Creative Writing and Education Graeme Harper, 2015 This book explores creative writing and its various relationships to education through a number of short, evocative chapters written by key players in the field. At times controversial, the book presents issues, ideas and pedagogic practices related to creative writing in and around education, with a focus on higher education. The volume aims to give the reader a sense of contemporary thinking and to provide some alternative points of view, offering examples of how those involved feel about the relationship between creative writing and education. Many of the contributors play notable roles in national and international organizations concerned with creative writing and education. The book also includes a Foreword by Philip Gross, who won the 2009 TS Eliot Prize for poetry.

**Architectural Science Review** ,1974

**The Royal Navy in the Cold War Years, 1966-1990** Edward Hampshire, 2024-07-30 During the period covered by this new book the Royal Navy faced some of its greatest challenges, both at sea confronting the increasingly capable and impressive Soviet Navy, and on shore when it faced policy crises that threatened the survival of much of the fleet. During this remarkable period, the Navy had rarely been so focussed on a single theater of war – the Eastern Atlantic – but also rarely so politically vulnerable. The author sets out to analyze shadowing operations and confrontations at sea with Soviet ships and submarines; the Navy's role in the enormous NATO and Warsaw Pact naval exercises that acted out potential war scenarios; individual operations from the Falklands and the 1990-91 Gulf War to the Beira and Armilla patrols; the development of advanced naval technologies to counter Soviet capabilities; policy-making controversies as the three services fought for resources – including the controversial 1981 Nott defense review; and what life was like in the Cold War navy for ratings and officers. The book, the first to cover this subject in depth for more than thirty years, will make use of the full range of

archival sources that have been publicly available over the last two decades, but of which little use has been made by historians. This work is destined to become a definitive naval history of the period, and also provide a fascinating and gripping narrative of a navy under threat from many directions but which survived and eventually prospered, winning a remarkable victory in the far South Atlantic more than 7,000 miles from its expected battleground in the North Atlantic. Elegantly written for a wide audience, it will be a very significant volume for professional and enthusiast alike.

*Mr Hopkins' Men* A.D.D. Craik, 2008-03-21 A few years ago, in the Wren Library of Trinity College, Cambridge, I came across a remarkable but then little-known album of pencil and watercolour portraits. The artist of most (perhaps all) was Thomas Charles Wageman. Created during 1829-1852, these portraits are of pupils of the famous mathematical tutor William Hopkins. Though I knew much about several of the subjects, the names of others were then unknown to me. I was prompted to discover more about them all, and gradually this interest evolved into the present book. The project has expanded naturally to describe the Cambridge educational milieu of the time, the work of William Hopkins, and the later achievements of his pupils and their contemporaries. As I have taught applied mathematics in a British university for forty years, during a time of rapid change, the struggles to implement and to resist reform in mid-nineteenth-century Cambridge struck a chord of recognition. So, too, did debates about academic standards of honours degrees. And my own experiences, as a graduate of a Scottish university who proceeded to Cambridge for postgraduate work, gave me a particular interest in those Scots and Irish students who did much the same more than a hundred years earlier. As a mathematician, I sometimes felt frustrated at having to suppress virtually all of the pure mathematics associated with this period: but to have included such technical material would have made this a very different book.

**Iron & Coal Trades Review** ,1929 Vol. 115 includes Diamond jubilee issue, 1867-1927.

**Alumni Cantabrigienses** John Venn, John Archibald Venn, 2011-09-15 Detailed and comprehensive, the second volume of the Venns' directory, in six parts, includes all known alumni until 1900.

**Life Span Human Development** Carol K. Sigelman, Linda De George, Kimberley Cunial, Elizabeth A. Rider, 2018-09-01  
The third edition of Life Span Human Development helps students gain a deeper understanding of the many interacting

forces affecting development from infancy, childhood, adolescence and adulthood. It includes local, multicultural and indigenous issues and perspectives, local research in development, regionally relevant statistical information, and National guidelines on health. Taking a unique integrated topical and chronological approach, each chapter focuses on a domain of development such as physical growth, cognition, or personality, and traces developmental trends and influences in that domain from infancy to old age. Within each chapter, you will find sections on four life stages: infancy, childhood, adolescence and adulthood. This distinctive organisation enables students to comprehend the processes of transformation that occur in key areas of human development. This text also includes a MindTap course offering, with a strong suite of resources, including videos and the chronological sections within the text can be easily customised to suit academic and student needs.
