**Precision agriculture '25** John V. Stafford, 2025-07-08 These edited proceedings contain 181 peer reviewed papers presented at the 15th European Conference on Precision Agriculture, organized by Universitat Politècnica de Catalunya, June 29 - 3 July 2025, in Barcelona, Spain. The papers reflect the wide range of disciplines that impinge on precision agriculture - technology, crop science, soil science, agronomy, information technology, decision support, remote sensing, data analysis and others. Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance and crop management. Sensors now in use in agriculture are generating 'Big Data' leading to the use of machine learning and AI - an increasing challenge for agriculture. Research continues to be necessary and needs to be reported and disseminated to a wide audience. The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers and professionals in agriculture long after the conference has finished.

*Strategies for Sustainable Territorial Development* D'Auria, Anna, Sanchez-Rivas Garcia, Javier, 2025-04-08 Sustainable development has been one of the focal themes in the international debate for several decades now. More recently, with the intervention of local institutions and governments, there has been an increasing awareness of the importance of promoting forms of local development, based on endogenous valuable resources (natural and cultural), leading to the enhancement of the territorial heritage and the emergence of opportunities for growth for all communities due to the spread of new technologies. The territorial heritage includes all the factors that characterize a territory that can be transformed into valuable resources capable of generating competitive advantage, becoming levers of development. It follows that the proper management and enhancement of local resources can represent a source of well-being and growth, both in economic and social terms. The starting point must be the recognition of the heritage present in a territory and the recognition of the value, including potential value. Strategies for Sustainable Territorial Development contributes to the process of raising awareness about the importance of local resources as a lever for sustainable development that can support the territory both in terms of economic growth and in terms of social progress. It is developed based on three trajectories, namely: the recognition and enhancement of the territorial heritage; sustainability as an approach to the use of resources and an objective of development; and innovation as a tool for achieving a correct and rational use of resources. Covering topics such as foreign

trade, industrial parks, and cultural heritage, this book is an excellent resource for government officials, policymakers, sustainability advocates, professionals, researchers, scholars, academicians, and more.

**Polycentric Water Governance in Spain** Nora Schütze,2023-05-25 Increasing irrigation efficiency has been high on the political agenda in Spain for many years. However, the overarching aim to reduce agricultural water consumption has not been met so far. To explore this phenomenon, Nora Schütze investigates processes of coordination between the water and agricultural sector in three Spanish river basins in the context of the EU Water Framework Directive implementation. From the perspective of polycentric governance, she identifies multiple mechanisms which illustrate how and why actors interact in certain ways, and thus shows why environmental aims of the Water Framework Directive remain unachieved.

**La Andalucía vaciada** Francisco José Chaparro Díaz,2023-05-18 Andalucía ha sido una región habitada desde tiempos inmemoriales. Tartessos, fenicios, griegos y romanos han dejado su huella en esta tierra rica en historia y cultura. La presencia musulmana también ha sido fundamental en la configuración de la región, y tras la llegada de los reinos cristianos, Andalucía se ha convertido en un lugar con un patrimonio humano y cultural inigualable. A lo largo de su historia, los habitantes de Andalucía se han visto obligados a emigrar debido a las guerras, las enfermedades, las catástrofes naturales y la relación con la tierra. Este fenómeno migratorio ha sido recurrente poblando y despoblando cíclicamente los distintos rincones de la región. Chaparro Díaz nos muestra en esta obra la realidad de los pueblos y comarcas que en la actualidad se están quedando vacíos, ya que desde mediados del siglo XX el fenómeno de la España vaciada también se ha presentado en Andalucía. ¿Habrá nuevas oportunidades para que logremos revertir esta realidad?

## **PERSPECTIVA JURÍDICA DE LA PLANIFICACIÓN TERRITORIAL EN LA PROVINCIA DE HUELVA** Esther Rando

Burgos,2019-06-02 La obra Perspectiva jurídica de la planificación territorial en la provincia de Huelva aúna el escenario de la provincia desde el punto de vista de la ordenación territorial con el objetivo de abordar los problemas que presenta y configurar soluciones prácticas. Desde la publicación en 1994 de la Ley de Ordenación del Territorio de Andalucía, y pese a sus diferentes modificaciones, sigue presentando algunas lagunas que se extienden a los instrumentos llamados a ofrecer respuesta a la articulación y cohesión territorial del conjunto de Andalucía. En este escenario autonómico, Huelva presenta características muy singulares. Con el necesario referente del Plan de Ordenación del Territorio de Andalucía y el modelo territorial previsto para la provincia, hay que recordar el carácter pionero en el desarrollo de la planificación territorial. Al Plan de Ordenación del Territorio de Doñana (2004), seguiría el Plan de Ordenación del Territorio del Litoral Occidental de Huelva (2006), y apenas dos años más tarde la formulación del Plan de Ordenación del Territorio de la aglomeración urbana de Huelva. Sin embargo, este avance que parecía imparable, ha quedado paralizado durante más de una década. En este contexto, y tomando como referente los planes subregionales, junto al Plan de Ordenación del Territorio de Andalucía y los planes con incidencia en la ordenación del territorio, la obra aborda una descripción en profundidad del presente de la ordenación territorial en la provincia desde su vertiente jurídica. Sin embargo, se muestra todavía más ambiciosa con una mirada al futuro en un momento vital cuando todo hace indicar que Huelva retoma el pulso a la planificación territorial, apuntando las claves que posibiliten entender su problemática real y conformar soluciones que permitan consolidar su territorio y crear unas sólidas bases de futuro, en un territorio capaz de aunar desarrollo y preservación.

## **Governance for Mediterranean Silvopastoral Systems** Teresa Pinto-Correia,Maria Helena Guimarães,Gerardo

Moreno,Rufino Acosta Naranjo,2021-09-30 This book is about the resilience of silvo-pastoral systems now, and in the future. As such, it is about people. The goal is to fill the gap in the knowledge on silvo-pastoral systems and their changing trends, by adding the human dimension, with enough detail to draw inferences about the new governance solutions that are needed to address the multiple challenges faced by silvo-pastoral systems. As such, the book provides knowledge applicable to current and future silvo-pastoral territories in other regions across the world. The volume is divided into three sections: people and institutions, the institutional framework, and governance models. Each section, composed of several chapters, draws on empirical work about the Iberian montado and dehesa as well as from other similar systems in the Mediterranean, both on the northern and on the southern sides, in order to broaden its scope and cover a wider range of situations and examples. Some of the chapters rely more strongly on empirical findings and current experiences, others on a literature review and reflection by the authors over many years working with these systems. The conclusion sums up the most relevant findings from each chapter and discusses how research can progress so that new scientific approaches and evidence can support better adapted governance models of silvopastoral systems to face future challenges. This text will be highly valuable to

university and research institute libraries, academics, policy officials, and stakeholder groups, such as NGOs and sectoral organizations, who wish to better understand the relevance of the human factor and use this knowledge to find sustainable solutions. It will be a central reading for postgraduate students enrolled in rural planning, landscape management and governance, agronomy and forestry, as well as geography and socio-ecology programmes, that have a focus on sustainable land use management and supporting mixed farming systems.

**Aprender para innovar** Elsa del Castillo Mory,Alejandro Flores Castro,2023-02-01 La continua expansión de los negocios hacia nuevos mercados geográficos exige a las empresas multinacionales adaptar las capacidades organizacionales a los cambios en el contexto tecnológico y de mercado. Para cumplir con sus objetivos estratégicos, las decisiones corporativas de las casas matrices determinarán los procesos de transferencia de conocimiento y de tecnología en la interacción entre las distintas sedes. De forma paralela, buscando sinergias internas, la multinacional también generará aprendizajes a partir de su experiencia en cada nuevo mercado e incorporará este nuevo conocimiento a su modelo de negocio multipaís. Esto le permitirá potenciar su oferta de valor. A la luz del análisis de cinco casos de empresas españolas que incursionaron en el mercado latinoamericano y, en particular, en el peruano, se evidencia que el reto de crecer en mercados internacionales demanda de las empresas un continuo aprender para innovar.

El tercero plantea el estudio de prácticas agrícolas bajo condicionantes orográficos, que implican una transformación edáfica para su acondicionamiento, dando lugar a sistemas de terrazas y bancales destinados a la implantación de cultivos agrícolas. El cuarto aborda la estimación y viabilidad económica que conlleva el actuar sobre una explotación agraria para mejorar e implementar las instalaciones, en aras de perseguir una sostenibilidad y adaptarse a la realidad socioeconómica y legislativa. El quinto y último capítulo abarca la normativa que incumbe al establecimiento de las infraestructuras agrarias en un medio rural y las repercusiones medioambientales desprendidas por el hecho de acometerlas.
