The Encyclopedia of Christianity Erwin Fahlbusch, Geoffrey William Bromiley, 1999 The Encyclopedia of Christianity is the first of a five-volume English translation of the third revised edition of Evangelisches Kirchenlexikon. Its German articles have been tailored to suit an English readership, and articles of special interest to English readers have been added. The encyclopedia describes Christianity through its 2000-year history within a global context, taking into account other religions and philosophies. A special feature is the statistical information dispersed throughout the articles on the continents and over 170 countries. Social and cultural coverage is given to such issues as racism, genocide, and armaments, while historical content shows the development of biblical and apostolic traditions. This comprehensive work, while scholarly, is intended for a wide audience and will set the standard for reference works on Christianity.--Outstanding reference sources 2000, American Libraries, May 2000. The Linguistics of Speech William A. Kretzschmar,2009-03-19 This insightful study proposes a unified theory of speech through which conflicting ideas about language might be understood. It is founded on a number of key points, such as the continuum of linguistic behaviour, extensive variation in language features, the importance of regional and social proximity to shared linguistic production, and differential frequency as a key factor in linguistic production both in regional and social groups and in text corpora. The study shows how this new linguistics of speech does not reject rules in favour of language use, or reject language use in favour of rules; rather, it shows how rules can come from language as people use it. Written in a clear, engaging style and containing invaluable accessible introductions to complex theoretical concepts, this work will be of great interest to students and scholars of sociolinguistics, dialectology and corpus linguistics.

Consciousness and the Acquisition of Language Maurice Merleau-Ponty,1973 « The articles collected in this volume were written during a period of more than thirty years, the first having been published in 1929, the last in 1961. They are arranged in a systematic, not a chronological order, starting from a few articles mainly concerned with psychological matters and then passing on to phenomenology in the proper sense. »--

A companion website that includes a complete workbook with self-testing exercises and a comprehensive list of web links accompanies the book. The website can be found at the following address: <http://dx.doi.org/10.1075/z.156.workbook> Students completing the text

and workbook will acquire: a knowledge of the sound system of contemporary English; an understanding of the formation of English words; a comprehension of the structure of both simple and complex sentence in English; a recognition of complexities in the expression of meaning; an understanding of the context and function of use upon the structure of the language; and an appreciation of the importance of linguistic knowledge to the teaching of English to first and second-language learners.
