*Assessment of Shark Sighting Rates by Aerial Beach Patrols* William David Robbins,Victor M. Peddemors,Steven James Kennelly,2012 Aerial surveys are a recognised technique to identify the presence and abundance of marine animals. However, the capability of aerial observers to reliably sight coastal sharks has not been assessed, nor have differences in sighting rates between aircraft types been examined. In this study we assessed the ability of fixed-wing and helicopter observers to sight 2.5 m artificial shark analogues constructed of marine ply--Executive summary.

*The Mammoth Book of Shark Attacks* Alex MacCormick,2013-11-07 The biggest-ever selection of first-hand accounts and news reports of shark attacks, both recent and historical, shows how sharks are masters of the ocean and how we enter their domain at our own risk. Think you're safe in the Med? Read about the Great Whites that thrive near holiday beaches. Think you're safe in large groups? Read about the sinking of the USS Indianapolis in 1945 when hundreds of sailors floated for days in shark-infested waters, being picked off one-by-one. Think you're safe at home? Read about the 69-year-old man, taking his regular evening swim, jumping off his backyard dock straight into the mouth of a bull shark. Many more extraordinary and gruesome accounts, including the shark-boat skipper who slit open the belly of a 360-kg tiger shark only to have a human head, pelvis, and arm come tumbling out, provide horrific and moving tales of shark encounters. The courage of survivors and those who have risked their lives to save shark attack victims is truly inspirational. Where can you find sharks? Features on different shark species with illustrations, fact boxes and maps show where they lurk around the world. Also included are a selection of full-colour photographs and special sections on the life cycle of a shark, how to avoid a shark attack and how to survive one.

**Shark Attacks of the Jersey Shore** Patricia Heyer,Robert Heyer,2020-08-17 Every summer, thousands flock to the Jersey Shore for its beaches and boardwalks, but lurking in the depths beyond is a historic threat to tranquility. Dozens of shark attacks and interactions have occurred throughout Jersey Shore history that reveal bravery, heartbreak and the hubris

of man. A boy paid a gruesome price for teasing a trapped shark in the first recorded attack in 1842. The three bloody attacks of 1960 left one man's limb amputated. The horrific summer of 1916 included seven attacks in a two-week span and crafted the caricature of the killer shark that remains in popular culture today. Authors Patricia and Robert Heyer dive into the history of when two apex predators, man and shark, cross paths on the shores of New Jersey.

**The Shark Attack Files** Jeff Klittenberg, University of Florida, 2016-11-14 The University of Florida has an ambitious goal: to harness the power of its faculty, staff, students, and alumni to solve some of society's most pressing problems and to become a resource for the state of Florida, the nation, and the world. In 1958, a panel funded by the Office of Naval Research initiated the formation of the International Shark Attack File, the first comprehensive documentation of shark attacks on a global and historical level. In 1988, the file was transferred to the Florida Museum of Natural History at the University of Florida. It is part of the Florida Program for Shark Research, directed by George H. Burgess, the planet's expert on shark attacks, and staffed by a world-renowned team of research scientists and educators. Travel the globe with Burgess, the Sherlock Holmes of shark attacks, as he studies mauled remains and the scars of the lucky survivors. His most famous case took him to an idyllic Red Sea resort where panic had set in after five attacks occurred in a single week. The attacks were carried out by Oceanic White Tips and a Mako, deep-water species that had no business being so close to the beach. Following the clues--dive-boat operators feeding sharks by hand to entertain tourists, the disappearance of the yearly tuna catch, and the dead sheep New Zealand cargo companies had been tossing overboard--Burgess solves the mystery of the shark attacks for Egyptian tourism officials and offers a list of best practices. But not all cases end with an easy prescription. In St. Petersburg Beach, Florida, he visits a recent shark-attack victim, bitten just off her dock on Boca Ciega Bay. While the victim would prefer to forget the fateful day the sharp-toothed jaws of the Bull Shark latched onto her leg just below the knee, Burgess gently coaxes the story from her. It will go in the file, to educate other shark researchers and educators and help us better understand the world's most feared predator. The stories chronicled in Gatorbytes span all colleges and units across the UF campus. They detail the far reaching impact of UF's research, technologies, and innovations--and the UF faculty members dedicated to them. Gatorbytes describe how UF is continuing to build on its strengths and extend the reach of its efforts so that it can help even more people in even more places.

**Dr. Beach's Survival Guide** Stephen P. Leatherman, 2008-10-01 Here, from the nation's most renowned beach expert, is the first complete guide to beach safety. Stephen P. Leatherman (a.k.a. Dr. Beach) introduces the gamut of beach hazards—from sharks to rip currents to jellyfish—revealing which dangers should be of greatest concern and how best to minimize their risks. His scientifically sound advice, interspersed with fascinating facts and anecdotes, makes this book a perfect reference for the millions of travelers and vacationers who visit the ocean shore every year. Practical answers to these intriguing questions and more: • Which U.S. beach records the most shark attacks each year? • Which species of shark

is the most dangerous to people? • Why are rip currents the most deadly beach threat? • How can rips be avoided? • What should you do if caught in a rip? • Can lightning strikes at the beach be predicted? • Is a stingray dangerous? • When is ocean water pollution likely to be worst? • What types of waves are threatening and how can they be detected? • What is the danger of a red tide? • How can swimmers avoid contact with jellyfish?

Shark Attacks Alex MacCormick, 2003 Since 1990 there have been over 350 shark attacks worldwide, of which more than 40 were fatal, while survivors often suffer lifelong damage both physical and mental. This book provides first-hand accounts and news reports of over 250 shark attacks.

Close to Shore Michael Capuzzo, 2002-05-21 Combining rich historical detail and a harrowing, pulse-pounding narrative, *Close to Shore* brilliantly re-creates the summer of 1916, when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916 a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake--and, incredibly, a farming community eleven miles inland--the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry, press and politicians, and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man (and set out to prove it); Museum of Natural History ichthyologist John Treadwell Nichols, faced with the challenge of stopping a mythic sea creature about which little was known; and, most memorable, the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written, *Close to Shore* brings to life a breathtaking, pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking, pivotal moment in American history with startling immediacy.

*Shark Attacks of the Twentieth Century* Ralph S. Collier, 2003 This is the single most historically valuable book ever written on the subject of Pacific Coast shark attacks. Through bone-chilling accounts in victims' own words, never before published photographs, and detailed maps and charts of attack locations, this book accurately chronicles every known unprovoked shark attack that occurred along the Pacific Coast of North America during the entire Twentieth Century. The author's examination of wound characteristics, recurring locations, and the curious phenomenon of attacks on inanimate objects afford astonishing insights into why sharks attack. These insights form the foundation for his safety recommendations

to specific ocean user groups. Based on 40 years' of research, this book will be of inestimable value to scientists, researchers and educators, as well as anyone that might venture into the waters off the Pacific Coast. The understanding gained from this book will temper fears with knowledge and provide the reader with clear and specific information that may easily make the difference between life and death.

Shark Attacks of New York Patricia Heyer, Robert Heyer, 2021-08-02 New York's crowded beaches can come to halt with the shout of a single word: shark! The shores of Long Island and Staten Island and the waters surrounding Manhattan have had more than thirty shark attacks recorded since the days of New Amsterdam. Legend has it that Antony Van Corlear, Peter Stuyvesant's trusted deputy, was killed by a shark crossing Spuyten Duyvil Creek while blowing his famed trumpet. In the summer of 1916, after a series of bloody encounters along the Jersey Shore, sharks terrorized beachgoers of Sheepshead Bay, frightening the entire region. Two incidents on Fire Island in 2018 within mere hours and miles of each other involved a twelve-year-old and a thirteen-year-old, striking fear in the hearts of parents. Authors Patricia and Robert Heyer chart the history of New York's shark attacks.

**Silent Came the Monster** Amy Hill Hearth, 2023

*Shark Bites* Greg Ambrose, 1996 16 close encounters with the ocean's most feared predator.

*Shark Attacks* Alex MacCormick, 2025-06-25 More horrifying than Jaws-- because it's true! Since 1990 there have been 283 shark attacks worldwide--40 of which were fatal... In the past 15 years, reports of shark attacks have substantially increased... Over half the attacks occur in water no deeper than five feet... Believe it or not, shark attacks are still a very real threat to humans. These unspeakably bloody encounters happen in shallow water, in safe areas, to people just like you-- people who thought it could never happen to them. HONG KONG, 1995: A forty-five-year-old woman swimming in shallow water with fifty other people has one leg and one arm ripped off by the shark--she dies before reaching the hospital. CALIFORNIA, 1993: A man snorkeling with friends is swallowed headfirst halfway down his body--luckily, the shark spits him back out with only bite wounds. AUSTRALIA, 1993: A professional diver and mother of five is literally torn in half in front of her horrified family by a fifteen-foot great white shark. HAWAII, 1991: Two vacationing friends out for a swim suddenly see a shark the size of a car swim by. After one of the women begins thrashing in panic, the shark attacks and kills her--her body is later recovered with several limbs missing. Read on for more blood-chilling accounts of people who fell prey to...SHARK ATTACKS.

*Shark!* H C Stuart Professor Emeritus Robert Reid, PhD, Robert Reid, 2011-03-04 SHARK! The cry that strikes fear into the hearts of beach lovers around the world. It carries a chill of terror, that death is nearby and waiting. Or injuries so shocking that the mind recoils from the thought. This book chronicles shark attacks both on Australia's fatal shores and overseas. It also records miraculous escapes - some so bizarre they defy belief, and some that display extraordinary courage

in the face of extreme peril. Robert Reid interviews famous shark hunters and other adventurers who speak for the first time about their dangerous encounters with these fearsome predators. Reid investigates the phenomenon of the so-called 'rogue' sharks, those that stalk and kill humans in numbers, in the same place, at the same time. These are gripping stories that will both fascinate and frighten, stories that will take the reader into the realm of these strange but terrible creatures. They have ruled the oceans with ruthless efficiency for more than 400 million years. They are the silent killers of the deep.

**What Were the Shark Attacks of 1916?** Nico Medina, Who HQ, 2024-04-09 The panic-filled summer of 1916, when multiple deadly shark attacks shocked the nation, is chronicled in this gripping addition to the New York Times Best-Selling What Was? series. On July 1, 1916, witnesses watched in horror as twenty-eight-year-old Charles Vansant was attacked and killed by a shark in shallow water off Beach Haven, New Jersey—the first recorded shark attack in American history. Scientists claimed a shark could not be responsible, but more deadly attacks soon followed along the Jersey Shore and up the freshwater Matawan Creek, setting off a nationwide panic that led the White House to declare a “War on Sharks.” In this illustrated book, which features 16 pages of black-and-white photographs, readers will learn about the likely culprit (or culprits) in the attacks—the great white shark and the bull shark—and how the bloody summer of 1916 would change how people viewed sharks forever.

*Sharks in the Shallows* W. Clay Creswell, 2021-06-14 A detailed account of over one hundred shark-related incidents on the coast of the Carolinas from a shark-bite investigator Powerful and mysterious, sharks inspire both fascination and fear. Worldwide, oceans are home to some five-hundred species, and of those, fifty-six are known to reside in or pass through the waters off the coast of both North and South Carolina. At any given time, waders, swimmers, and surfers enjoying these waters are frequently within just one-hundred feet of a shark. While it's unnerving to know that sharks often swim just below the surface in the shallows, W. Clay Creswell, a shark-bite investigator for the Shark Research Institute's Global Shark Attack File, explains that attacks on humans are extremely rare. In 2019 the International Shark Attack File confirmed sixty-four unprovoked attacks on humans, including three in North Carolina and one in South Carolina. While acknowledging that they pose real dangers to humans, Creswell believes the fear of sharks is greatly exaggerated. During his sixteen-year association with the Shark Research Institute, he has investigated more than one hundred shark-related incidents and has maintained a database of all shark-human encounters along the Carolina coastlines back to 1817. Creswell uses this data to expose the truth and history of this often-sensationalized topic. Beyond the statistics related to attacks in the Carolina waters, *Sharks in the Shallows* offers a history of shark-human interactions and an introduction to the world of shark attacks. Creswell details

the conditions that increase a person's chances of an encounter, profiles the three species most often involved in attacks, and reveals the months and time of day with the highest probability of an encounter. With a better understanding of sharks' responses to their environment, and what motivates them to attack humans, he hopes people will develop a greater appreciation of the invaluable role sharks play in our marine environment.
