The Black Death, 1346-1353 Ole Jørgen Benedictow, 2004 Benedictow's findings relating to the mortality caused by the Black Death are based on the study and synthesis of all available demographic studies. Published over the past forty years, most of them in widely dispersed local journals and local histories, this cumulative evidence, astounding in its implications, has gone largely unnoticed. This book makes it indisputably clear that the true mortality rate was far higher than has been previously thought.--BOOK JACKET.
