**Md. Shahriare Satu, Mohammad Ali Moni, M. Shamim Kaiser, Mohammad Shamsul Arefin**

*In Translation* Paul St-Pierre, Prafulla C. Kar, 2007-01-01 With contributions by researchers from India, Europe, North America and the Caribbean, *In Translation* □ Reflections, refractions, transformations touches on questions of method and on topics □ including copyright, cultural hybridity, globalization, identity construction, and minority languages □ which are important for the disciplinary development of translation studies but also of interest to other fields as well, most notably comparative literature, cultural studies and world literature. The volume provides a forum for new voices to be heard alongside those of well-established scholars and for current concerns to express themselves, often focusing on practices in areas of the world other than Europe or North America, which have until now tended to dominate the field. Acknowledging difference and celebrating it, the contributions conceive of translation as a process which reconstitutes and transforms, which brings renewal and growth, an interaction in a new context, a new reading, a new writing.

**English-French Translation** Christophe Gagne, Emilia Wilton-Godberfforde, 2020-12-29 *English-French Translation: A Practical Manual* allows advanced learners of French to develop their translation and writing skills. This book provides a deeper understanding of French grammatical structures, the nuances of different styles and registers and helps increase knowledge of vocabulary and idiomatic language. The manual provides a wealth of practical tasks based around carefully selected extracts from the diverse text types students are likely to encounter, from literary and expository, to persuasive and journalistic. A mix of shorter targeted activities and lengthier translation pieces guides learners through the complexities and challenges of translation from English into French. This comprehensive manual is ideal for advanced undergraduate and postgraduate students in French language and translation.

*A Comparative Study of Four English Translations of Sûrat Ad-Dukhân on the Semantic Level* Saudi Sadiq, 2010-03-08

Through combining a knowledge of translation theory and application, the present book aims at holding a semantic comparison of four English translations attempted by Muhammad Marmaduke Pickthall, ‘Abdullâh Yûsuf ‘Alî, Arthur J. Arberry and Muhammad Mahmûd Ghâlî of Sûrat Ad-Dukhân (the Chapter of Smoke). As a theoretical framework, the book deals with several linguistic and cultural problems of translation, with special reference to Qur’ân translation, and the principles that should be considered on translating the Qur’ân. The core of the book is a comparison of sixty-eight lexical, syntactic and stylistic selections from Sûrat Ad-Dukhân. The comparison depends on various Qur’ân interpretations and Arabic dictionaries to decide the precise meaning(s) of the selections. Then, a translation is suggested, and the four translations are judged: the correct ones are acknowledged and the mistaken shown, along with the reasons underlying the mistake(s). To reach the precise meaning in English and judge the translations compared accurately, many English dictionaries are utilized. The comparison shows that the best translation in terms of meaning precision and easiness of expression is that of Ghâlî, followed by Pickthall's, Arberry's and ‘Alî's respectively.

The Global English Style Guide John R. Kohl,2008-04-08 The Global English Style Guide illustrates how much you can do to make written texts more suitable for a global audience. Accompanied by an abundance of clearly explained examples, the Global English guidelines show you how to write documentation that is optimized for non-native speakers of English, translators, and even machine-translation software, as well as for native speakers of English. You'll find dozens of guidelines that you won't find in any other source, along with thorough explanations of why each guideline is useful. Author John Kohl also includes revision strategies, as well as caveats that will help you avoid applying guidelines incorrectly. Focusing primarily on sentence-level stylistic issues, problematic grammatical constructions, and terminology issues, this book addresses the following topics: ways to simplify your writing style and make it consistent; ambiguities that most writers and editors are not aware of, and how to eliminate those ambiguities; how to make your sentence structure more explicit so that your sentences are easier for native and non-native speakers to read and understand; punctuation and capitalization guidelines that improve readability and make translation more efficient; and how language technologies such as controlled-authoring software can facilitate the adoption of Global English as a corporate standard. This text is intended for anyone who uses written English to communicate technical information to a global audience. Technical writers, technical editors, science writers, and training instructors are just a few of the professions for which this book is essential reading. Even if producing technical information is not your primary job function, the Global English guidelines can help you communicate more effectively with colleagues around the world. This book is part of the SAS Press program.

### Machine Intelligence and Emerging Technologies Md. Shahriare Satu,Mohammad Ali Moni,M. Shamim

Kaiser,Mohammad Shamsul Arefin,2023-06-10 The two-volume set LNICST 490 and 491 constitutes the proceedings of the

First International Conference on Machine Intelligence and Emerging Technologies, MIET 2022, hosted by Noakhali Science and Technology University, Noakhali, Bangladesh, during September 23-25, 2022. The 104 papers presented in the proceedings were carefully reviewed and selected from 272 submissions. This book focuses on theoretical, practical, state-of-art applications, and research challenges in the field of artificial intelligence and emerging technologies. It will be helpful for active researchers and practitioners in this field. These papers are organized in the following topical sections: imaging for disease detection; pattern recognition and natural language processing; bio signals and recommendation systems for wellbeing; network, security and nanotechnology; and emerging technologies for society and industry.

**How to Translate** Nicolae Sfetcu, 2015-04-19 A guide for translators, about the translation theory, the translation process, interpreting, subtitling, internationalization and localization and computer-assisted translation. A special section is dedicated to the translator's education and associations. The guide includes, as annexes, several independent adaptations of the corresponding European Commission works, freely available via the EU Bookshop as PDF and via SetThings.com as EPUB, MOBI (Kindle) and PDF. For a “smart”, sensible translation, you should forget not the knowledge acquired at school or university, but the corrective standards. Some people want a translation with the touch of the source version, while another people feel that in a successful version we should not be able to guess the original language. We have to realize that both people have right and wrong, and that their only fault is to present requirement as an absolute truth. Teachers agree at least on this principle: “If a sentence is ambiguous, the translation must also be”. There is another critical, less easy to argue, based on an Italian phrase with particularly strong wording: “Traduttore, traditore”. This critique argues that any translation will betray the author's language, spirit, style ... because of the choices on all sides. What to sacrifice, clarity or brevity, if the formula in the text is brief and effective, but impossible to translate into so few words with the exact meaning? One could understand this criticism that it encourages us to read “in the text.” It seems obvious that it is impossible to follow this advice into practice.

**Advances in Data-Driven Computing and Intelligent Systems** Swagatam Das, Snehanshu Saha, Carlos A. Coello Coello, Jagdish C. Bansal, 2024-03-19 This book is a collection of best-selected research papers presented at the International Conference on Advances in Data-driven Computing and Intelligent Systems (ADCIS 2023) held at BITS Pilani, K. K. Birla Goa Campus, Goa, India, during September 21-23, 2023. It includes state-of-the-art research work in the cutting-edge technologies in the field of data science and intelligent systems. The book presents data-driven computing; it is a new field of

computational analysis which uses provided data to directly produce predictive outcomes. The book is useful for academicians, research scholars, and industry persons.

Artificial Intelligence R. B. Mishra, 2010-10 This book has been written keeping in view the requirements of undergraduate and postgraduate students and research scholars in the area of computer science and engineering in particular, and other branches of engineering which deal with the study of AI such as electronics engineering, electrical engineering, industrial engineering (robotics and FMS). Besides the engineering students, the postgraduate students of computer science and computer applications and cognitive sciences researchers can equally benefit from this text. The basic concepts of artificial intelligence, together with knowledge representation, reasoning methods, acquisition, management and distributed architecture, have been nicely and instructively described. The various application domains and disciplines in engineering, management, medicine which cover different aspects of design, assembly and monitoring, have been presented with utility aspects of AI concepts in logic and knowledge. The book maintains a simple and comprehensible style of presentation for the different categories of readers such as students, researchers and professionals for their respective uses.

**Learn Generative AI with PyTorch** Mark Liu, 2025-01-28 Learn how generative AI works by building your very own models that can write coherent text, create realistic images, and even make lifelike music. Learn Generative AI with PyTorch teaches the underlying mechanics of generative AI by building working AI models from scratch. Throughout, you'll use the intuitive PyTorch framework that's instantly familiar to anyone who's worked with Python data tools. Along the way, you'll master the fundamentals of General Adversarial Networks (GANs), Transformers, Large Language Models (LLMs), variational autoencoders, diffusion models, LangChain, and more! In Learn Generative AI with PyTorch you'll build these amazing models: • A simple English-to-French translator • A text-generating model as powerful as GPT-2 • A diffusion model that produces realistic flower images • Music generators using GANs and Transformers • An image style transfer model • A zero-shot know-it-all agent The generative AI projects you create use the same underlying techniques and technologies as full-scale models like GPT-4 and Stable Diffusion. You don't need to be a machine learning expert—you can get started with just some basic Python programming skills. About the technology Transformers, Generative Adversarial Networks (GANs), diffusion models, LLMs, and other powerful deep learning patterns have radically changed the way we manipulate text, images, and sound. Generative AI may seem like magic at first, but with a little Python, the PyTorch framework, and some practice, you can build interesting and useful models that will train and run on your laptop. This book shows you how. About the book Learn Generative AI with PyTorch introduces the underlying mechanics of generative AI by helping you build your own working AI models. You'll begin by creating simple images using a GAN, and then progress to writing a language translation transformer line-by-line. As you work through the fun and fascinating projects, you'll train models to create anime images, write like Hemingway, make music like Mozart, and more. You just need Python and a few machine learning basics

to get started. You'll learn the rest as you go! What's inside • Build an English-to-French translator • Create a text-generation LLM • Train a diffusion model to produce high-resolution images • Music generators using GANs and Transformers About the reader Examples use simple Python. No deep learning experience required. About the author Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky. The technical editor on this book was Emmanuel Maggiori.

*Bio-Inspired Computing and Applications* De-Shuang Huang,Yong Gan,Prashan Premaratne,Kyungsook Han,2012-01-05 The three-volume set LNCS 6838, LNAI 6839, and LNBI 6840 constitutes the thoroughly refereed post-conference proceedings of the 7th International Conference on Intelligent Computing, ICIC 2011, held in Zhengzhou, China, in August 2011. This volume contains 93 revised full papers, from a total of 281 presentations at the conference - carefully reviewed and selected from 832 initial submissions. The papers address all issues in Advanced Intelligent Computing, especially Methodologies and Applications, including theories, methodologies, and applications in science and technology. They include a range of techniques such as artificial intelligence, pattern recognition, evolutionary computing, informatics theories and applications, computational neuroscience and bioscience, soft computing, human computer interface issues, etc.

**Advances in Cross-Language Information Retrieval** Martin Braschler,Julio Gonzalo,Martin Kluck,2003-11-17 This book presents the thoroughly refereed post-proceedings of a workshop by the Cross-Language Evaluation Forum Campaign, CLEF 2002, held in Rome, Italy in September 2002. The 43 revised full papers presented together with an introduction and run data in an appendix were carefully reviewed and revised upon presentation at the workshop. The papers are organized in topical sections on systems evaluation experiments, cross language and more, monolingual experiments, mainly domain-

specific information retrieval, interactive issues, cross-language spoken document retrieval, and cross-language evaluation issues and initiatives.
