Retirement Income Mark Warshawsky, 2012 Strategies, products, and public policies that will help a new generation of retirees maximize income and minimize risk. As members of the baby boom generation head into retirement, they face an economic environment that has changed noticeably since their parents retired. Most of these new retirees will not be equipped, as many in the earlier generation were, with private pension plans, early retirement options, and fully paid retiree health benefits in addition to Social Security and Medicare. Today it is increasingly left to retirees themselves to plan how to maximize retirement income and minimize risk. In *Retirement Income*, Mark Warshawsky and his colleagues describe strategies, products, and public policies that will help a new generation achieve financial security and income growth in retirement. Warshawsky, a noted expert in the field who has worked in both government and private industry, analyzes two insurance vehicles, life annuities and long-term care insurance, and their capacity to protect against the extra costs arising from longevity and disability. He proposes two innovations. The first is a strategy that includes a set percentage withdrawal from a balanced portfolio, which is gradually used to purchase a ladder of life annuities. The second proposal, which includes a description of the potential choices in product design and available tax characteristics, is a product that integrates the immediate life annuity and long-term care insurance. With *Retirement Income*, Warshawsky offers practical ideas based on the results of empirical investigations and analyses, which can be applied to household decision making by retirees and their financial planners and to the design of insurance products and public policy.

Household Finance Sumit Agarwal, Wenlan Qian, Ruth Tan, 2020-10-07 Household finance studies is a relatively recent field, exploring a growing understanding of how households make financial decisions relating to the functions of consumption, payment, risk management, borrowing and investing; how institutions provide goods and services to satisfy these financial functions of households; and how interventions by firms, governments and other parties affect the provision of financial services. This timely book analyses existing findings about household behavior as well as findings related to policy interventions. With international case studies, this book reviews a topic of global importance and brings a crucial up-to-date survey of the field for researchers and postgraduate students.

La Nuit des anges Anna Tommasi, 2022-03-02 Alice, jeune mère divorcée, décide après dix ans d'absence de revenir à Perros Guirec, la ville de son enfance. Elle espère en profiter pour retrouver sa famille, des paysages familiers, et laisser derrière elle un passé douloureux. Mais dans ce coin de Bretagne chargé de souvenirs, l'angoisse s'installe rapidement : ses parents sont devenus des étrangers, son amour de jeunesse est obsédé par l'enlèvement de sa sœur, qui a eu lieu vingt-cinq ans plus tôt, et les visages jadis connus ne sont plus que des fantômes. Bientôt, c'est toute la ville qui est secouée d'un vent de panique avec la disparition d'une fillette. Le début du cauchemar pour Alice, embarquée malgré elle dans une enquête à double vitesse, entre le passé et le présent... Dans ce premier roman au rythme effréné, Anna Tommasi joue habilement avec le malaise, la perte de repères et le poison des secrets enfouis. Un thriller maîtrisé de bout en bout, impossible à lâcher !

The Central Asian Economies in the Twenty-First Century Richard Pomfret, 2019-01-15 This book analyzes the Central Asian economies of Kazakhstan, the Kyrgyz Republic, Tajikistan, Turkmenistan, and Uzbekistan, from their buffeting by the commodity boom of the early 2000s to its collapse in 2014. Richard Pomfret examines the countries' relations with external powers and the possibilities for development offered by infrastructure projects as well as rail links between China and Europe. The transition of these nations from centrally planned to market-based economic systems was essentially complete by the early 2000s, when the region experienced a massive increase in world prices for energy and mineral exports. This raised incomes in the main oil and gas exporters, Kazakhstan and Turkmenistan; brought more benefits to the most populous country, Uzbekistan; and left the poorest countries, the Kyrgyz Republic and Tajikistan, dependent on remittances from migrant workers in oil-rich Russia and Kazakhstan. Pomfret considers the enhanced role of the Central Asian nations in the global economy and their varied ties to China, the European Union, Russia, and the United States. With improved infrastructure and connectivity between China and Europe (reflected in regular rail freight services since 2011 and China's announcement of its Belt and Road Initiative in 2013), relaxation of United Nations sanctions against Iran in 2016, and the change in Uzbekistan's presidency in late 2016, a window of opportunity appears to have opened for Central Asian countries to achieve more sustainable economic futures.

Slope Safety Preparedness for Impact of Climate Change Ken Ho, Suzanne Lacasse, Luciano Picarelli, 2017-06-01 Many countries are increasingly threatened by major landslide disasters and fatalities due to extreme weather events which have major implications for public safety and the sustainability of infrastructure and the built environment. A further increase in such a trend could come from climate change. This book helps to fill in the gap due to the fact that landslide hazards are commonly not covered under the policy debate on climate change. The book highlights the importance of raising awareness to the challenges of landslide hazards due to climate impact. It provides a holistic frame for understanding the key issues and new tools that could be used to assess and manage the landslide risks. The book gathers contributions from 21 countries and regions in the form of national reports or summaries with respect to four key aspects: a) the methods used for evaluating changing weather and changing landslide patterns; b) the changing weather patterns; c) the changing landslide patterns and hazard scenarios; d) the applications to risk management and the formulation of adaptation measures. Recommendations are made for enhanced preparedness and resilience. Improved crisis management and areas for future work are suggested.
