Sealing of Boreholes and Underground Excavations in Rock K. Fuenkajorn,J.J. Daemen,2012-12-06 Sealing of boreholes and underground excavations has not received much engineering attention until fairly recently. The growing awareness of and sensitivity to environmental concerns of the technical community as well as of the public at large has resulted in an increasing recognition of the fact that these geological penetrations may have an environmental impact. The issue of possible contamination resulting from migration along boreholes, adits, shafts or tunnels unquestionably has been raised most forcefully within the context of nuclear waste disposal. Several nuclear waste disposal programs, notably the Civilian and the Defence programs of the US Department of Energy, the US Nuclear Regulatory Commission and the Canadian and Swedish radioactive waste disposal programs have conducted major research efforts aimed at developing adequate seal designs for penetrations in host rock formations for high-level nuclear waste repositories. While a considerable data base has been gathered over the last two decades or so with regard to the performance of seals, most of the information is presented in research reports and widely scattered papers in journals and proceedings of conferences. Hence, the materials are not readily accessible to potential users such as designers, contractors or regulators who are not familiar with nuclear waste disposal programs.

Native Peoples of the Olympic Peninsula Jacilee Wray, 2015-10-20 The nine Native tribes of Washington State's Olympic Peninsula—the Hoh, Skokomish, Squaxin Island, Lower Elwha Klallam, Jamestown S'Klallam, Port Gamble S'Klallam, Quinault, Quileute, and Makah—share complex histories of trade, religion, warfare, and kinship, as well as reverence for the teaching of elders. However, each indigenous nation's relationship to the Olympic Peninsula is unique. *Native Peoples of the Olympic Peninsula: Who We Are* traces the nine tribes' common history and each tribe's individual story. This second edition is updated to include new developments since the volume's initial publication—especially the removal of the Elwha River dams—thus reflecting the ever-changing environment for the Native peoples of the Olympic Peninsula. Nine essays, researched and written by members of the subject tribes, cover cultural history, contemporary affairs, heritage programs, and tourism information. Edited by anthropologist Jacilee Wray, who also provides the book's introduction, this collection relates the Native peoples' history in their own words and addresses each tribe's current cultural and political issues, from the establishment of community centers to mass canoe journeys. The volume's updated content expands its findings to new audiences. More than 70 photographs and other illustrations, many of which are new to this edition, give further insight into the unique legacy of these groups, moving beyond popular romanticized views of American Indians to portray their lived experiences. Providing a foundation for outsiders to learn about the Olympic Peninsula tribes' unique history with one another and their land, this volume demonstrates a cross-tribal commitment to education, adaptation, and cultural preservation. Furthering these goals, this updated edition offers fresh understanding of Native peoples often seen from an outside perspective only.

Gathered for God Dent Davidson, Jeffrey Lee, 2018-01-01 The new Church's Teachings series has been one of the most recognizable and useful sets of books in the Episcopal Church. With the launch of the Church's Teachings for a Changing World series, visionary Episcopal thinkers and leaders have teamed up to write a new set of books, grounded and thoughtful enough for seminarians and leaders, concise and accessible enough for newcomers, with a host of discussion resources that help readers to dig deep. What's really going on when Episcopalians gather for worship? Musician Dent Davidson and Bishop Jeff Lee bring decades of partnership to this lively conversation about the rituals that make faith real—gathering, bathing, welcoming, storytelling, feasting, and sending God's people. More than a treatise on the Book of Common Prayer, *Gathered for God* opens fresh ways of seeing what the Prayer Book makes possible.

Refashioning Myth David McInnis, Eric Parisot, Jessica Wilkinson, 2020-05-15 Robert Graves tells us that "the poet's first enrichment is a knowledge and understanding of myths." Certainly, as this collection of essays, poems and visual images affirms, mythology has been a field richly mined by poets and artists from antiquity through to the present day. It is testament to both the enduring power of myth, as well as the adaptability of its form, that poets and writers continually turn to the mythic for both inspiration and guidance. This volume presents a diverse collection of analytical and creative works by scholars, poets and visual artists, in response to their varied explorations of the prolific dialogue that exists between myth and poetry.

Advanced Chassis Control Technology for Steer-by-Wire Vehicles Xiaodong Wu, 2024-06-04 Advanced Chassis Control Technology for Steer-by-Wire Vehicles details state-of-the-art drive-by-wire technology, enabling engineers to create safer and smarter steering technology. Nanofinishing Science and Technology Vijay Kumar Jain, 2016-12-12 Finishing is the final operation after a part is sized and shaped. Currently in high tech industries, there is a demand for nano level surface finishing of components. This process is done to improve the surface finish, to remove the recast layer, or to remove surface and sub-surface defects. The result is low friction, longer product life, and low power requirements. Equally important is the aesthetic aspect of the product. This subject is growing very fast from the technology as well as a science point of view. Books on this subject are very limited, particularly those ones that deal with both the science as well as the technology aspects.
