Verb-Verb Complexes in Asian Languages Taro Kageyama,Peter E. Hook,Prashant Pardeshi,2021-02-20 This volume is the first to present a detailed survey of the systems of verb-verb complexes in Asian languages from both a synchronic and diachronic perspective. Many Asian languages share, to a greater or lesser extent, a unique class of compound verbs consisting of a main verb and a quasi-auxiliary verb known as a 'vector' or 'explicator'. These quasi-auxiliary verbs exhibit unique grammatical behaviour that suggests that they have an intermediate status between full lexical verbs and wholly reduced auxiliaries. They are also semantically unique, in that when they are combined with main verbs, they can convey a rich variety of functional meanings beyond the traditional notions of tense, aspect, and modality, such as manner and intensity of action, benefaction for speaker or hearer, and polite or derogatory styles in speech. In this book, leading specialists in a range of Asian languages offer an in-depth analysis of the long-standing questions relating to the diachrony and geographical distribution of verb-verb complexes. The findings have implications for the general understanding of the grammaticalization of verb categories, complex predicate formation, aktionsart and event semantics, the morphology-syntax-semantics interface, areal linguistics, and typology.

Handbook of Teaching and Learning Persian as a Second Language Hooman Saeli,2025-09-26 This collection explores relevant pedagogical and sociolinguistic topics in the teaching and learning of Persian as a foreign and second language. Owing to the dearth of research in many areas pertaining to the teaching and learning of Persian, this handbook provides empirically-supported insights into various aspects of these areas. While the literature on teaching and learning Persian is growing, the field lacks a cohesive collection on Persian as a foreign/second language. The book addresses issues pertaining to the standardization and validation of teaching and assessment methods, which remain under-explored in the contexts of teaching and learning Persian. It also covers the teaching of Persian pragmatics, the use of corpora, as well as a range of different areas within linguistics, including phonetics, prosody, and historical linguistics. This comprehensive collection contributes substantially to the scientific study of many aspects of teaching and learning Persian which have been neglected for decades. A must-have text in Persian language pedagogy and Persian sociolinguistics, it an essential book for those in teaching and learning in Persian language programs worldwide.

Learner Corpora: Construction and Explorations in Chinese and Related Languages Howard Hao-Jan Chen,Keiko Mochizuki,Hongyin Tao,2023-04-02 This edited book reflects the state of the art in learner corpus and related approaches to Chinese as a second language (CSL). CSL as a field has flourished in the past few decades due to the increasingly important role of the Chinese language at the world stage, yet studies of Chinese as a second language based on learner corpora have been less well developed due to the limited availability of data and lack of theoretical insights. This book represents the latest research in this area by 1) assembling a large group of active researchers from multiple international research communities (USA, China, Hong Kong, Macau, Japan, Taiwan, and France); 2) discussing the latest resources and technologies in Chinese and other Asian languages learner corpora and corpus building; 3) basing Chinese as a second language studies on data from learners of Chinese with a wide range of first language backgrounds (English, Japanese, Korean, French, among others); and 4) integrating corpus methods with a wide range of related methods in allied fields—language acquisition, usage-based

linguistics, psycholinguistics, and neurolinguistics. This comprehensive collection is indispensable for anyone who is interested in corpus approaches to CSL and Chinese applied language studies in general.

The second, barely shorter with its 9 papers, is devoted to the description of various aspects of modern English; some of these papers shade off into theoretical linguistics. Professor Dekeyser having obtained his Ph.D. on grammaticography, there is a third section on Grammar from the Past, with 5 papers. The final section, 9 papers on Language Teaching and Contrast, honours the eminent teacher of literally thousands of budding anglicists.
