Historical Dictionary of Medieval Christian Nubia Richard A. Lobban Jr., 2020-10-20 Medieval Christian Nubia is often a neglected period of medieval African history. Because meaning is determined largely by context this work traces the Greco-Roman, Meroitic and Jewish precursors. The regional, historical and theological schisms within Christianity are also a highlight. The dynamics of the three Nubian kingdoms of Nobatia, Mukurra, and Alwa are the centerpiece of this book that covers mural arts, architecture, and the names of the leading kings and bishops. Another strength of the book is the analysis of the 700-year baqt peace treaty between Christian Nubia and Islamic Egypt; this is considered to be the longest lasting treaty in diplomatic history. The complex transition from Christianity to Islam in the 14th century is analyzed in great personal, political, and military detail. *Historical Dictionary of Medieval Christian Nubia* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 200 cross-referenced entries on politics, economy, foreign relations, religion, and culture of the medieval Nubians. This book is an excellent resource for students, researchers, and anyone wanting to know more about Medieval Christian Nubia.

Historical Dictionary of Ancient and Medieval Nubia Richard A. Lobban, 2003-12-09 The *Historical Dictionary of Ancient and Medieval Nubia* covers the period from the Paleolithic, all the periods of ancient Nubia (Predynastic, Kerma, Dynasty XXV, Napatan, Meroitic, Post-Meroitic) and to the end of medieval Christianity in Nubia (Sudan). This resource focuses on Nubian history through a Nubian perspective, rather than on the more common Egypto-centrism perspective, and the coverage is based on the latest and best archaeological and epigraphic evidence. Newly created maps of the general area and its specific regions and place names and a photospread showing important related features of the region are included. A detailed chronology provides a timeline of historical events, and an introductory narrative shapes the overall history and leads to the main body of the work in the form of a cross-referenced dictionary. The descriptive entries cover the main features of the region in the various periods that are key not only to Nubian events, but also to the important interactions they had with Egypt to the north. Nine appendices and an extensive bibliography conclude this work. Lobban has been teaching Nubian studies in undergraduate classrooms for thirty years, and this book is a product of his hands-on experiences as well as extensive anthropological fieldwork and travel in Sudanese and Egyptian Nubia.

Afterglow Presentacion Valenzuela, 2009-10-13 She was kissed by love She was kissed with love She kissed to love devotedly . . . eternally . Young Blancquita was born in an abbey and was raised by nuns until she was sixteen years old. At her coming of age, she was ordered to leave the sanctuary to find for herself her real vocation in life. She was entrusted by the new Mother Superior of the abbey to a legendary wealthy family who were principal benefactor of the abbey. There, she was thrust into a world of riches testing her faith and morality. Though she lived a life of luxury with this family, she never forgot who she was and what was foremost in her heart and mind: to return to the abbey on her eighteenth birthday to become a nun and to find out about her parents and what really happened to them. Her road back to the abbey was blocked by heartbreaking events that happened in her young life. In the end, she learned about her parentage and was proud to discover that she was the offspring of young true love between two fine people whose young lives were both claimed untimely by death.

Encyclopedia of Coastal Science M. Schwartz, 2006-11-08 Honorable Mention, Award for Excellence in Scholarly and Professional Publishing Maurice Schwartz, Editor of the much acclaimed Encyclopedia of Beaches and Coastal Environments (Hutchinson Ross, 1982) has now brought forth a new volume with a fresh interdisciplinary approach that includes geomorphology, ecology, engineering, technology, oceanography, and human activities as they relate to coasts. Within its covers the Encyclopedia of Coastal Science includes many aspects of the coastal sciences that are only to be found scattered among scientific literature. Being broadly interdisciplinary in its treatment of coasts, the Encyclopedia of Coastal Science features contributions by 245 well known international specialists in their respective fields and is abundantly illustrated with line-drawings and photographs. Not only does this volume offer an extensive number of entries, it also includes various appendices, an illustrated glossary of coastal geomorphology and extensive bibliographic listings. This Encyclopedia thus provides a comprehensive reference work for students, professionals as well as informed lay readers.

Connected Stories Mohamed Meouak, Cristina Puente, 2022-06-06 Concepts such as influence, imitation, emulation, transmission or plagiarism are transcendental to cultural history and the subject of universal debate. They are not mere labels imposed by modern historiography on ancient texts, nor are they the result of a later interpretation of ways of transmitting and teaching, but are concepts defined and discussed internally, within all cultures, since time immemorial, which have yielded very diverse results. In the case of culture, or better Arab-Islamic cultures, we could analyze and discuss endlessly numerous terms that refer to concepts related to the multiple ways of perceiving the Other, receiving his knowledge and producing new knowledge. The purpose of this book evolves around these concepts, and it aims to become part of a very long tradition of studies on this subject that is essential to the understanding of the processes of reception and

creation. The authors analyze them in depth through the use of examples that are based on the well-known idea that societies in different regions did not remain isolated and indifferent to the literary, religious or scientific creations that were developed in other territories and moreover that the flow of ideas did not always occur in only one direction. Contacts, both voluntary and involuntary, are never incidental or marginal, but are rather the true engine of the evolution of knowledge and creation. It can also be stated that it has been the awareness of the existence of multidimensional cultural relations which has allowed modern historiography on Arab cultures to evolve and be enriched in recent decades.

Timeline: Okinawa Stephen A. Mick McClary, 2022-03-31 This book will give you a basic understanding of the origin of Okinawa, its emergence onto the world's stage, and its evolution over the centuries to become the subtropical paradise that we've come to know and love. Having collected so many books and papers about pre-war, wartime and post-war Okinawa, it occurred to me that there is an almost endless array of publications, each offering abundant facts, opinions and uncertainties as to events, dates of events and details of just about every aspect of the principalities, kingdom, province, then finally prefecture of Okinawa-ken including its 27-year interruption under U.S. occupation. There is no way to present a comprehensive volume that covers all aspects of Okinawa's past and present without necessitating the use of a wheelbarrow to move it from one place to the next - it would be that big! This book's content is inspired by and is representative of what I've read and, to a lesser degree what I've researched on the Internet. Some of it is derived from personal experience or observation. If you can't find information on a particular subject, that just means that I haven't experienced it, don't have it in my library or perhaps I do but haven't read it yet.

The Brilliant History of Color in Art Victoria Finlay, 2014-11-01 The history of art is inseparable from the history of color. And what a fascinating story they tell together: one that brims with an all-star cast of characters, eye-opening details, and unexpected detours through the annals of human civilization and scientific discovery. Enter critically acclaimed writer and popular journalist Victoria Finlay, who here takes readers across the globe and over the centuries on an unforgettable tour through the brilliant history of color in art. Written for newcomers to the subject and aspiring young artists alike, Finlay's quest to uncover the origins and science of color will beguile readers of all ages with its warm and conversational style. Her rich narrative is illustrated in full color throughout with 166 major works of art—most from the collections of the J. Paul Getty Museum. Readers of this book will revel in a treasure trove of fun-filled facts and anecdotes. Were it not for Cleopatra, for instance, purple might not have become the royal color of the Western world. Without Napoleon, the black graphite pencil might never have found its way into the hands of Cézanne. Without mango-eating cows, the sunsets of Turner might have lost their shimmering glow. And were it not for the pigment cobalt blue, the halls of museums worldwide might still be filled with forged Vermeers. Red ocher, green earth, Indian yellow, lead white—no pigment from the artist's broad and diverse palette escapes Finlay's shrewd eye in this breathtaking exploration.

China and the Roman Orient Friedrich Hirth,2021-06-17 Similar in size and in duration, the Chinese and the Roman empires ruled half the world's population at the time of their co-existence. But what did they know about each other? In *China and the Roman Orient* Friedrich Hirth uses linguistic, geographical and historical analysis of ancient Chinese records to reconstruct the ancient trade routes used by the Chinese and to show what knowledge they had of the Roman Empire. His careful research on the original Chinese sources also tells us much about the geography, history and commerce of the period. *China and the Roman Orient* quickly established itself as a landmark work. It remains an important and much cited work but is now scarce. This new edition contains a new introduction by leading contemporary scholar Victor Mair, Professor of Chinese Language and Literature at the University of Pennsylvania, USA
