All Made of Tunes James Peter Burkholder, 1995-01-01 Charles Ives is famous for using borrowed material in his music. Almost two hundred individual works or movements, spanning his entire career and representing more than a third of his output, incorporate music by other composers or from his own previous work. In this book, the eminent Ives scholar J. Peter Burkholder identifies the different kinds of quotations in Ives's music, explores the complex musical, aesthetic, and psychological motivations behind the borrowings, and shows the purpose, techniques, and effects that characterize each one. Burkholder catalogues fourteen distinct ways that Ives borrowed, ranging from direct quotation to paraphrase, variation, collage, modeling, and stylistic allusion. Arguing that these borrowing procedures were compositional strategies, he provides a new perspective on Ives's process of composition. In addition, by tracing the development of Ives's borrowing practices through his career, he contributes to an understanding of the composer's stylistic evolution. And by showing how much of Ives's music uses borrowing procedures that are common to many composers, he reveals that Ives is not as far removed from the classic-romantic tradition as has been thought. Finally, Burkholder's comprehensive treatment of Ives's borrowing techniques offers a new perspective on the entire field of musical borrowing.

A Blueprint for Promoting Academic and Social Competence in After-School Programs Thomas P. Gullotta, Martin Bloom, Christianne F. Gullotta, Jennifer C. Messina, 2010-06-25 School activities alone are not always sufficient to ensure children's academic progress or socio-emotional development and well-being. And the time when many children typically have the least adult supervision - immediately after school - is also the time that they are at the highest risk to act as perpetrators or become victims of antisocial behavior. Throughout *A Blueprint for Promoting Academic and Social Competence in After-School Programs*, which focuses on children in grades 1 through 6, noted experts identify the best practices of effective programs and pinpoint methods for enhancing school-based skills and making them portable to home and neighborhood settings. This volume: (1) Analyzes the concepts central to effective after-school programs. (2) Offers developmental, cognitive, and social ecology perspectives on how children learn. (3) Features more than 100 exercises that develop young people's capabilities for academic, social, moral, and emotional learning - These exercises are ready to use or

can be adapted to students' unique needs. (4) Emphasizes young people's development as students and as productive members of society during middle to late childhood and early adolescence. (5) Presents explicit theory and evidence that can be used to explain the value of after-school programs for budget proposals. This important book will find an appreciative, ready audience among the program directors who design after-school curricula, the educators who implement them, the mental health and social work professionals who help staff them, and the current crop of graduate students who will create the next generation of programs.

Especially for Boys Dennis Alexander, For years, piano teachers remarked that Dennis Alexander's pieces were great for boys and suggested that he write a book of pieces with boys in mind. Drawing on his own teaching experiences, and recalling the kinds of pieces he would have liked to play at a similar age, he composed these engaging late elementary piano solos that incorporate strong rhythms, athletic leaps of the hands and big sounds. A gratifying collection for students who need a little extra motivation to practice!

The Encyclopedia of Film Composers Thomas S. Hischak, 2015-04-16 For more than a century, original music has been composed for the cinema. From the early days when live music accompanied silent films to the present in which a composer can draw upon a full orchestra or a lone synthesizer to embody a composition, music has been an integral element of most films. By the late 1930s, movie studios had established music departments, and some of the greatest names in film music emerged during Hollywood's Golden Age, including Alfred Newman, Max Steiner, Dimitri Tiomkin, and Bernard Herrmann. Over the decades, other creators of screen music offered additional memorable scores, and some composers—such as Henry Mancini, Randy Newman, and John Williams—have become household names. The Encyclopedia of Film Composers features entries on more than 250 movie composers from around the world. It not only provides facts about these artists but also explains what makes each composer notable and discusses his or her music in detail. Each entry includes Biographical material Important dates Career highlights Analysis of the composer's musical style Complete list of movie credits This book brings recognition to the many men and women who have written music for movies over the past one hundred years. In addition to composers from the United States and Great Britain, artists from dozens of other countries are also represented. A rich resource of movie music history, The Encyclopedia of Film Composers will be of interest to fans of cinema in general

as well as those who want to learn more about the many talented individuals who have created memorable scores.

Sound in the American Horror Film Jeffrey Bullins,2024-07-22 The crack of thunder, a blood-curdling scream, creaking doors, or maybe complete silence. Sounds such as these have helped frighten and startle horror movie audiences for close to a century. Listen to a Universal classic like Dracula or Frankenstein and you will hear a very different soundtrack from contemporary horror films. So how did we get from there to here? What scared audiences then compared to now? This examination of the horror film's soundtrack builds on film sound and genre scholarship to demonstrate how horror, perhaps more than any other genre, utilizes sound to manipulate audience response. Beginning with the Universal pictures of the early 1930s and moving through the next nine decades, it explores connections and contrasts throughout the genre's technical and creative evolution. New enthusiasts or veteran fans of such varied films as The Mummy, Cat People, The Day the Earth Stood Still, Psycho, Halloween, A Nightmare on Elm Street, Scream, The Conjuring, Paranormal Activity, and A Quiet Place will find plenty to explore, and perhaps a new sonic appreciation, within these pages.

Musique Fantastique Randall D. Larson,1985 This book discusses the use of scores in horror, science fiction and fantasy films, covering the 1930's to the 1980's, with chapters on Herrmann, Goldsmith, Rózsa, Japanese monster movies, Hammer horror movies, John Williams, electronic music and how classical music has been integrated into these film genres.

The Magic of Music, Book 2 Dennis Alexander, The exciting pieces in these collections are designed to entertain, reinforce and enhance the important music and technical skills being studied during the early levels. Students will develop their own magical imaginations with the repertoire contained in this series.
