Integrated Korean Young-mee Yu Cho, Hyo Sang Lee, Carol Schulz, Ho-min Sohn, Sung-Ock Sohn, 2019-07-31 This is a thoroughly revised edition of Integrated Korean: Beginning 1, the first volume of the best-selling series developed collaboratively by leading classroom teachers and linguists of Korean. All the series' volumes have been developed in accordance with performance-based principles and methodology—contextualization, learner-centeredness, use of authentic materials, usage-orientedness, balance between skill getting and skill using, and integration of speaking, listening, reading, writing, and culture. Grammar points are systematically introduced in simple but adequate explanations and abundant examples and exercises. Each situation/topic-based lesson of the main texts consists of model dialogues, narration, new words and expressions, vocabulary notes, culture, grammar, usage, and English translation of dialogues. In response to comments from hundreds of students and instructors of the second edition, this new third edition features an attractive color design with new photos and drawings and lesson and vocabulary exercises that have been fully reorganized. Each lesson contains a conversational text (with its own vocabulary list) and a reading passage. The accompanying workbook—available online as well as in paperback—provides students with extensive skill-using activities based on the skills learned in the main text. Integrated Korean is a project of the Korean Language Education and Research Center (KLEAR) with the support of the Korea Foundation. In addition to the five-level Integrated Korean textbooks and workbooks, volumes include Korean Composition, Korean Language in Culture and Society, Korean Reader for Chinese Characters, Readings in Modern Korean Literature, A Resource for Korean Grammar Instruction, and Selected Readings in Korean. Audio files for this volume may be downloaded in MP3 format at <https://kleartextbook.com>

Teaching Korean as a Foreign Language Young-mee Yu Cho, 2020-10-20 Teaching Korean as a Foreign Language: Theories and Practices is designed for prospective or in-service Korean as a Foreign Language (KFL) teachers. With contributions from leading experts in the field, readers will gain an understanding of the theoretical framework and practical applications of KFL education in the context of Second Language Acquisition (SLA). The eight chapters explore the history of and current issues in language education, the practicalities of being a classroom teacher, and teaching and evaluation techniques for developing language and cultural proficiency. This comprehensive volume also includes an annotated bibliography which lists over 500 of the most recent and pertinent research articles and doctoral dissertations in the area.

This bibliography will be of great service to students, teachers, and any researchers in applied linguistics and second language acquisition interested in Korean language education.

Enhancing Beginner-Level Foreign Language Education for Adult Learners Ekaterina Nemtchinova, 2022-12-30 This book is an authoritative text that explores best classroom practices for engaging adult learners in beginner-level foreign language courses. Built around a diverse range of international research studies and conceptual articles, the book covers four key issues in teaching language to novice students: development of linguistic skills, communicative and intercultural competence, evaluation and assessment, and the use of technology. Each chapter includes teaching insights that are supported by critical research and can be practically applied across languages to enhance instructional strategies and curriculum designs. The text also aims to build intercultural competence, harness technology, and design assessment to stimulate effective learning in formal instructional settings, including colleges, universities, and specialist language schools. With its broad coverage of language pedagogy at the novice level, this book is a must read for graduate students, scholars, researchers, and practitioners in the fields of language education, second language acquisition, language teaching and learning, and applied linguistics.

Integrated Korean Young-mee Cho, 2000-01-01 This intermediate level text has been developed in accordance with performance-based principles, contextualization, use of authentic materials, function/task-orientedness, and balance between skill getting and skill using. Each topic covers punctuation, grammar and new words and expressions.

An Integrated Systems Model for Preventing Child Sexual Abuse A. Jones, E. Jemmott, P. Maharaj, H. Breo, 2015-12-28 This book sets out an integrated systems model which utilizes a public health approach and 'whole of society' philosophy for preventing and responding to child sexual abuse. It guides those engaged in policy, practice and planning concerning gender based violence and child abuse towards a more systemic approach to tackling these problems.

The Very Long Game Heiko Borchert, Torben Schütz, Joseph Verbovszky, 2024-07-18 This open access book is the outcome of a unique multinational effort organized by the Hamburg-based Defense AI Observatory (DAIO) to portray the current state of affairs regarding the use of artificial intelligence (AI) by armed forces around the world. The contributions span a diverse range of geostrategic contexts by providing in-depth case studies on Australia, Canada, China, Denmark, Estonia, Finland, France, Germany, Greece, India, Iran, Israel, Italy, Japan, the Netherlands, Russia, Singapore, South Korea, Spain, Sweden, Taiwan, Turkey, Ukraine, the UK, and the United States. The book does not speculate about the future implications of AI on armed forces, but rather discusses how armed forces are currently exploring the potential of this emerging technology. By adopting a uniform analytical framework, each case study discusses how armed forces view defense AI; how they are developing AI-enhanced solutions, adapting existing structures and processes, and funding their defense AI endeavors; to

what extent defense AI is already fielded and operated; and how soldiers and officers are being trained to work with AI.

Integrated Natural Resources Research Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, 2021-07-21 This book is a sister volume to Volume 20 of the Handbook of Environmental Engineering Series, Integrated Natural Resources Management, and expands on the themes of that volume by addressing the conservation and protection of natural resources in an environmental engineering context through state-of-the-art research methodologies and technologies. With a focus on water and wastewater treatment, the book takes a multidisciplinary approach to provide readers with an understanding of developments in natural resources technology over the last few decades, and how technology and industry methods will progress to ensure cleaner and sustainable methods of natural resources management. The key topics covered include biological activated carbon treatment for recycling biotreated wastewater, composting for food processing wastes, treatment of wastewater from chemical industries, agricultural waste as a low-cost adsorbent, and the invention, design and construction of potable water dissolved air flotation and filtration plants. The book will be useful to environmental resources engineers, researchers, water treatment plant managers, chemical engineers, industrial plant managers, and environmental conservation agencies.

Fighting Machines Dan Saxon, 2021-12-03 Lethal autonomous weapons are weapon systems that can select and destroy targets without intervention by a human operator. *Fighting Machines* explores the relationship between lethal autonomous weapons (LAWS), the concept of human dignity, and international law. Much of this analysis speaks to three fundamental and related problems: When a LAWS takes a human life, is that killing a violation of human dignity? Can states and non-state actors use LAWS in accordance with international law? And are there certain responsibilities of human decision-making during wartime that we should not delegate to machines? In the book, Dan Saxon argues that the use of LAWS to take human life constitutes a violation of human dignity. Rather than concentrating on the victims of the use of lethal force, Saxon instead focuses on the technology and relevant legal principles and rules to advance several propositions. First, as LAWS operate at increasingly greater speeds, their use will undermine the opportunities for, and the value of, human reasoning and judgment. Second, by transferring responsibility for reasoning and judgment about the use of lethal force to computer software, the use of LAWS violates the dignity of the soldiers, commanders, and law enforcement officers who historically have made such decisions, and, therefore, breaches international law. Third, weapon designs that facilitate teamwork between humans and autonomous systems are necessary to ensure that humans and LAWS can operate interdependently so that individuals can fulfil their obligations under international law—including the preservation of their own dignity—and ensure that human reasoning and judgment are available for cognitive functions better suited to humans than machines. *Fighting Machines* speaks to the fields of international humanitarian law, human rights, criminal law, and legal philosophy. It will also be of interest to non-lawyers, especially military officers, government policy makers, political scientists, and international relations

scholars, as well as roboticists and ethicists.

Ecological Biomarkers Claude Amiard-Triquet, Jean-Claude Amiard, Philip S. Rainbow, 2016-04-19 Does a change, which affects a few biological macro-molecules, some cells, or a few individuals within a population, have any ecological significance that would allow the prediction of deleterious effects at higher levels of biological organization, namely the population, community, and ultimately the ecosystem? With contributions from experts in t

Plutonium Frank von Hippel, Masafumi Takubo, Jungmin Kang, 2019-12-23 This book provides a readable and thought-provoking analysis of the issues surrounding nuclear fuel reprocessing and fast-neutron reactors, including discussion of resources, economics, radiological risk and resistance to nuclear proliferation. It describes the history and science behind reprocessing, and gives an overview of the status of reprocessing programmes around the world. It concludes that such programs should be discontinued. While nuclear power is seen by many as the only realistic solution to the carbon emission problem, some national nuclear establishments have been pursuing development and deployment of sodium-cooled plutonium breeder reactors, and plutonium recycling. Its proponents argue that this system would offer significant advantages relative to current light water reactor technology in terms of greater uranium utilization efficiency, and that separating out the long-lived plutonium and other transuranics from spent fuel and fissioning them in fast reactors would greatly reduce the duration of the toxicity of radioactive waste. However, the history of efforts to deploy this system commercially in a number of countries over the last six decades has been one of economic and technical failure and, in some cases, was used to mask clandestine nuclear weapon development programs. Covering topics of significant public interest including nuclear safety, fuel storage, environmental impact and the spectre of nuclear terrorism, this book presents a comprehensive analysis of the issue for nuclear engineers, policy analysts, government officials and the general public. Frank von Hippel, Jungmin Kang, and Masafumi Takubo, three internationally renowned nuclear experts, have done a valuable service to the global community in putting together this book, which both historically and comprehensively covers the “plutonium age” as we know it today. They articulate in a succinct and clear manner their views on the dangers of a plutonium economy and advocate a ban on the separation of plutonium for use in the civilian fuel cycle in view of the high proliferation and nuclear-security risks and lack of economic justification. (Mohamed ElBaradei, Director General, International Atomic Energy Agency (1997-2009), Nobel Peace Prize (2005)) The 1960s dream of a ‘plutonium economy’ has not delivered abundant low-cost energy, but instead has left the world a radioactive legacy of nuclear weapons proliferation and the real potential for nuclear terrorism. Kang, Takubo, and von Hippel explain with power and clarity what can be done to reduce these dangers. The governments of the remaining countries whose nuclear research and development establishments are still pursuing the plutonium dream should pay attention.” (Senator Edward Markey, a leader in the US nuclear-disarmament movement as a member of Congress since 1976) The authors have done an invaluable service by putting together in one place the most coherent analysis of the risks

associated with plutonium, and the most compelling argument for ending the practice of separating plutonium from spent fuel for any purpose. They have given us an easily accessible history of the evolution of thinking about the nuclear fuel cycle, the current realities of nuclear power around the world and, arguably most important, a clear alternative path to deal with the spent fuel arising from nuclear reactors for decades to centuries to come. (Robert Gallucci, Chief US negotiator with North Korea (1994); Dean, Georgetown University School of Foreign Service (1996-2009); President, MacArthur Foundation (2009-2014))

Evolution of Global Electricity Markets Fereidoon Sioshansi, 2013-06-10 Get the latest on rapidly evolving global electricity markets direct from the scholars and thought leaders who are shaping reform. In this volume, dozens of world-class experts from diverse regions provide a comprehensive assessment of the relevant issues in today's electricity markets. Amid a seething backdrop of rising energy prices, concerns about environmental degradation, and the introduction of distributed sources and smart grids, increasingly stringent demands are being placed on the electric power sector to provide a more reliable, efficient delivery infrastructure, and more rational, cost-reflective prices. This book maps out the electric industry's new paradigms, challenges and approaches, providing invaluable global perspective on this host of new and pressing issues being investigated by research institutions worldwide. Companies engaged in the power sector's extensive value chain including utilities, generation, transmission & distribution companies, retailers, suppliers, regulators, market designers, and the investment & financial rating community will benefit from gaining a more nuanced understanding of the impacts of key market design and restructuring choices. How can problems be avoided? Why do some restructured markets appear to function better than others? Which technological implementations represent the best investments? Which regulatory mechanisms will best support these new technologies? What lessons can be learned from experiences in Norway, Australia, Texas, or the U.K.? These questions and many more are undertaken by the brightest minds in the industry in this one comprehensive, cutting-edge resource. - Features a unique global perspective from more than 40 recognized experts and scholars around the world, offering opportunities to compare and contrast a wide range of market structures - Analyzes how the implementation of existing and developing market designs impacts real-world issues such as pricing and reliability - Explains the latest thinking on timely issues such as current market reform proposals, restructuring, liberalization, privatization, capacity and energy markets, distributed and renewable energy integration, competitive generation and retail markets, and disaggregated vs. vertically integrated systems

The 22nd International Conference on Information Technology-New Generations (ITNG 2025) Shahram Latifi, 2025-05-08 This book covers technical contributions that have been submitted, reviewed and presented at the 22nd annual event of International conference on Information Technology: New Generations (ITNG) The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security and health care are among

topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics.

India-Korea Connections in the Indo-Pacific Jagannath Panda, Choong Yong Ahn, 2025-02-18 India-Korea Connections in the Indo-Pacific presents multidimensional aspects of the Special Strategic Relationship between the Republic of Korea (ROK) and India, ranging from security, diplomacy, trade and FDI, and people-to-people exchanges. It analyses the India-Korea partnership and its strategic implications and potential in the Indo-Pacific. Bringing together experts from both India and the ROK, this book situates the partnership in the context of the current geopolitical landscape in the Indo-Pacific, particularly the increasingly intensifying US-China rivalry and the post-pandemic and geo-economic fragmentation caused by the Russian invasion of Ukraine. In this context, the chapters explore how the ROK and India as middle powers can strengthen the bilateral relationship between India and ROK and then work together within a host of existing minilateral and multilateral architectures in the Indo-Pacific for a rule-based international order embracing security and diplomacy, supply chain resilience, and cross-border FDI and trade cooperation as evident in Quad, IPEF, RCEP, CPTPP, DEPA. This book is a unique collaboration between experts across various domains from both countries, and it presents a new take on the India-ROK bilateral relationship as a middle power axis in the Indo-Pacific. Presenting action-oriented policy recommendations for ROK and India to pursue an upgradation of the existing ROK-India Special Strategic Partnership, this book will be of interest to researchers in the fields of Asian/Indo-Pacific studies, international relations and political science, looking to understand the India-Korea partnership and its strategic implications and potential in the Indo-Pacific, and policy analysts and professionals working in think tanks and research institutions, focused on foreign and security dynamics in the Indo-Pacific.

The Carbon Chain in Carbon Dioxide Industrial Utilization Technologies Dariusz Wawrzyńczak, Izabela Majchrzak-Kucęba, Covadonga Pevida, Giuseppe Bonura, Rita Nogueira, Marcello de Falco, 2022-12-26 A shift towards implementation of renewable energy has disadvantages, such as power availability, storage capacity, and accompanying costs, and therefore the potential of clean fossil fuel technologies to ensure the stability of electricity generation needs to be reconsidered until these challenges will be overcome. These clean technologies can help prevent the greenhouse effect and, at the same time, guarantee energy security, as coal is a widespread, price-stable raw material that is available in large quantities. This book focuses on the carbon chain, starting from the formation of CO₂, through its capture, possible cleaning, to the production of useful products such as dimethylether, methanol, and carbonated cement prefabricates. The comprehensive case study presents the research results of an international team established within the CCS-CCU technology for carbon footprint reduction using bio-adsorbents (BIOCO₂) project.

The Routledge Handbook of Europe-Korea Relations Nicola Casarini, Antonio Fiori, Nam-Kook Kim, Jae-Seung Lee, Ramon Pacheco Pardo, 2021-12-27 The Routledge Handbook of Europe-Korea Relations provides a comprehensive overview of the changing dynamics in relations between Europe and Korea, provided by leading experts in the field. Informed by high-quality academic research and key trilateral data and statistics, this book brings scope, balance, and depth, with wide-ranging coverage examining the history of Europe-Korea relations, the Cold War, contemporary Europe-Korea and Europe-North Korea relations, Europe and inter-Korea relations within the regional context, and relations between European countries and the Korea. Through this approach, it increases awareness of the extent and intensity of the multi-faceted and multi-layered connections between the Europe and Korea. Finally, it proposes a way forward for a future relationship between Europe and the Koreas. As a key reference point, for advanced-level students, researchers, policy-makers and journalists producing, and consuming, new material in the area and beyond, it provides an essential understanding of both the historical backdrop to, and the current crisis in, this troubled peninsula. This Handbook will be an essential reference for scholars, students, researchers and practitioners interested and working in the fields of Asian Politics/ Studies, EU Politics/Studies, European Politics/Studies, Korean Politics/Studies and International Relations. The Routledge Handbook of Europe-Korea Relations is part of the mini-series Europe in the World Handbooks examining EU-regional relations.

Faith-Integrated Being, Knowing, and Doing Sarinah Lo, 2020-08-31 In this holistic study of the integration of faith and learning, Dr. Sarinah Lo challenges the Western tendency to privilege knowing over being and doing. In the context of Indonesian higher education, Dr. Lo addresses the cognitive, affective, spiritual, relational, and vocational aspects of human nature. She demonstrates that effective integration of faith and learning must reach beyond the academic disciplines to address the formation of a Christian perspective in all areas of life, thought, and practice. Utilizing in-depth interviews and qualitative analysis, Dr. Lo's field research explores the specific challenges facing Christian faculty in Indonesia, where the rise of radical Islam and the pressure to conform to state ideology raise unique questions about the nature of faith-learning integration. The first study of its kind, this is an excellent resource for educators wanting to think more broadly about what it means to follow Christ in the classroom, pushing beyond Western models of integration to embrace the more holistic approach of faith-integrated being, knowing, and doing.

Handbook of Evidence-Based Prevention of Behavioral Disorders in Integrated Care William O'Donohue, Martha Zimmermann, 2021-12-14 This handbook is a comprehensive, authoritative and up-to-date source on prevention technologies specifically for integrated care settings. It covers general issues related to prevention including the practical issues of

financing, and staffing, and a general introduction to the advantages of prevention efforts. It covers a range of behavioral health disorders using an approach that is most relevant to the practitioner: it provides basic definitions, and describes the specific roles of both the primary care provider (PCP) and the behavioral care provider (BCP) as well as specific resources presented in a stepped care model. Stepped care has been used successfully in medical settings. Adapted to behavioral health settings, It allows the clinician and the patient to choose treatments that are tailored to specific levels of intensity. This handbook is an interdisciplinary resource useful for classes in integrated care as well as for clinicians employed in in these settings.
