanding of technology. However, children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities. This book argues that information and technology literacy include more than just familiarity with the digital environment. They include using technology safely and ethically to demonstrate creativity and innovation; to communicate and collaborate; to conduct research and use information and to think critically, solve problems and make decisions.

Great Expectations: The Toddler Years Sandy Jones, 2011-10-04 Sterlings newest book in the acclaimed Great Expectations series covers every challenge parents and children face in the transition from baby to toddler, from toilet training and teeth brushing to language skills and healthy sleep habits, plus discipline, socialization, and play. Special sections on nutrition and childcare enrich the mix, along with insights to help parents become more flexible, responsive, patient, and creative.

Amber Fang: Hunted Arthur Slade, 2019-04-16 Amber Fang enjoys life's simple pleasures. A perfect evening for her includes a good book, a glass of wine and, of course, a great meal, preferably straight from the jugular. Raised to eat ethically, Amber dines only on delicious cold-blooded killers. But confirming that her chosen victims deserve to die takes time. And patience. So it's a good thing Amber is studying to be a librarian. Her extraordinary research skills help her hunt down her prey, seek out other vampires and stay on the trail of her mother, who has been missing for over two years now. But one day while Amber is stalking a rather tasty-looking murderer, things go horribly wrong. Amber has walked into a trap. The hunter becomes the hunted. Now on the run, Amber receives the perfect job offer out of the blue. Someone wants to pay her to kill (and eat) the world's worst criminals. It sounds too good to be true. *Amber Fang: Hunted* is the first book in this exciting vampire series.

Our Body of Work Melissa Nicolas, Anna Sicari, 2022-09-15 *Our Body of Work* invites administrators and teachers to consider how physical bodies inform everyday work and labor as well as research and administrative practices in writing programs. Combining academic and personal essays from a wide array of voices, it opens a meaningful discussion about the physicality of bodily experiences in the academy. Open exchanges enable complex and nuanced conversations about intersectionality and how racism, sexism, classism, and ableism (among other “isms”) create systems of power. Contributors examine how these conversations are framed around work, practices, policies, and research and identify ways to create inclusive, embodied practices in writing programs and classrooms. The collection is organized to maximize representation in the areas of race, gender, identity, ability, and class by featuring scholarly chapters followed by narratively focused interchapters that respond to and engage with the scholarly work. The honest and emotionally powerful stories in *Our Body of Work* expose problematic and normalizing policies, practices, and procedures and offer diverse theories and methodologies that provide multiple paths for individuals to follow to make the academy more inclusive and welcoming for all bodies. It will be an important resource for researchers, as well a valuable addition to graduate and undergraduate syllabi on embodiment, writing instruction/pedagogy, and WPA work. Contributors: Dena Arendall, Janel Atlas, Hayat Bedaiwi, Elizabeth Boquet, Lauren Brentnell, Triauna Carey, Denise Comer, Joshua Daniel, Michael Faris, Rebecca Gerdes-McClain, Morgan Gross, Nabila Hijazi, Jacquelyn Hoermann-Elliott, Maureen Johnson, Jasmine Kar Tang, Elitza Kotzeva, Michelle LaFrance, Jasmine Lee, Lynn C. Lewis, Mary Lourdes Silva, Rita Malenczyk, Anna Rita Napoleone, Julie Prebel, Rebecca Rodriguez Carey, Ryan Skinnell, Trixie Smith, Stacey Waite, Kelsey Walker, Shannon Walters, Isaac Wang, Jennie Young

A Future Untold Alina Siegfried, 2021-10-27 Why can't you understand those people who think so differently from you? Why have we failed to meaningfully address climate change despite 40 years of clear climate science? Why are so many of our systems of social support failing us? At the root of the answers to these questions lies the extraordinary power of story. The world is built upon stories - stories we believe about ourselves and others, narratives about "the way things are", and myths that define our relationship to the world around us. Many of the stories and narratives that we subconsciously believe have led us down the dark path to rising inequality, food insecurity, unprecedented levels of polarisation, and ecological instability on a planetary scale. And because it was us - humans - who collectively authored these stories, it is us who have the power to change them. An entertaining and inspiring rallying cry, *A Future Untold* urges us to return to the most fundamental driver of human behaviour and culture setting - story. Drawing heavily from her experience in environmental advocacy, activism, political communications, spoken word, and the entrepreneurial sector, New Zealand National Poetry Slam champion Alina Siegfried (AKA Ali Jacs) translates the fundamentals of narrative change into authentic stories, entertaining anecdotes, new myths for humanity, and a handful of powerful poems to provide a call to action for everyday citizens who believe that we can build a better future together.

Beauty and the Book Megan Benton, Ingrid D. Rowland, 2000-01-01 After World War I, the US was flooded with newspapers, magazines, radio stations and movies. Many feared serious books would disappear altogether. The concern caused a boom in fine editions, valued for beauty, craftsmanship or rarity, rather than content, and this is their story.

With a Book in Their Hands Manuel M. Martín-Rodríguez, 2014-06-30 First Place Winner of the 2015 International Latino Book Award for Best Latino Focused Nonfiction Book Literary history is a history of reading. What happens during the act of reading is the subject of the branch of literary scholarship known as reader-response theory. Does the text guide the reader? Does the reader operate independently of the text? Questions like these shape the approach of the essays in this book, edited by a scholar known for his groundbreaking work in using reader-response theory as a window into Chicana and Chicano literature. Manuel M. Martín-Rodríguez has overseen several research projects aimed at documenting Chicana and Chicano reading practices and experiences. Here he gathers diverse and passionate accounts of reading drawn from that research. For many, books served as refuges from the sorrows of a childhood marked by violence or parental abandonment. Several of the contributors here salute the roles of teachers in introducing poetry and stories into their lives.

Media & Culture Richard Campbell, Christopher R. Martin, Bettina Fabos, 2015-03-18 A number of high stakes conflicts — over net neutrality, streaming music, copyrights, the shifting fortunes of various media outlets, and divisive politics — continue to unfold over YouTube, Twitter, TV screens, and other mediated feeds. The speed at which these stories are consumed means that understanding the complex connections between the media and our culture is more important than ever. The new tenth edition of Media & Culture starts with the digital world students know and then goes further, focusing on what these constant changes mean to them. As always, Media & Culture brings together industry expertise, media history, and current trends for an exhilarating look at the media right now. Through new infographics, cross-reference pages, and a new digital jobs feature, this edition offers the most contemporary and compelling examinations yet of how the media industries connect, interlock, and converge.

Challenging and Controversial Picturebooks Janet Evans, 2015-06-05 It is often assumed that picturebooks are for very young readers because of their emphasis on the illustrations and their scarcity of text; however, there are increasing numbers of picturebooks where the age of the implied reader is questionable. These are picturebooks whose controversial subject matter and unconventional, often unsettling style of illustration challenge the reader, pushing them to question and probe deeper to understand what the book is about. In addition to the book challenging the reader, the reader often challenges the book in an attempt to understand what is being said. These increasingly popular picturebooks work on many different levels; they are truly polysemic and worthy of in-depth analysis. They push the reader to ask questions and in many instances are intrinsically philosophical, often dealing with fundamental life issues. Challenging and Controversial Picturebooks examines these unconventional, non-conformist picturebooks, considering what they are, their audience and their purpose. It also considers: Children's and adults' thoughts on these kinds of picturebooks. How challenging and unsettling wordless picturebooks can play with the mind and promote philosophical thought. What creates non-conformity and strangeness ... is it the illustrations and their style, the subject matter or a combination of both? Why certain countries create, promote and accept these picturebooks more than others. Why certain picturebooks are censored and what factors are in play when these decisions are made. The role of publishers in translating and publishing these picturebooks. Children's creative and critical responses to strange, unsettling and often disturbing visual texts. This inspiring and thought-provoking volume explores the work of a number of highly respected, international picturebook experts and includes an exclusive interview with the legendary Klaus Flugge, Managing Director of Andersen Press, one of the few remaining

independent children's book publishers in England. It is an indispensable reference for all interested in or working with picturebooks, including researchers, students in higher and teacher education, English advisors/inspectors, literacy consultants and classroom teachers.
