

A Conflict Of Visions

Betty Achinstein

A Conflict of Visions Thomas Sowell, 2002 A classic of a very special kind.... A gem of a book, crafted with passion for the truth and love for mankind. -Christian Science Monitor.

A Conflict of Visions Thomas Sowell, 2007-06-05 Thomas Sowell's "extraordinary" explication of the competing visions of human nature lie at the heart of our political conflicts (New York Times) Controversies in politics arise from many sources, but the conflicts that endure for generations or centuries show a remarkably consistent pattern. In this classic work, Thomas Sowell analyzes this pattern. He describes the two competing visions that shape our debates about the nature of reason, justice, equality, and power: the constrained vision, which sees human nature as unchanging and selfish, and the unconstrained vision, in which human nature is malleable and perfectible. A Conflict of Visions offers a convincing case that ethical and policy disputes circle around the disparity between both outlooks.

The Trickle-Down Delusion John Seip, Dee Wood Harper, 2016-05-02 From inside the book: "Since 1980, the economy has been growing, and productivity has been growing, but trickle-down values—that we, the American people promote, pursuant to the Republican Party's conservative ideology—have rigged the economy to continuously upwardly redistribute those revenues attributable to our increased productivity, yielding a productivity/wage disconnect, resulting in increased concentration of income and wealth at the top, in corporations and among older Americans (beneficiaries of income from Social Security, pensions and investments and continuing income due to delaying retirement), and the lowest percentage of GDP attributable to wages and highest attributable to profits since World War II. But trickle-down has not only distorted our economic thought; it has also distorted our political thought, our sociology and our concept of the rule of law. The result has

been that the trickle-down policies promoted by the Republican Party are undermining our economy, democracy, institutions and health.” For further discussion contact author at johnjseip@gmail.com.

Negotiations of Migration Annimari Juvonen, Verena Lindemann Lino, 2021-08-23 At a time when migration is mostly discussed in terms of “conflict” and “crisis”, it is decidedly important to acknowledge the discursive traditions, narrative patterns, and conceptual categories that continue to inform how migration is represented, analyzed and theorized in contemporary Europe. This volume focuses on the potential of artistic and critical practices to challenge hegemonic framings of migration and embrace the ambivalence inherent in migration as a conflictual, often violent, yet also liberating uprooting. By placing special emphasis on “peripheral” perspectives and subject positions, the volume provides new insights into topics such as belonging and exclusion, the “migrant crisis”, and memory. By bringing into dialogue creative practices and academic discourses, it explores how new modes of seeing and theorizing may emerge through experiences and representations of migration. Situated within the field of literary and cultural studies, it complements historical and social analyses in the emerging interdisciplinary field of migration studies.

Shakespeare's Moral Compass Neema Parvini, 2018-08-13 Examines the aesthetics, concepts and politics of chaotic and obscured moving images.

Intellectuals and Society Thomas Sowell, 2012-03-06 The influence of intellectuals is not only greater than in previous eras but also takes a very different form from that envisioned by those like Machiavelli and others who have wanted to directly influence rulers. It has not been by shaping the opinions or directing the actions of the holders of power that modern intellectuals have most influenced the course of events, but by shaping public opinion in ways that affect the actions of power holders in democratic societies, whether or not those power holders accept the general vision or the particular policies favored by intellectuals. Even government leaders with disdain or contempt for intellectuals have had to bend to the climate of opinion shaped by those intellectuals. *Intellectuals and Society* not only examines the track record of intellectuals in the things they have advocated but also analyzes the incentives and constraints under which their views and visions have emerged. One of the most surprising aspects of this study is how often intellectuals have been proved not only wrong, but grossly and disastrously wrong in their prescriptions for the ills of society -- and how little their views have changed in response to empirical evidence of the disasters entailed by those views.

Shakespeare's History Plays Neema Parvini, 2017-11-01 Shakespeare's History Plays boldly moves criticism of Shakespeare's history plays beyond anti-humanist theoretical approaches. This important intervention in the critical and theoretical discourse of Shakespeare studies summarises, evaluates and ultimately calls time on the mode of criticism that has prevailed in Shakespeare studies over the past thirty years. It heralds a new, more dynamic way of reading Shakespeare as a supremely intelligent and creative political thinker, whose history plays address and illuminate the very questions with

which cultural historicists have been so preoccupied since the 1980s. In providing bold and original readings of the first and second tetralogies (Henry VI, Richard III, Richard II and Henry IV, Parts 1 & 2), the book reignites old debates and re-energises recent bids to humanise Shakespeare and to restore agency to the individual in the critical readings of his plays

American Higher Education, Leadership, and Policy P. Pasque, 2010-06-07 In this critical look at contemporary higher education, Pasque argues that if a more thorough understanding of leaders' perspectives is not offered, then the dominant perspectives within academic discourse will continue to perpetuate the current ideas of higher education's relationship with society.

Dreams and Visions in the Bible and Related Literature Richard J. Bautch, Jean-François Racine, 2023-10-27 The essays in *Dreams and Visions in the Bible and Related Literature* focus on how the reading community interprets dreams or visions and what is at stake for whom in a dream or vision's interpretation. Contributors explore the hermeneutics of readership, the relationship between reading and intertextuality, and the interplay of affect and emotion within dreams and visions in religious texts. A variety of methodologies are employed, including rhetorical analysis, critical theory, trauma studies, the analysis of space and society, and the history of emotions. Contributors are Richard J. Bautch, Genevive Dibley, Roy Fisher, Gina Hens-Piazza, Joseph McDonald, Deborah Prince, Jean-François Racine, Andrea Spatafora, and Rodney A. Werline.

European Dispute over the Concept of Man Michał Gierycz, 2021-01-11 The book represents original research in a field of study rarely pursued while analysing the intellectual dimensions of disputes over ethically sensitive issues that occur in European Union politics. These disputes are generally analysed at ideological, ethical, economic and interstate levels. However, these references do not suffice in understanding the issue, which is related to a divergent perception of the essence of humanity and thus the subject matter of anthropology. The main research objective of the monograph is therefore to reconstruct the sources and the specific European Union way of thinking about the human being. Methodologically, the book expands the understanding of political anthropology within political science and presents a range of suitable instruments for pursuing anthropological research. At the theoretical level, it proposes an anthropological typology of the main currents of European political thought and reveals their prominence for the anthropological orientation of the EU's axiology. Empirically, it provides an analysis of the anthropological features of European Union institutions and policies in addition to discussing the relation between the axiological and anthropological positions of the main political and national groups within the EU.

The Consensus-conflict Debate Thomas J. Bernard, 1983 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan. In this carefully crafted volume, Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons, surveys

the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of the events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.

Handbook of Futures Studies Roberto Poli, 2024-07-05 This insightful Handbook emphasizes the unique contribution that Futures Studies offers when understanding and managing current situations. Contributing authors argue that by learning to examine the future in the present, individuals and organizations can expand their abilities to analyze, assess and ultimately make better decisions. This title contains one or more Open Access chapters.

Community, Diversity, and Conflict Among Schoolteachers Betty Achinstein, 2002-01-11 Using richly textured case studies of two very different schools, the author shows when teachers enact reforms in the name of community, what often emerges is conflict. Whether dealing with issues of teachers collaboration or how to meet the needs of a diverse student population, conflicts within professional communities reflect important differences of beliefs and practices. This book reframes conflict as constructive in building educational communities that learn and promote democratic values in schools.

Religion in International Relations F. Petito, P. Hatzopoulos, 2003-06-13 Are the secular foundations of international relations sustainable at present? This comprehensive study shows how the global resurgence of religion confronts international relations theory with a theoretical challenge comparable to that raised by the end of the Cold War or the emergence of globalization. The volume tries to shake the secular foundational myths of the discipline and outline the need for an expansion into religiously inspired spheres of thought. It also challenges the most condemning accusation against religion: the view that the politicization of religion is always a threat to security and inimical to the resolution of conflict. Finally, the task of demystifying religion is taken further with an argument for a stronger and progressive political engagement of the worldwide religious traditions in the contemporary globalized era.
