Africana Religion in the Digital Age Margarita Simon Guillory,2024-12-27 This book diversifies the fields of digital religion studies and Africana religious studies by considering the nuanced intersections between digital technologies and the religious experiences of African Americans. While Christianity is a continuous marker of religious identity for many African Americans, this digital approach to examining Africana religion in the US uncovers other non-Christian esoteric traditions that have often been marginalized within academia. The book explores the diverse ways that African Americans employ the Internet, social media, human enhancement technologies, and gaming to construct multidimensional modes of religious identities. It also considers the ways that Africana religious practitioners employ digital platforms to both complement and disrupt religious authority. Ultimately, the book establishes Africana religious experiences as viable entry points in the scholarly engagement of religion in the digital age. As such, it will be a key resource for scholars of Religious Studies, Africana Religious and Esoteric Studies, Religion and Culture and Religion and Sociology.

Central Park in the Dark Marie Winn, 2008-06-24 Love and loss, life and death, among the nighttime creatures of the city that never sleeps Like her bestseller *Red-Tails in Love*, Marie Winn's *Central Park in the Dark* explores a once-hidden world in a series of interlocking narratives about the extraordinary denizens, human and animal, of an iconic American park. Her beguiling account of a city's lakes and woodlands at night takes the reader through the cycle of seasons as experienced by nocturnal active beasts (raccoons, bats, black skimmers, and sleeping robins among them), insects (moths, wasps, fireflies, crickets), and slugs (in all their unexpected poetical randiness). Winn does not neglect her famous protagonists Pale Male and Lola, the hawks that captivated readers years ago, but this time she adds an exciting narrative about thirty-eight screech owls in Central Park and their lives, loves, and tragedies there. An eye-popping amount of natural history is packed into this entertaining book—on bird physiology, spiders, sunsets, dragonflies, meteor showers, and the nature of darkness. But the human drama is never forgotten, for Central Park at night boasts a floating population not only of lovers, dog walkers, and policemen but of regulars young and old who, like Winn, hope to unlock the secrets of urban nature. These “night people” are drawn into a peculiar kind of intimacy. While exploring the astonishing variety of wildlife in the city park, they end up revealing more of their inner lives than they expected.

And sometimes, just sometimes, it was possible to step through. The stories in this illustrated edition have been reimagined by an extraordinary team of writers, and each appears alongside a Welsh-language translation.
