

Castles Of The North

Robert Liddiard

Castles and Landscapes O. H. Creighton, 2005 This paperback edition of a book first published in hardback in 2002 is a fascinating and provocative study which looks at castles in a new light, using the theories and methods of landscape studies.

Castles in Ireland T.E. McNeill, 2005-08-18 The castles of Ireland are an essential part of the story of medieval Europe, but were, until recently, a subject neglected by scholars. A lord's power and prestige was displayed in the majesty and uniqueness of his castle. The remains of several thousand castles enable us to reconstruct life in Ireland during these crucial centuries. *Castles in Ireland* tells the story of the nature and development of lordship and power in medieval Ireland. Ireland formed the setting to the interplay of the differing roles of competing lordships: English and Irish; feudal European and Gaelic; royal and baronial. Tom McNeill argues that the design of the castles contests the traditional view of Ireland as a land torn by war and divided culturally between the English and Irish.

Castles of Northwest Greece Allan Brooks, 2013-05-01 Northwest Greece has always been relatively isolated from the rest of the Greek mainland and, with the exception of small pockets of intense development on the coast, is still little visited by foreign tourists. Modern guidebooks of necessity concentrate on the few important classical and Hellenistic sites with only passing reference to medieval and later fortifications. Yet these monuments bear witness to the complex later history of the region when Norman, Italian, Angevin, Serbian, Venetian, Turkish and Albanian invaders competed for control. This book is intended to redress this imbalance by providing a detailed guide to a selection of the castles and forts of the area dating from the early Byzantine period to the eve of the First World War.

Greater Medieval Houses of England and Wales, 1300-1500: Volume 1, Northern England Anthony Emery, 1996-11-13 The first of a three-volume survey of greater houses in England and Wales of the 14th and 15th centuries, first published in 1996.

Wigmore Castle, North Herefordshire Stephanie Ratkai, 2017-12-02 Excavations at Wigmore Castle were carried out in 1996 and 1998 as a precursor to repair and consolidation of the castle by English Heritage. The castle had remained the honorial caput of the Mortimer family from the late 11th century through to 1425, an unusually long tenure amongst Marcher lordships. The Mortimer family became increasingly important players in the history of England. Thereafter the Mortimer

inheritance passed to the Dukes of York and from there to the Crown. Evidence of the earliest castle was found during the excavations, including part of a substantial 12th-century timber building, part of which had been used as a kitchen. Here remains of a sequence of hearths, cooking pots and food remains were found. The construction of defences in stone probably began in the 12th century. The effect of conflict on the castle was indicated by the presence of ballista balls, arrowheads, a possible crannequin and fragments of plate armour. A possible period of neglect occurred in the later 14th century but by the 15th century the castle was the scene of renewed activity including the rebuilding of the curtain wall. Dietary evidence and some of the artefacts indicate that there was high-status occupation, in which hunting played an important role that continued throughout the 15th century. By the 16th century the castle fabric was beginning to fall into disrepair and evidence of repairs and modifications were noted. Nevertheless, high-status occupation continued and the castle remained to play an important role as a secondary seat of the Council of the Marches. However, by the early 17th century decline at the castle appears to have been terminal. The castle was now owned by the Harley family and it is they who are credited with the pre-emptive slighting of the castle during the Civil War. The slighting is not evident in the excavated areas, and the area in and around the East Tower appears to have been derelict well before the mid-17th century. Pottery, clay pipe and other artefacts which can definitely be ascribed to the Civil War are few. An oxshoe found in the latest deposits may well be associated with the removal of fallen stone for building elsewhere. Thereafter the castle appears to have been little visited and almost total ruination had set in by the early 18th century. In 1995 the castle was taken into English Heritage Guardianship and has been consolidated and restored as a romantic ruin.

A Guide to the Medieval Castles of England Malcolm Hislop, 2025-08-05 This is a well illustrated expert guide to the castles of England, providing concise accounts of what remains to be seen at each site. Spread across the medieval kingdom of England in a network of often formidable strongholds, castles, like cathedrals, are defining landmarks of their age, dominating their settings, in many cases even to this day. By representing an essential aspect of our history and heritage, the interpretation of which is constantly being revised, they demonstrate the value of Malcolm Hislop's compact, authoritative and well illustrated new guide to English castles. The gazetteer includes an astonishing variety of types, sizes and designs. Individual entries bring out the salient points of interest including historical context, building history and architectural character. The defensive and domestic purposes of these remarkable buildings are explained, as is the way in which their layout and role developed over the course of hundreds of years, from the predominantly earth and timber fortresses of the Normans to the complex stone castles of the later Middle Ages, many of which can be visited today. Hislop's experience as an archaeologist specializing in medieval buildings, castles in particular, as well as his eye for structural detail, ensure that his guide is a necessary handbook for readers who are keen on medieval history and warfare, and for visitors who are looking for an accessible introduction to these monumental relics of England's military past.

English Castles Adrian Pettifer, 1995 A comprehensive and concise guide to all medieval English castles of which something can still be seen today, ranging from the massive keeps which still dominate the landscape to grassy earthworks and Border pele towers, and spanning the centuries from the Norman Conquest to the accession of the Tudors A well-written contribution to the literature on the subject, and will interest both the historically minded tourist and, as a reference book, the scholar. WAR IN HISTORY A comprehensive and concise guide to all medieval English castles of which something can still be seen today, ranging from the massive keeps which still dominate the landscape to grassy earthworks and Border pele towers, and spanning the centuries from the Norman Conquest to the accession of the Tudors. English Castles contains over five hundred main entries in county order, each giving a brief history and description of the castle. A short introduction supplies the historical background to the explosion of castle-building in the middle ages, and there is a glossary covering all aspects of castles in some detail. There are also full Ordnance Survey map references.

Late Medieval Castles Robert Liddiard, 2016 A collection of the most significant articles in castle studies, with contributions from scholars in history, archaeology, historic buildings and landscape archaeology. The castles of the late medieval period represent some of the finest medieval monuments in Britain, with an almost infinite capacity to fascinate and draw controversy. They are also a source of considerable academic debate. The contents of this volume represent key works in castle scholarship. Topics discussed include castle warfare, fortress customs, architectural design and symbolism, spatial planning and the depiction of castles in medieval romance. The contributions also serve to highlight the diversity of approaches to the medieval castle, ranging from the study of documentary and literary sources, analysis of fragmentary architectural remains and the recording of field archaeology. The result is a survey that offers an in-depth analysis of castle building from the thirteenth to the fifteenth centuries, and places castles within their broader social, architectural and political contexts. Robert Liddiard is Professor of History, University of East Anglia. Contributors: Nicola Coldstream, Charles Coulson, Philip Dixon, Graham Fairclough, P.A. Faulkner, John Goodall, Beryl Lott, Charles McKean, T.E. McNeill, Richard K.

Morris, Michael Prestwich, Christopher Taylor, Muriel A. Whitaker.

An Inventory of the Ancient Monuments in Glamorgan: Volume III - Part 1b: Medieval Secular Monuments the Later Castles from 1217 to the present Royal Commission on the Ancient and Historical Monuments in Wales, 2000 Forty-three castles and fortified sites here described were founded or given their most significant fabric after 1217. They include tower-houses, strong houses, possible castles, and twenty masonry castles ranging from the great Clare works at Caerphilly and Morlais to the small modestly fortified sites at Barry and Weobley, and the exceptional fortified priory at Ewenny. The density and variety of the medieval fortifications in Glamorgan are unrivalled, and their study is enriched by an exceptional range of works on the history and records of a historic county formed by merging the lordships of Glamorgan and Gower. Part la described the early castles and traced their role in the Norman conquest and settlement of the fertile southern lowlands down to 1217, when the Clares inherited Glamorgan. In that year the Welsh had expelled the English from Gower and remained unconquered in the Glamorgan uplands. Gower was soon lost again, and under two redoubtable Clare lords the Glamorgan uplands were appropriated in the mid-13th century and secured in a notable programme of castle works. The castle-building of Earl Richard de Clare (1243-62) and his son, Gilbert, the 'Red Earl' (1263-95), as they achieved this 'second conquest of Glamorgan', foreshadowed the later campaigns of Edward I against Gwynedd. At Caerphilly, above all, Earl Gilbert's castle deserves comparison with the great Edwardian works; it introduced defensive features later to be adopted by King Edward's Savoyard master masons. Gower sites considered include the impressive masonry castles at Oystermouth and

Penrice. A notable ornately arcaded domestic range at Swansea is the only surviving vestige of the chief castle of Gower, which is tentatively described from a variety of records. All the illustrated descriptions incorporate detailed historical accounts. The introductory survey outlines the later descent of Glamorgan and Gower to the end of the 15th century, and along with the sectional preambles it provides general discussion of the sites.
