Steve Shipps

How to See David Salle, 2016-10-18 "If John Berger's *Ways of Seeing* is a classic of art criticism, looking at the 'what' of art, then David Salle's *How to See* is the artist's reply, a brilliant series of reflections on how artists think when they make their work. The 'how' of art has perhaps never been better explored." —Salman Rushdie How does art work? How does it move us, inform us, challenge us? Internationally renowned painter David Salle's incisive essay collection illuminates these questions by exploring the work of influential twentieth-century artists. Engaging with a wide range of Salle's friends and contemporaries—from painters to conceptual artists such as Jeff Koons, John Baldessari, Roy Lichtenstein, and Alex Katz, among others—*How to See* explores not only the multilayered personalities of the artists themselves but also the distinctive character of their oeuvres. Salle writes with humor and verve, replacing the jargon of art theory with precise and evocative descriptions that help the reader develop a personal and intuitive engagement with art. The result: a master class on how to see with an artist's eye.

Get the Picture Bianca Bosker, 2025-04-15 AN INSTANT NEW YORK TIMES BESTSELLER NAMED A BEST BOOK OF 2024 BY NPR, TIME, AND THE ECONOMIST “Get the Picture is one of the funniest books I’ve read . . . Brilliant.” —The Washington Post “A gripping and often hilarious investigation into the art world. . . . Bosker goes full Tom Wolfe.” —TIME “Funny, whip-smart, and gorgeously written, *Get the Picture* will forever transform the way you see. . . . I loved every word.” —Suleika Jaouad, New York Times bestselling author of *Between Two Kingdoms* The New York Times bestselling author of *Cork Dork* takes readers on another fascinating, hilarious, and revelatory journey—this time burrowing deep inside the secretive world of art and artists An award-winning journalist obsessed with obsession, Bianca Bosker’s existence was upended when she wandered into the art world—and couldn’t look away. Intrigued by artists who hyperventilate around their favorite colors and art fiends who max out credit cards to show hunks of metal they think can change the world, Bosker grew fixated on understanding why art matters and how she—or any of us—could engage with it more deeply. In *Get the Picture*, Bosker throws herself into the nerve center of art and the people who live for it: gallerists, collectors, curators, and, of course, artists themselves—the kind who work multiple jobs to afford their studios while scrabbling to get eyes on their art. As she stretches canvases until her fingers blister, talks her way into A-list parties full of billionaire collectors, has her face sat on by a nearly-naked performance artist, and forces herself to stare at a single sculpture for hours on end while working as a museum security guard, she discovers not only the inner workings of the art-canonization machine but also a more expansive way of living. Probing everything from cave paintings to Instagram, and from the science of sight to the importance of beauty as it examines art’s role in our culture, our economy, and our hearts, *Get the Picture* is a rollicking adventure that will change the way you see forever.

An Introductory Guide to Qualitative Research in Art Museums Ann Rowson Love, Deborah Randolph, 2024-02-20 An Introductory Guide to Qualitative Research in Art Museums is a practice-based guide that is designed to introduce qualitative research to established and upcoming museum professionals and increase their confidence to conduct this type of research. Highlighting the work of researchers who are studying museums around the world, the book begins by explaining why there is a need for qualitative research in museums. Rowson Love and Randolph then go on to provide guidance, including theories and frameworks, on how to envision a qualitative research project that facilitates meaningful interpretation of visitor experiences. Chapters in the methodology section begin with descriptions of featured qualitative methodologies and will assist readers as they determine which are most appropriate for their projects and as they advocate for their research. The final section will prepare readers still further by demonstrating data analysis and reporting using the examples in the book. An Introductory Guide to Qualitative Research in Art Museums will help museum professionals and students engaged in the study of museums expand their repertoire to include qualitative methodologies and explain the methods needed to conduct, analyze, and report their qualitative research. It will be particularly useful to those with an interest in museum education, visitor studies and audience research, exhibition development, leadership, and management.

Experimental Practices in Interdisciplinary Art, 2024-10-21 Experimental Practices in Interdisciplinary Art presents the work of contemporary artists who are committed to experimenting in the marginal areas where artmaking, practice-based research, and scholarship intersect. Some work in laboratory settings, some in studios, and some in wild landscapes or abandoned buildings. But all are committed to interrogating the way that art is created and positioned in a culture that continues to marginalize artists working across disciplinary boundaries. Their projects range from inquiries into the way surveillance technologies are used to reinforce power structures to collaboratories that help us to re-envision our relationship with the natural world and with each other. In reflecting on their wide-ranging explorations and unusual methods, these unique artists provide fruitful insights for bringing creativity to bear on issues of public import.

Philip Guston Philip Guston, Clark Coolidge, 2011 This volume introduces the diverse voices that comprise Guston's linguistic tapestry. Guston never stopped talking for too long. There may have been periods of silence precipitated by existential moments of doubt, but such lapses seem anomalous when measured against the voluminous transcriptions gleaned and edited by Clark Coolidge. Coolidge has done an admirable job arranging and presenting the book's contents, entirely relevant to anyone curious about Guston, and by extension, American Art of the post-World War II period.—Douglas Dreishpoon, chief curator at Knox-Albright Gallery

The Art World Demystified Brainard Carey, 2016-04-19 The Art World Demystified unfolds the confusing and often treacherous terrain of the art world, revealing the inner workings of a system that has few rules but many opportunities. In this volume, artists will find their own questions reflected and addressed, including: •How does an artist penetrate the inner circle of the art world? •How do museums choose exhibits? •How can an artist reach critics and get feedback? •How do artists make a living, and how much can they expect to make? •What are the “rules” of the art world? •Why is it all so mysterious? Author and successful artist Brainard Carey explores these queries and more, giving concise answers and guidance on such issues as talking to curators, navigating suitable promotion, and maintaining motivation, alongside profiles of well-known artists. He enables, and encourages, readers to not only navigate the mysteries of the artist's career, but also to create their own mythologies by presenting their work in a way that generates interest, questions, and an invitation to the inner circle. (Re)Thinking "Art" Steve Shipp, 2008-03-10 (Re)Thinking Art: A Guide for Beginners is a primer that considers the term art, what it means and why it matters. Rather than being about any particular sort of art —visual or otherwise— the book addresses the idea of art in all, in all its messy complexity, and offers meaningful access to the vast array of human products to which it refers. Written by an award-winning teacher as a response to students' ongoing challenge, What is 'art', anyway, and why should I care? Aims to bring readers into a meaningful relationship with art and teaches them to think critically and creatively about it - and by extension, about anything else Provides an ideal introduction to the field for students and anyone interested in art today Offers a jargon-free, common-sense basis from which to approach the theories that dominate the art world today, for readers who may wish to pursue them further

Play Among Books Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an “infinite flow” of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.
