Oxford Dictionary of Quotations Elizabeth Knowles, 2014-09-18 The first edition of the Oxford Dictionary of Quotations was published in 1941 and for over 70 years this bestselling book has remained unrivalled in its coverage of quotations past and present. The eighth edition is a vast treasury of wit and wisdom spanning the centuries and providing the ultimate answer to the question, 'Who said that?' Find that half-remembered line in a browser's paradise of over 20,000 quotations, comprehensively indexed for ready reference. Lord Byron may have taken the view: 'I think it great affectation not to quote oneself', but for the less self-centred the Oxford Dictionary of Quotations provides a quote for every occasion from the greatest minds of history and from undistinguished characters known only for one happy line. Drawing on Oxford's unrivalled dictionary research programme and unique language monitoring, over 700 new quotations have been added to this eighth edition from authors ranging from St Joan of Arc and Coco Chanel to Albrecht Dürer and Thomas Jefferson. New sayings from across the ages include 'It would not be better if things happened to men just as they wish' (the classical writer Heraclitus), 'Fight on, and God will give the Victory' (the suffragette Emily Wilding Davison), and 'The future is already here--it's just not evenly distributed' (the writer William Gibson).

The Invention of News Andrew Pettegree,2014-02-01 “A fascinating account of the gathering and dissemination of news from the end of the Middle Ages to the French Revolution” and the rise of the newspaper (Glenn Altschuler, The Huffington Post). Long before the invention of printing, let alone the daily newspaper, people wanted to stay informed. In the pre-industrial era, news was mostly shared through gossip, sermons, and proclamations. The age of print brought pamphlets, ballads, and the first news-sheets. In this groundbreaking history, renowned historian Andrew Pettegree tracks the evolution of news in ten countries over the course of four centuries, examining the impact of news media on contemporary events and the lives of an ever-more-informed public. The Invention of News sheds light on who controlled the news and who reported it; the use of news as a tool of political protest and religious reform; issues of privacy and titillation; the persistent need for news to be current and for journalists to be trustworthy; and people’s changing sense of themselves and their communities as they experienced newly opened windows on the world. “This expansive view of news and how it reached people will be fascinating to readers interested in communication and cultural history.” —Library Journal (starred review)

Famous Lines Robert Andrews, 1997 This scientific detective story is the first book which explains clearly the science used by paleontologists, and the new, cutting-edge techniques that led to the discovery of Seismosaurus, the longest dinosaur yet known--and possibly the largest land animal to have ever lived. Gillette's first-person account of the project answers the most frequently asked questions about Seismosaurus: How was it discovered? How do we know it is a new species? How did it die? Part catalogue of the workings of paleontological science in the 1990s, the book also illustrates the exciting collaboration between Gillette, the chemists and physicists who helped to reconstruct Seismosaurus.
