Soft Computing Evaluation Logic Jozo Dujmovic, 2018-09-10 A novel approach to decision engineering, with a verified framework for modeling human reasoning *Soft Computing Evaluation Logic* provides an in-depth examination of evaluation decision problems and presents comprehensive guidance toward the use of the Logic Scoring of Preference (LSP) method in modeling complex decision criteria. Fully aligned with current developments in computational intelligence, the discussion covers the design and use of LSP criteria for evaluation and comparison in diverse areas, such as search engines, medical conditions, real estate, space management, habitat mitigation projects in ecology, and land use and residential development suitability maps, with versatile transfer to other similar decision-modeling contexts. Human decision making is rife with fuzziness, imprecision, uncertainty, and half-truths—yet humans make evaluation decisions every day. In this book, such decision processes are observed, analyzed, and modeled. The result is graded logic, a soft computing mathematical infrastructure that provides both formal logic and semantic generalizations of classical Boolean logic. Graded logic is used for logic aggregation in the context of evaluation models consistent with observable properties of human reasoning. The LSP method, based on graded logic and logic aggregation, is a vital component of an industrial-strength decision engineering framework. Thus, the book: Provides detailed theoretical background for graded logic Provides a theory of logic aggregators Explains the LSP method for designing complex evaluation criteria and their use Shows techniques for evaluation, comparison, and selection of complex systems, as well as the cost/suitability analysis, optimization, sensitivity analysis, tradeoff analysis, and missingness-tolerant aggregation Includes a survey of available LSP software tools, including ISEE, ANSY and LSP.NT. With quantitative modeling of human reasoning, novel approaches to modeling decision criteria, and a verified decision engineering framework applicable to a broad array of applications, this book is an invaluable resource for graduate students, researchers, and practitioners working within the decision engineering realm.

European Convention on Human Rights Christoph Grabenwarter, 2014-02-12 The European Convention on Human Rights (ECHR) entered into force on 3 September 1953 with binding effect on all Member States of the Council of Europe. It grants the people of Europe a number of fundamental rights and freedoms (right to life, prohibition of torture, prohibition of

slavery and forced labour, right to liberty and security, right to a fair trial, no punishment without law, right to respect for private and family life, freedom of thought, conscience and religion, freedom of expression, freedom of assembly and association, right to marry, right to an effective remedy, prohibition of discrimination) plus some more by additional protocols to the Convention (Protocols 1 (ETS No. 009), 4 (ETS No. 046), 6 (ETS No. 114), 7 (ETS No. 117), 12 (ETS No. 177) and 13 (ETS No. 187)). Any person who feels his or her rights under the ECHR have been violated by the authorities of one of the Member States can bring a case to the European Court of Human Rights, established under the Convention. The States are bound by the Court's decisions. The Committee of Ministers of the Council of Europe make sure that the decisions are properly executed. Today the Court receives thousands of petitions annually, demonstrating the immense impact of the Convention and the Strasbourg Court. Professor Grabenwarter's Commentary deals with the Convention systematically, article-by-article, considering the development and scope of each article, together with the relevant case-law and literature.

Time, History and the Religious Imaginary in South Asia Anne Murphy, 2012-03-12 Religious imaginary is a way of conceiving and structuring the world within the conceptual and imaginative traditions of the religious. Using religious imaginary as a reference, this book analyses temporal ideologies and expressions of historicity in South Asia in the early modern, pre-colonial and early colonial period. Chapters explore the multiple understandings of time and the past that informed the historical imagination in various kinds of literary representations, including historiographical and literary texts, hagiography, and religious canonical literature. The book addresses the contributing forces and comparative implications of the formation of religious and communitarian sensibilities as expressed through the imagination of the past, and suggests how these relate to each other within and across traditions in South Asia. By bringing diverse materials together, this book presents new commonalities and distinctions that inform a larger understanding of how religion and other cultural formations impinge on the concept of temporality, and the representation of it as history.

Cancer: Improving Your Odds John G. Herron,2019-12-16 Are you looking for actionable things that you can do to help your cancer treatment, or possibly prevent cancer in the first place? Something with scientific evidence that it works? Something that you won't be embarrassed to discuss with your family doctor or oncologist? Something that can improve your immune system and general health? That is exactly what you will find in this book. Read on for... • Actionable methods for naturally treating and preventing cancer (the scientific way, not the internet blogger way) • Simple things that you can add to your medical treatment to Improve Your Odds of successfully fighting cancer • 100% backed by science that you, or your doctor, can easily verify • Easy to read and understand, but formatted so that you can share the science with your doctor • Improve your immune system and general health • Evidence that some of the recommendations may significantly improve immunotherapy outcomes, as well as benefit chemotherapy and radiotherapy treatments. • New research information that has the potential to save many lives My hope is you'll use this information to improve your medical treatment, not replace it. Even though some of the natural treatments have been scientifically shown to be very effective on their own, they are even more effective when used in conjunction with modern medicine. This is called "adjuvant" therapy. You should strive to "Improve Your Odds" of beating cancer, not thumb your nose at modern medicine. You do not need a scientific or medical background to understand this narrative—but its claims are evidenced with scientific abstracts that your doctor will appreciate (abstracts that you can skip if you wish to cut your reading time in half!). You will find that all recommendations

have solid evidence behind them; this isn't just another book where someone is simply making it all up and telling you what you want to hear. You should read this book with a highlighter and pencil at your side. This book has been extensively researched, and some of the information found here you will probably find in no other book or medical website. There is a special emphasis on how you can improve your immune system to better fight almost any cancer, even before you know you have it. You aren't trying to fire your doctor; you just want to help "Improve Your Odds." This book will help you do that. Your oncologist will want to know all of the supplements you are taking and why. This book includes the scientific abstracts and the information they need to find the full research studies. This will explain the "why" so you don't have to. They may also want to geek out on all of this science as they rarely get exposed to research on natural cancer treatments. Finally, this book enables you to take some control over your cancer treatment or genetic predisposition. In fact, most of the recommendations in this book are great even if you are healthy, as they can help prevent cancer and improve your immune system, too. Whether you may have breast cancer, skin cancer, lung cancer, etc., improving the immune system and your body's ability to fight cancer is always beneficial.

Understand Childhood Trauma & How To Let Go Julian Demarco, 2021-05-27 **As featured in Publishers Weekly with A+ rating** Clinical professionals will appreciate the boots-on-the-ground analysis of treatment options, while more casual readers will welcome the empowering messages, like the recommendations to let go of the belief that perfection equals happiness and to open up to significant others about their roles in the healing process. The overarching insight that trauma recovery must be individualized, with no set timetable for healing, pairs nicely with Demarco's goal to help readers reclaim control over their thoughts. The end result is as informative as well as inspiring. Book Description: Why are symptoms of panic attacks, anxieties, PTSD, and depression so tightly bound to trauma? Why does the traumatic memory feel so real, like it just happened? How do you regain control of your life and release the pain to feel symptom-free? Are you tired of being a slave to your emotions and triggered? Within this book, you will discover hope in regaining control of your emotions so that memories only serve as reflections of the past and no longer cause you pain. Discover how to ease yourself out of depression and release anxieties by rewiring your high-alert trauma brain. Brain chemistry changes from high cortisol levels, and science shows are directly connected to symptoms. By rewiring your brain, you bring yourself out from being associated with the memory and into the present moment, the now. You will be able to take your view out from the rear-view mirror behind you and onto the road ahead. You deserve better. Julian is a survivor of child sexual abuse and adult domestic violence and was diagnosed with complex PTSD, depression, and anxiety. Living in fear and a slave to her symptoms robbed her of being truly happy. She found NLP (neuro-linguistic programming) therapy that dramatically changed her outlook on life. This type of therapy assisted in releasing the painful memories by changing the emotional aspects of the memories from associated (feeling as if just happened) to dissociated (like watching a movie). By cognitive restructuring and changing the scene it

changed the feeling response to the memory. It overcame her 40 plus years of trauma symptoms, and having a deep desire to assist others led to becoming a certified NLP Practitioner. No one should have to suffer when there's hope. Not all people will respond to the techniques shared in this book, just as not all types of therapies are 100% effective. Understanding Childhood Trauma & How To Let Go is written from a survivor's view of some of life's cruelties as well as a practitioner on how to let go and find your joy again. Being a survivor also means Julian truly understands how hopeless you may feel because she has lived it. Most clinicians can't wholly understand the tribulation from symptoms that overshadows life and only see it from a sterile clinical perspective. Julian conveys compassion with empathy for what you've endured in your life. You're a survivor. Narrowed down are 11 techniques written in detail that, based on studies, were found to be most successful. This introduction to NLP is written in an easy-to-understand language and mindful not to trigger the reader with details of her traumas. This is the must-have book to ease you through your painful past and to assist you in becoming truly free. You deserve to be happy and take back control of your life.
