Craft Weed, with a new preface by the author Ryan Stoa, 2024-04-02 How the future of post-legalization marijuana farming can be sustainable, local, and artisanal. What will the marijuana industry look like as legalization spreads? Will corporations sweep in and create Big Marijuana, flooding the market with mass-produced weed? Or will marijuana agriculture stay true to its roots in family farming, and reflect a sustainable, local, and artisanal ethic? In *Craft Weed*, Ryan Stoa argues that the future of the marijuana industry should be powered by small farms—that its model should be more craft beer than Anheuser-Busch. To make his case for craft weed, Stoa interviews veteran and novice marijuana growers, politicians, activists, and investors. He provides a history of marijuana farming and its post-hippie resurgence in the United States. He reports on the amazing adaptability of the cannabis plant and its genetic gifts, the legalization movement, regulatory efforts, the tradeoffs of indoor versus outdoor farms, and the environmental impacts of marijuana agriculture. To protect and promote small farmers and their communities, Stoa proposes a Marijuana Appellation system, modeled after the wine industry, which would provide a certified designation of origin to local crops. A sustainable, local, and artisanal farming model is not an inevitable future for the marijuana industry, but *Craft Weed* makes clear that marijuana legalization has the potential to revitalize rural communities and the American family farm. As the era of marijuana prohibition comes to an end, now is the time to think about what kind of marijuana industry and marijuana agriculture we want. *Craft Weed* will help us plan for a future that is almost here.

Cannabis Medicinal introdução ao cultivo Sergio Vidal, 2015-07-13 O livro foi escrito para atender uma lacuna existente na literatura brasileira a respeito da planta *Cannabis sativa*. *Cannabis Medicinal - Introdução ao Cultivo Indoor* é o primeiro

livro em português a respeito do tema e é fruto de uma extensa pesquisa de revisão bibliográfica. Osmose, transpiração, respiração, pH, dióxido de carbono, condutividade elétrica, fotossíntese, clonagem, floração e lúmens, são apenas alguns exemplos dos temas discutidos na obra. A atual Lei 11.343/2006, Lei sobre drogas, prevê que a Agência Nacional de Vigilância Sanitária - ANVISA - pode emitir uma autorização especial para que estabelecimentos possam cultivar e preparar a Cannabis, desde que exclusivamente para fins medicinais e/ou de pesquisa científica. O livro trata sobre esses e diversos outros assuntos do interesse de pessoas que trabalhem em estabelecimentos autorizados legalmente a cultivar cannabis, ou de pesquisadores ou leigos no assunto, que pretendam ampliar seus conhecimentos sobre a planta. Inclui um capítulo no qual são discutidos todos os procedimentos necessários um estabelecimento fazer o requerimento da autorização especial para o plantio e utilização da cannabis e derivados. Vitamin N Richard Louv, 2016-04-12 From the author of the New York Times bestseller that defined nature-deficit disorder and launched the international children-and-nature movement, Vitamin N (for “nature”) is a complete prescription for connecting with the power and joy of the natural world right now. Perfect for fans of The Anxious Generation. 500 activities for children and adults Dozens of inspiring and thought-provoking essays Scores of informational websites Down-to-earth advice In his landmark work Last Child in the Woods, Richard Louv was the first to bring widespread attention to the alienation of children from the natural world, coining the term nature-deficit disorder and outlining the benefits of a strong nature connection--from boosting mental acuity and creativity to reducing obesity and depression, from promoting health and wellness to simply having fun. That book “rivaled Rachel Carson’s Silent Spring” (the Cincinnati Enquirer), was “an absolute must-read for parents” (the Boston Globe), and “an inch-thick caution against raising the fully automated child” (the New York Times). His follow-up book, The Nature Principle, addressed the needs of adults and outlined a “new nature movement and its potential to improve the lives of all people no matter where they live” (McClatchy Newspapers). Vitamin N is a one-of-

a-kind, comprehensive, and practical guidebook for the whole family and the wider community, including tips not only for parents eager to share nature with their kids but also for those seeking nature-smart schools, medical professionals, and even careers. It is a dose of pure inspiration, reminding us that looking up at the stars or taking a walk in the woods is as exhilarating as it is essential, at any age. Richard Louv's new book, *Our Wild Calling*, is available now.

Cannabis Ernest Small, 2016-10-14 Cannabis sativa is best known as the source of marijuana, the world's most widely consumed illicit recreational drug. However, the plant is also extremely useful as a source of stem fiber, edible seed oil, and medicinal compounds, all of which are undergoing extremely promising research, technological applications, and business investment. Indeed, despite its capacity for harm as a recreational drug, cannabis has phenomenal potential for providing new products to benefit society and for generating extensive employment and huge profits. Misguided policies, until recently, have prevented legitimate research on the beneficial properties of cannabis, but there is now an explosion of societal, scientific, and political support to reappraise and remove some of the barriers to usage. Unfortunately, there is also a corresponding dearth of objective analysis. Towards redressing the limitation of information, *Cannabis: A Complete Guide* is a comprehensive reference summarizing botanical, business, chemical, ecological, genetic, historical, horticultural, legal, and medical considerations that are critical for the wise advancement and management of cannabis in its various forms. This book documents both the risks and benefits of what is indisputably one of the world's most important species. The conflicting claims for medicinal virtues and toxicological vices are examined, based mainly on the most recent authoritative scientific reviews. The attempt is made consistently to reflect majority scientific opinion, although many aspects of cannabis are controversial. Aside from the relevance to specialists, the general public should find the presentation attractive because of the huge interest today in marijuana. Unfortunately, society has become so specialized and compartmentalized that most people have limited appreciation of the importance of science to their lives, except when a topic like marijuana becomes sensationalized. This review of cannabis can serve as a vehicle for public education in the realm of science and technology. Indeed, towards the goal of disseminating the important information in this book to a wide audience, the presentation is user-friendly, concise, and well-illustrated in the hope that non-specialists will find the topics both informative and entertaining.
