Fundamentos del diseño y la construcción con madera Pablo Guindos,2019 ¿Por qué vivimos mayormente en construcciones de hormigón?, ¿es posible diseñar y construir edificios y otras obras afines con madera?, ¿pueden ser dichas construcciones sólidas, durables y seguras? Las respuestas a estas preguntas han cambiado mucho en los últimos años; en la actualidad existen edificios de madera de 18 pisos de altura, lo que sorprende al público general pero especialmente a arquitectos, constructores e ingenieros. ¿De qué se trata esta nueva evolución de la madera y qué tipo de tecnologías se están empleando? Este texto conforma la primera parte de una trilogía de libros cuyo objetivo es presentar el estado del arte respecto de las últimas evoluciones de diseñar y construir con madera, incluyendo el diseño de edificios de mediana altura. Este primer volumen se dirige a arquitectos, constructores, industriales, diseñadores e ingenieros que quieren introducirse en la materia. El libro trata todos los aspectos esenciales que se requieren para abordar con eficiencia la construcción moderna con madera. Se recorren todos los principios esenciales, desde el conocimiento del propio material, pasando por el diseño estructural, la construcción, industrialización, protección frente al fuego y durabilidad. Los dos volúmenes posteriores se focalizan en el diseño estructural con madera, especialmente en el diseño de edificios.
