The Empire's of J. G. Ballard David Ian Paddy, 2015-08-25 J. G. Ballard once declared that the most truly alien planet is Earth and in his science fiction he abandoned the traditional imagery of rocket ships traveling to distant galaxies to address the otherworldliness of this world. The Empires of J. G. Ballard is the first extensive study of Ballard's critical vision of nation and empire, of the political geography of this planet. Paddy examines how Ballard's self-perceived status as an outsider and exile, the Sheppertonian from Shanghai, generated an outlook that celebrated worldliness and condemned parochialism. This book brings to light how Ballard wrestled with notions of national identity and speculated upon the social and psychological implications of the post-war transformation of older models of empire into new imperialisms of consumerism and globalization. Presenting analyses of Ballard's full body of work with its tales of reverse colonization, psychological imperialism, the savagery of civilization, estranged Englishmen abroad and at home, and multinational communities built on crime, The Empires of J. G. Ballard offers a fresh perspective on the fiction of J. G. Ballard. The Empires of J.G. Ballard: An Imagined Geography offers a sustained and highly convincing analysis of the imperial and post-imperial histories and networks that shape and energise Ballard's fictional and non-fictional writings. To what extent can Ballard be considered an international writer? What happens to our understanding of his post-war science fictions when they are opened up to the language and logics of post-colonialism? And what creative and critical roles do the spectres of empire play in Ballard's visions of modernity? Paddy follows these and other fascinating lines of enquiry in a study that is not only essential reading for Ballard students and scholars, but for anyone interested in the intersections of modern and contemporary literature, history and politics. (Jeanette Baxter, Anglia Ruskin University) Shanghai made my father. Arriving in England after WW2, he was a person of the world who'd witnessed extremes of human experience, and remained the outsider observing life from his home in Shepperton. 1930s Shanghai, Paris of the East, was a mix of international sophistication and violence, unfettered capitalism and acute poverty, American cars, martinis and Coca Cola, a place marked by death and war. It had a profound influence on my father and his imagination. Dr Paddy's fascinating book explores my father's fiction within an international

context and offers a profound reading of a man who always kept his eyes and mind open to the world. (Fay Ballard)

J. G. Ballard D. Harlan Wilson, 2017-11-10 Prophetic short stories and apocalyptic novels like *The Crystal World* made J. G. Ballard a foundational figure in the British New Wave. Rejecting the science fiction of rockets and aliens, he explored an inner space of humanity informed by psychiatry and biology and shaped by surrealism. Later in his career, Ballard's combustible plots and violent imagery spurred controversy--even legal action--while his autobiographical 1984 war novel *Empire of the Sun* brought him fame. D. Harlan Wilson offers the first career-spanning analysis of an author who helped steer SF in new, if startling, directions. Here was a writer committed to moral ambiguity, one who drowned the world and erected a London high-rise doomed to descend into savagery--and coolly picked apart the characters trapped within each story. Wilson also examines Ballard's methods, his influence on cyberpunk, and the ways his fiction operates within the sphere of our larger culture and within SF itself.

Myths of the Near Future J. G. Ballard, 2000

J. G. Ballard Jeannette Baxter, 2009-02-12 J.G. Ballard is one of the most significant British writers of the contemporary period. His award-winning novels are widely studied and read, yet the appeal of Ballard's idiosyncratic, and often controversial, imagination is such that his work also enjoys something of a cult status with the reading public. The hugely successful cinematic adaptations of *Empire of the Sun* (Spielberg, 1987) and *Crash* (Cronenberg, 1996) further confirm Ballard's unique place within the literary, cultural and popular imaginations. This guide includes new critical perspectives on Ballard's major novels as well as his short stories and journalistic writing covering issues of form, narrative and experimentation. Whilst offering fresh readings of dominant and recurring themes in Ballard's writing, including history, sexuality, violence, consumer capitalism, and urban space, the contributors also explore Ballard's contribution to major contemporary debates including those surrounding post 9/11 politics, terrorism, neo-imperialism, science, morality and ethics.

Out of the Night and Into the Dream Gregory Kent Stephenson, 1991-10-30 The author of *Empire of the Sun* and other acclaimed novels and stories, British science fiction writer J. G. Ballard is here given a penetrating analysis, his work being explored in terms of its internal coherence, its continuity and development, and its mythic and metaphysical aspects. Ballard's fiction is widely considered to be a critique of our secular, rational, technological culture, but this study departs from earlier ones that label him a fatalistic or nihilistic writer obsessed with entropy, devolution, and dissolution in showing him, instead, to be most deeply concerned with the redemption and regeneration of the human psyche. With Ballard's focus so much on visionary perception and mystical transcendence, Gregory Stephenson argues for his placement in the Romantic visionary tradition. A comprehensive examination of Ballard's work, this study traces his output and accomplishments over

four decades, exploring their thematic development. Ballard is considered in relation to a number of British and American writers of the post-World War II era--within and beyond the often too-rigidly applied categorization of science fiction, as well as to poets and novelists of the past.

Atlantic Republic Paul Giles, 2006-11-23 *Atlantic Republic* traces the legacy of the United States both as a place and as an idea in the work of English writers from 1776 to the present day. Seeing the disputes of the Reformation as a precursor to this transatlantic divide, it argues that America has operated since the Revolution as a focal point for various traditions of dissent within English culture. By ranging over writers from Richard Price and Susanna Rowson in the 1790s to Angela Carter and Salman Rushdie at the turn of the twenty-first century, the book argues that America haunts the English literary tradition as a parallel space where ideology and aesthetics are configured differently. Consequently, it suggests, many of the key episodes in British history-parliamentary reform in the 1830s, the imperial designs of the Victorian era, the twentieth-century conflict with fascism, the advance of globalization since 1980-have been shaped by implicit dialogues with American cultural models. Rather than simply reinforcing the benign myth of a 'special relationship', Paul Giles considers how various English writers over the past 200 years have engaged with America for various complicated reasons: its promise of political republicanism (Byron, Mary Shelley); its emphasis on religious disestablishment (Clough, Gissing); its prospect of pastoral regeneration (Ruxton, Lawrence); its vision of scientific futurism (Huxley, Ballard). The book also analyses the complex cultural relations between Britain and the United States around the time of the Second World War, suggesting that writers such as Wodehouse, Isherwood, and Auden understood the United States and Germany to offer alternative versions of the kind of technological modernity that appeared equally hostile to traditional forms of English culture. The book ends with a consideration of ways in which the canon of English literature might appear in a different light if seen from a transnational rather than a familiar national perspective.

Iain Sinclair Brian Baker, 2013-01-18 A clearly written, comprehensive critical introduction to one of the most original contemporary British writers, providing an overview of all of Sinclair's major works and an analysis of his vision of modern London. This book places Sinclair in a range of contexts, including: the late 1960s counter-culture and the 'British Poetry Revival'; London's underground histories; the rise and fall of Thatcherism, and Sinclair's writing about Britain under New Labour; Sinclair's connection to other writers and artists, such as J.G. Ballard, Michael Moorcock and Marc Atkins. This book makes a significant contribution to the growing scholarship surrounding Sinclair's work, offering the first critical text that covers in detail all of Sinclair's work: his poetry, fiction, non-fiction (including his book on John Clare, *Edge of the Orison*), and his film work.

Practice-based Design Research Laurene Vaughan, 2017-01-26 *Practice-Based Design Research* provides a companion to masters and PhD programs in design research through practice. The contributors address a range of models and approaches

to practice-based research, consider relationships between industry and academia, researchers and designers, discuss initiatives to support students and faculty during the research process, and explore how students' experiences of undertaking practice-based research has impacted their future design and research practice. The text is illustrated throughout with case study examples by authors who have set up, taught or undertaken practice-based design research, in a range of national and institutional contexts.

The Woman of the Crowd Daniela Daniele,2000 This book traces the origins of the Postmodern eclectic grammar of linguistic collision back in the Surrealist poetics of ruins. Keeping in mind the images of lost direction in the big city as a central figure in the discussion of both the Modern and Postmodern aesthetics of displacement, Daniele starts comparing the epiphanic encounters of the Baudelairian flâneur in metropolitan Paris - in constant search for the traces of a lost symbolic order - with Breton's enigmatic pursuit of Nadja, the elusive sphinx in the crowd who moves in a mental territory of puzzling condensations and of ineffable objets trouvés. In his visual and written work, Marcel Duchamp was probably the first artist to envision the space of the crowd as a trans-urban, multiple dimension: a cool arena of disjunctive encounters contributing to transform the Surrealist erotic space of desire in a cooler, open field of performance. Deeply influenced by Duchamp's hybrid aesthetics, American Postmodern writers such as Donald Barthelme and Thomas Pynchon, and the performance artist Laurie Anderson, represent metropolis as a geographical incest, as a plural, entropic semiosphere which transcends the notion of urban community to become the tolerant receptacle of an ethnic and discursive multiplicity, an electronic area of linguistic collisions translatable in new fragmented and unfinished narratives. Evoking the assemblages of Abstract Expressionists, the debris of Simon Rodia junk art, and the hybrid language of Postmodern architecture, this neo-Surrealist narrative discourse transforms the epiphanic traces envisioned by the Baudelairian and Bretonian heroes in partial parodies, in enigmatic fragments whose ultimate source transcends the narrator's knowledge. The conceptual strategy which is constitutive of these

texts implicitly asks the puzzled reader to disentangle the entropic plots, immersing him in the midst of a linguistic wilderness, where all opposites - fact and fiction, man and machine, man and female - enigmatically and humorously coexist.

Mythic Thinking in Twentieth-Century Britain M. Sterenberg,2016-06-01 A variety of thinkers used the concept of myth to articulate their anxieties about modernity. By telling the story of mythic thinking in Britain from its origins in Victorian social anthropology to its postwar cultural mainstreaming, this book reveals a yearning for transcendence in an age long assumed to be disenchanting.

The Myths That Made America Heike Paul,2014-08-15 This essential introduction to American studies examines the core foundational myths upon which the nation is based and which still determine discussions of US-American identities today. These myths include the myth of »discovery,« the Pocahontas myth, the myth of the Promised Land, the myth of the Founding Fathers, the melting pot myth, the myth of the West, and the myth of the self-made man. The chapters provide extended analyses of each of these myths, using examples from popular culture, literature, memorial culture, school books, and everyday life. Including visual material as well as study questions, this book will be of interest to any student of American studies and will foster an understanding of the United States of America as an imagined community by analyzing the foundational role of myths in the process of nation building.

From Georges Sorel Georges Sorel,2018-01-16 The prophet of social decadence, the theorist of violence and advocate of the general strike, the critic who stood Marx on his head, Georges Sorel was one of the foremost writers of this century to write extensively on the great importance of the moral aspects of social movements. His reconstruction of socialist ethics established him as one of the most remarkable critics of Marxist thought, and his writings in many aspects anticipated contemporary interpretations. From Georges Sorel, the first of two volumes of Sorel's work, presents his major contributions to social thought articles on Marxism, religion, syndicalism, social myths, the philosophy of history and science, as well as a large and newly translated segment of Reflections on Violence. In his introduction, John Stanley disputes the frequently encountered view of Sorel as a reactionary or extreme rightist, and emphasizes Sorel's attempt to provide Western society with a morality based on labor, struggle, and family life.

Mission AI Haroon Sheikh,Corien Prins,Erik Schrijvers,2023-01-30 This open access book offers a strategic perspective on AI and the process of embedding it in society. After decades of research, Artificial Intelligence (AI) is now entering society at large. Due to its general purpose character, AI will change society in multiple, fundamental and unpredictable ways. Therefore, the Netherlands Scientific Council for Government Policy (WRR) characterizes AI as a system technology: a rare type of technologies that have a systemic impact on society. Earlier system technologies include electricity, the combustion engine and the computer. The history of these technologies provides us with useful insights about what it takes to direct the

introduction of AI in society. The WRR identifies five key tasks to structurally work on this process: demystification, contextualisation, engagement, regulation and positioning. By clarifying what AI is (demystification), creating a functional ecosystem (contextualisation), involving diverse stakeholders (engagement), developing directive frameworks (regulation) and engaging internationally (positioning), societies can meaningfully influence how AI settles. Collectively, these activities steer the process of co-development between technology and society, and each representing a different path to safeguard public values. Mission AI - The New System Technology was originally published as an advisory report for the government of the Netherlands. The strategic analysis and the outlined recommendations are, however, relevant to every government and organization that aims to take up 'mission AI' and embed this newest system technology in our world.
