Excerpt: The Syro-Aramaic Reading of the Koran: A Contribution to the Decoding of the Language of the Koran English Edition of 2007 (Die syro-aramaische Lesart des Koran: Ein Beitrag zur Entschlüsselung der Koransprache (2000) is a book by Christoph Luxenberg. This book is considered a controversial work, triggering a debate about the history, linguistic origins and correct interpretation of the Qur'an. It has received much coverage in the mainstream media. The book argues that the Koran at its inception was drawn from Christian Syro-Aramaic texts, in order to evangelize the Arabs in the early 8th century. Richard Kroes summarises the argument of the book as follows: According to Luxenberg, the Qur'an was not written in classical Arabic but in a mixed Arabic-Syriac language, the traders' language of Mecca and it was based on Christian liturgical texts. When the final text of the Qur'an was codified, those working on it did not understand the original..

The Transmission of the Variant Readings of the Qur'an Shady Nasser, 2012-11-09 In this work, Nasser studies the canonization of the system readings, the theories of tawatur, and the emergence of the non-canonical shawadhdh readings.

The Miraculous Language of the Qur'an: Evidence of Divine Origin Bassam Saeh, This study illustrates why the language of the Qur'an is miraculous, unique, and evidence of divine authority. The author compares the language of the Qur'an with the language of pre-Islamic poetry, the Prophet's words (hadith), and the language of the Arabs both past and present, to

demonstrate that although the Qur'an was revealed in Arabic it was at the same time an Arabic which was entirely new. Original and early Muslim audiences viewed this as miraculous and responded to the Qur'an's words, sounds, rhythms, etc. in a manner consistent with a deeper appreciation of its beauty and majesty which modern ears, trained by familiarity, and despite being surrounded by all manner of dictionaries and studies, are at a loss to capture. The author attempts to remove this veil and present the Qur'an to readers as if hearing it for the first time, to bring to life some of this wonder. In doing so he guides readers to appreciate the beauty of the Qur'an, to become more immersed in it, and to have a clearer understanding of its structure and flow. Devoting special attention to Surah Al Muddaththir, to underpin his analysis, Saeh thus brings the Revelation to life, to demonstrate that each surah has distinct features and characteristics that make it stand out uniquely within the design and sweep of the whole.

The Quranic Jesus Carlos Andrés Segovia, 2018-11-19 Is it possible to rethink the multilayered and polyvalent Christology of the Qur'ān against the intersecting of competing peripheral Christianities, anti-Jewish Christian polemics, and the making of a new Arab state in the 7th-century Near East? To what extent may this help us to decipher, moreover, the intricate redactional process of the quranic corpus? And can we unearth from any conclusions as to the tension between a messianic-oriented and a prophetic-guided religious thought buried in the document? By analysing, first, the typology and plausible date of the Jesus texts contained in the Qur'ān (which implies moving far beyond both the habitual chronology of the Qur'ān and the common thematic division of the passages in question) and by examining, in the second place, the Qur'ān's earliest Christology vis-à-vis its later (and indeed much better known) Muhamadan kerygma, the present study answers these crucial questions and, thereby, sheds new light on the Qur'ān's original sectarian milieu and pre-canonical development.

New Perspectives on the Qur'an Gabriel Said Reynolds, 2012-03-29 This book continues the work of *The Qur'ān in its Historical Context*, in which an international group of scholars address an expanded range of topics on the Qur'ān and its origins, looking beyond medieval Islamic traditions to present the Qur'ān's own conversation with the religions and literatures of its day. Particular attention is paid to recent debates and controversies in the field, and to uncovering the Qur'ān's relationship with Judaism and Christianity. After a foreword by Abdolkarim Soroush, chapters by renowned experts cover: method in Qur'ānic Studies analysis of material evidence, including inscriptions and ancient manuscripts, for what they show of the Qur'ān's origins the language of the Qur'ān and proposed ways to emend our reading of the Qur'ān how our knowledge of the religious groups at the time of the Qur'ān's emergence might contribute to a better understanding of the text the Qur'ān's conversation with Biblical literature and traditions that challenge the standard understanding of the holy book. This debate of recent controversial proposals for new interpretations of the Qur'ān will shed new light on the Qur'ānic passages that have been shrouded in mystery and debate. As such, it will be a valuable reference for scholars of Islam, the

Qur'an, Christian-Muslim relations and the Middle East.

The Oxford Handbook of Qur'anic Studies Mustafa Shah, M. A. Abdel Haleem, 2020 The Qur'an is the foundational sacred text of the Islamic faith. Traditionally revered as the literal word of God, its pronouncements and discussions form the bedrock of Islamic beliefs and teachings. Notwithstanding its religious pre-eminence and the fact that it is the sacred text for over one billion of the world's Muslims, the Qur'an is also considered to be the matchless masterpiece of the Arabic language. Its historical impact as a text can be discerned in all aspects of the heritage of the Arabic literary tradition. Over recent decades, academic engagement with the Qur'an has produced an impressive array of scholarship, ranging from detailed studies of the text's unique language, style and structure, to meticulous surveys of its contents, concepts and historical contexts. The Oxford Handbook of Qur'anic Studies is an essential reference and starting point for those with an academic interest in the Qur'an. It offers not only detailed reviews of influential subjects in the field, but also a critical overview of developments in the research discourse. It explores the tradition of Qur'anic exegesis and hermeneutics, making it a comprehensive academic resource for the study of the Qur'an. No single volume devoted to such a broad academic survey of the state of the field currently exists.

The Qur'an: A Guidebook Roberto Tottoli, 2023-02-20 The Qur'an: A Guidebook is an updated English version of the work appeared in Italian (Rome 2021) *Leggere e studiare il Corano* which deals with the contents of the Qur'an, the style and formal features of the text, the history and fixation of it and an outline of the reception in Islamic literature. The aim of the work is to give a reader a description of what he/she can find in the Islamic holy text and the state of the critical debates on all the topics dealt with, focusing mainly on the growing scholarly literature which appeared in the last 30 years. As such, the work is unique in combining the aim to give comprehensive information on the topic and, at the same, time, reconstruct the critical debate in a balanced outline also emphasizing confessional approaches and the dynamics in the study of the Qur'an. There is nothing similar in contemporary scholarship and the book is a handbook for students and scholars of Islam but also for readers in religious studies who need to know how the main questions related to the Islamic text have been discussed in recent scholarship.

An Oral-Formulaic Study of the Qur'an Andrew G. Bannister, 2014-04-24 The Qur'an makes extensive use of older religious material, stories, and traditions that predate the origins of Islam, and there has long been a fierce debate about how this material found its way into the Qur'an. This unique book argues that this debate has largely been characterized by a failure to fully appreciate the Qur'an as a predominately oral product. Using innovative computerized linguistic analysis, this study demonstrates that the Qur'an displays many of the signs of oral composition that have been found in other traditional literature. When one then combines these computerized results with other clues to the Qur'an's origins (such as the demonstrably oral culture that both predated and preceded the Qur'an, as well as the "folk memory" in the Islamic tradition

that Muhammad was an oral performer) these multiple lines of evidence converge and point to the conclusion that large portions of the Qur'an need to be understood as being constructed live, in oral performance. Combining historical, linguistic, and statistical analysis, much of it made possible for the first time due to new computerized tools developed specifically for this book, Bannister argues that the implications of orality have long been overlooked in studies of the Qur'an. By relocating the Islamic scripture firmly back into an oral context, one gains both a fresh appreciation of the Qur'an on its own terms, as well as a fresh understanding of how Muhammad used early religious traditions, retelling old tales afresh for a new audience.

The Qur'an's Reformation of Judaism and Christianity Holger M. Zellentin, 2019-03-20 This volume explores the relationship between the Qur'an and the Jewish and Christian traditions, considering aspects of continuity and reform. The chapters examine the Qur'an's retelling of biblical narratives, as well as its reaction to a wide array of topics that mark Late Antique religious discourse, including eschatology and ritual purity, prophetology and paganism, and heresiology and Christology. Twelve emerging and established scholars explore the many ways in which the Qur'an updates, transforms, and challenges religious practice, beliefs, and narratives that Late Antique Jews and Christians had developed in dialogue with the Bible. The volume establishes the Qur'an's often unique perspective alongside its surprising continuity with Judaism and Christianity. Chapters focus on individual suras and on intra-Qur'anic parallels, on the Qur'an's relationship to pre-Islamic Arabian culture, on its intertextuality and its literary intricacy, and on its legal and moral framework. It illustrates a move away from the problematic paradigm of cultural influence and instead emphasizes the Qur'an's attempt to reform the religious landscape of its time. *The Qur'an's Reformation of Judaism and Christianity* offers new insight into the Islamic Scripture as a whole and into recent methodological developments, providing a compelling snapshot of the burgeoning field of Qur'anic studies. It is a key resource for students and scholars interested in religion, Islam, and Middle Eastern Studies.

The Topkapı Qur'ān Manuscript H.S. 32 Rami Hussein Halaseh, 2024-09-02 This study presents a comprehensive and systematic examination of a revered Qur'ān manuscript, commonly attributed to the third Islamic Caliph, 'Uthmān b. 'Affān (d. 35/656), housed at the Topkapı Palace Museum in Istanbul, Türkiye (identified as H.S. 32). Halaseh offers a meticulous analysis of the manuscript's codicological, paleographic, and orthographic characteristics, explores its emendations, production date, and traces the manuscript's journey first to Cairo and then to Istanbul. Additionally, the study examines and categorizes its textual variants, including what are considered today as non-canonical and some that are not previously attested in the major qirā'āt literature. This work not only sheds light on the transmission of the Qur'ānic text but also establishes a comprehensive framework for researching Qur'ān manuscripts. By integrating methods for examining these manuscripts as both physical artifacts and scriptural texts, Halaseh presents a holistic methodological approach to their scholarly study.

The Qur'an in Context Mark Robert Anderson, 2016-09-02 Mark Anderson explores the world of seventh-century Arabia as

Routledge Handbook on Early Islam Herbert Berg, 2017-08-10 The formative period of Islam remains highly contested. From the beginning of modern scholarship on this formative period, scholars have questioned traditional Muslim accounts on early Islam. The scholarly fixation is mirrored by sectarian groups and movements within Islam, most of which trace their origins to this period. Moreover, contemporary movements from Salafists to modernists continue to point to Islam's origins to justify their positions. This Handbook provides a definitive overview of early Islam and how this period was understood and deployed by later Muslims. It is split into four main parts, the first of which explores the debates and positions on the critical texts and figures of early Islam. The second part turns to the communities that identified their origins with the Qur'ān and Muḥammad. In addition to the development of Muslim identities and polities, of particular focus is the relationship with groups outside or movements inside of the umma (the collective community of Muslims). The third part looks beyond what happened from the 7th to the 9th centuries CE and explores what that period, the events, figures, and texts have meant for Muslims in the past and what they mean for Muslims today. Not all Muslims or scholars are willing to merely reinterpret early Islam and its sources, though; some are willing to jettison parts, or even all, of the edifice that has been constructed

over almost a millennium and a half. The Handbook therefore concludes with discussions of re-imaginings and revisions of early Islam and its sources. Almost every major debate in the study of Islam and among Muslims looks to the formative period of Islam. The wide range of contributions from many of the leading academic experts on the subject therefore means that this book will be a valuable resource for all students and scholars of Islamic studies, as well as for anyone with an interest in early Islam.

The Bible in Arabic Sidney H. Griffith, 2013-07-21 From the first centuries of Islam to well into the Middle Ages, Jews and Christians produced hundreds of manuscripts containing portions of the Bible in Arabic. Until recently, however, these translations remained largely neglected by Biblical scholars and historians. In telling the story of the Bible in Arabic, this book casts light on a crucial transition in the cultural and religious life of Jews and Christians in Arabic-speaking lands. In pre-Islamic times, Jewish and Christian scriptures circulated orally in the Arabic-speaking milieu. After the rise of Islam--and the Qur'an's appearance as a scripture in its own right--Jews and Christians translated the Hebrew Bible and the Greek New Testament into Arabic for their own use and as a response to the Qur'an's retelling of Biblical narratives. From the ninth century onward, a steady stream of Jewish and Christian translations of the Hebrew Bible and New Testament crossed communal borders to influence the Islamic world. The Bible in Arabic offers a new frame of reference for the pivotal place of Arabic Bible translations in the religious and cultural interactions between Jews, Christians, and Muslims. Some images inside the book are unavailable due to digital copyright restrictions.

The Qur'an and Late Antiquity Angelika Neuwirth, 2019-02-19 In this book, Angelika Neuwirth provides a new approach to understanding the founding text of Islam. Typical exegesis of the Qur'an treats the text teleologically, as a fait accompli finished text, or as a replica or summary of the Bible in Arabic. Instead Neuwirth approaches the Qur'an as the product of a specific community in the Late Antique Arabian peninsula, one which was exposed to the wider worlds of the Byzantine and Sasanian empires, and to the rich intellectual traditions of rabbinic Judaism, early Christianity, and Gnosticism. A central goal of the book is to eliminate the notion of the Qur'an as being a-historical. She argues that it is, in fact, highly aware of its place in late antiquity and is capable of yielding valuable historical information. By emphasizing the liturgical function of the Qur'an, Neuwirth allows readers to see the text as an evolving oral tradition within the community before it became collected and codified as a book. This analysis sheds much needed light on the development of the Qur'an's historical, theological, and political outlook. The book's final chapters analyze the relationship of the Qur'an to the Bible, to Arabic poetic traditions, and, more generally, to late antique culture and rhetorical forms. By providing a new introduction to the Qur'an, one that uniquely challenges current ideas about its emergence and development, *The Qur'an and Late Antiquity* bridges the gap between Eastern and Western approaches to this sacred text.

The Living Qur'ān Ali J. Hussain, 2023-06-06 This work aims to distill the findings of a wide variety of scholarly disciplines into a coherent narrative of the Qur'ān's history, from the first oral recitation to the four published Variants in active circulation today. In the process of unraveling the complicated relationships between the oral Qur'ān and the written Qur'ān, it becomes clear that there are, in fact, two histories of the Qur'ān and that the overall history of the Qur'ān cannot be appreciated without understanding the interactions between these two occasionally intertwined but often independent component histories. Discrepancies between the four qur'ānic Variants that are in active use today are indexed and analyzed. While most scholarship views the Qur'ān either in relation to its past and its possible origins, or in relation to its contemporary status as a static, fixed text, this work adopts an organic, developmental approach recognizing that the Qur'ān is a living text that continues to evolve.
