The Vegetation of Poland Władysław Szafer, 2013-10-02 International Series of Monographs in Pure and Applied Biology, Volume 9: The Vegetation of Poland focuses on the plant geography of Poland, including climate, hydrography, geology, and ecology. The selection first offers information on the historical outline of the development of plant geography and the factors affecting the geographical distribution of plants in Poland. Discussions focus on the development of phytogeographical cartography, floristic and ecological plant geography, and the climate, boundaries, land-relief, hydrography, and geology of Poland. The text then ponders on the influence of man and his economic activities on the vegetation of Poland and the floristic statistics and the elements of the Polish flora. The publication examines the terrestrial and fresh-water plant communities and vegetation of the Polish Baltic. Topics include composition and structure of plant communities and methods of their study, associations of coastal and inland dunes, aquatic and swamp associations, and the most important representatives of the benthic flora of the Polish Baltic. The manuscript is a dependable source of data for botanists and those concerned with the plant resources of nature, including agriculturists, horticulturists, and soil scientists.

Russian Poland, Lithuania and White Russia Great Britain. Foreign Office. Historical Section, 1920 In preparation for the peace conference that was expected to follow World War I, in the spring of 1917 the British Foreign Office established a special section responsible for preparing background information for use by British delegates to the conference. Russian Poland, Lithuania and White Russia is Number 44 in a series of more than 160 studies produced by the section, most of which were published after the conclusion of the 1919 Paris Peace Conference. The study deals with parts of the Kingdom of Poland acquired by Russia in the 18th-century partitions of Poland (and confirmation of those partitions in 1815 at the Congress of Vienna) as well as the three Lithuanian provinces of the Russian Empire (Grodno, Kovno, and Vilna), and the three provinces (Vitebsk, Mohilev, and Minsk) known as White Russia (present-day Belarus). The book includes sections on physical and

political geography, political history, social and political conditions, and economic conditions. The total population of Russian Poland in 1914 was 13,335,400, of whom more than 75 percent were Polish. Minority populations in the country included Jews, Germans, Lithuanians, and Ukrainians (Ruthenians). In Lithuania and White Russia, the population of some 12,000,000 consisted mainly of Belarusians, Jews, and Lithuanians. Much of the study concerns the future of this ethnically and linguistically diverse region. The Lithuanian National Council, at a convention in Petrograd (Saint Petersburg) in May 1917, had issued a call for complete Lithuanian independence, while the Polish political parties had issued a declaration calling for the creation of a Polish-Lithuanian union. The study examines the merits of these conflicting positions, and the potential for conflict with Russia should the Polish proposals be adopted. Following the Paris Peace Conference, Poland and Lithuania were reconstituted as separate sovereign states. The appendix includes the texts (in French) of the Lithuanian and Polish statements on postwar independence.

Estonia, Latvia, Lithuania, and Poland Britannica Educational Publishing,2013-06-01 After emerging from the long shadow cast by the Soviet Union, the Baltic states of Estonia, Latvia, and Lithuania and neighboring Poland transitioned from communism to market economies and instituted democratic reforms in a remarkably short time. Although each continues to contend with various economic and political issues, their successes have allowed them to become some of the few former Eastern bloc states to join the European Union. The journeys each country has made—from antiquity to the present—and the remarkable peoples and cultures that make their populations are the subjects of this captivating volume.

Bodzia ,2014-11-27 Bodzia is one of the most fascinating archaeological discoveries of the post-war period in Poland. It is one of the few cemeteries in Poland from the time of the origins of the Polish state. The unique character of this discovery is mainly due to the fact that a small, elite population was buried there. The burials there included people whose origins were connected with the Slavic, Nomadic-Khazarian and Scandinavian milieus. For the first time the evidence from this area is given prominence. This book is designed mainly for readers outside Poland. The reader is offered a collection of chapters, combining analyses and syntheses of the source material, and a discussion of its etno-cultural and political significance. The authors formulate new hypotheses and ideas, which put the discoveries in a broader European context. Contributors are Wiesław Bogdanowicz, Mateusz Bogucki, Andrzej Buko, Magdalena M. Buś, Maria Dekówna, Alicja Drozd-Lipińska, Władysław Duczko, Karin Margarita Frei, Tomasz Goslar, Tomasz Grzybowski, Zdzisław Hensel, Iwona Hildebrandt-Radke, Michał Kara, Joanna Koszałka, Anna B. Poland in the Modern World Brian Porter-Szücs, 2014-03-17 Poland in the Modern World presents a history of the country from the late nineteenth century to the present, incorporating new perspectives from social and cultural history and positioning it in a broad global context. Challenges traditional accounts of Poland that tend to focus on national, political history, emphasizing the country's 'exceptionalism'. Presents a lively, multi-dimensional story, balancing coverage of high politics with discussion of social, cultural and economic changes, and their effects on individuals' daily lives. Explores both the regional diversity within Poland and the country's place within Europe and the wider world. Provides a new interpretive framework for understanding key historical events in Poland's modern history, including the experiences of World War II and the postwar communist era.

Landscapes and Landforms of Poland Piotr Migoń, Kacper Jancewicz, 2024-02-05 The volume is part of World Geomorphological Landscapes series and shows characteristic landscapes and landforms of Poland. It consists of two parts, general and regional. The first part includes overviews of geological history, Quaternary, climate and its impact on landforms, geomorphological division of the country, geoheritage and geoconservation. The second part comprises more than 40 region-specific studies to show the diversity of landscapes, from high-mountain relief through medium-altitude forested ranges, limestone uplands and loess plateaus, lowland landscapes moulded by past ice sheets, rivers and aeolian processes, to coastal sceneries. Selected examples of anthropogenically modified landscapes are also considered. Each chapter is accompanied by photographs, maps and diagrams. The volume is intended primarily for geographers and Quaternary geologists, but will be also of interest to anyone interested in natural landscapes and their conservation.

Poland, SOE and the Allies Jozef Garlinski, 2021-11-21 This book, first published in 1969, discusses objectively the tragic wartime position of Poland, having both the Nazis and Soviets as enemies – the war opened with the country being invaded by both. The book examines the work of the Polish underground army (Home Army) and its cooperation with SOE in providing intelligence of German movements – plans for attacking the Soviet Union, and experiments with V2 rockets. It also gives special attention to the Warsaw Rising and the political and military problems connected with it.

Poland and Spain in the Interwar and Postwar Period José Luis Orella Martínez, Małgorzata Mizerska-Wrotkowska, 2015-10-01 In the second volume comparing Poland and Spain (the comparison being fruit of cooperation between the University of Warsaw and the CEU San Pablo University in Madrid) we concentrate on studying two historical

periods of the 20th century, the happy 1920's of the interwar period and later on at the end of World War II. The two periods have been studied in their corresponding countries but have never been compared in parallel to see their coincidences and differences. Poland and Spain of the time allow for a comparison due to the similar populations, social agricultural models with intensely industrialised local centres and modern structuring processes which lead to a crisis of the very national unity. The selected periods present indispensable similarities which make the study interesting.

Quality of Water Resources in Poland Martina Zelenáková, Katarzyna Kubiak-Wójcicka, Abdelazim M Negm, 2021-02-18 This book presents state-of-the-art knowledge concerning water quality in Poland. It offers a wide variety of cases and issues on water resource quality management. The book also presents different methods and strategies to effectively use the most advanced water resource quality problems such as water pollution, whether physical, chemical, or biological, of surface water resources and groundwater resources. The authors pay exceptional attention to water quality monitoring in agricultural, urban catchments, and water reservoirs. More light into the water quality is required to assess water's physicochemical status accurately and plan suitable protection actions against recognized threats. This book addresses the needs of professional engineers, researchers, policy planners, decision-makers, stakeholders, and anyone looking to learn more about the quality situation of water resources in Poland and other similar countries and regions.
