

The East Is Still Red

Arve Hansen, Jo Inge Bekkevold, Kristen Nordhaug

The East is Still Red - Chinese Socialism in the 21st Century Carlos Martinez, 2023-06 Professor Radhika Desai (University of Manitoba; Convenor, International Manifesto Group): In a world gone beserk with US-incited rage against People's China; in a world where the bulk of Western scholarship has become so deeply compromised so as to yo-yo between the most tendentious anti-Chinese positions and confusion; in a world where the left has lost its ability to distinguish between imperialism and liberation; in a world that fails to understand just how world-changing have been the achievements of actually existing socialisms; Carlos Martinez shines the light of his crystal-clear prose and his acute political and scholarly insight on China's achievements, material, ecological, scientific and social. If you want to understand the most profound earthquake shaking up our world, read this book. Dr Francisco Dominguez (Specialist on Latin American politics): This is a most welcome and timely book. In it, Carlos Martinez furnishes us with rigorous and illuminating analyses covering crucial features of socialist construction in China, essential, especially for Western audiences, to grasp its highly progressive nature. The penetrating discussion Martinez engages in, elegantly pierces through the thick fog of malicious and aggressive imperialist anti-China propaganda. A must for all those who wish to build a better and peaceful world. Professor Roland Boer (Renmin University of China): In this important new book, Carlos Martinez sets out the case for the Western Left's resolute support of the socialist project in China. Based on in-depth research and written in an accessible style, the book will soon become an indispensable resource for anyone who wants to know the facts concerning China. Read it carefully, absorb its insights, and rectify your view of Chinese socialism! Professor Ken Hammond (New Mexico State University): Carlos Martinez's *The East is Still Red: Chinese Socialism in the 21st Century*, brings together essays and commentaries from his recent writings on a wide range of issues, both historical and contemporary, concerning China's revolutionary path and its ongoing efforts to build a socialist future for the Chinese people. Recognizing the challenges inherent in this effort, and the obstacles being placed in China's way by American-led imperialism, Martinez clearly demonstrates that China remains committed to the revolutionary mission of creating a just and equitable social economy for itself and as part of the imperative work of addressing the challenges of global climate change. He rejects those voices which see China as a neoliberal member of the global capitalist order, and upholds the need to recognize China's achievements in eliminating absolute poverty and improving the lives of its people as well as in leading in the construction of a new international order outside the hegemonic

domination of the United States and its allies. This is a most welcome contribution to the discourse about China on the Left, and for a broader audience of the politically engaged. Elias Jabbour (Associate professor of theory and policy of economic planning at Rio de Janeiro State University's School of Economics; Co-author of 'Socialist Economic Development in the 21st Century: A Century after the Bolshevik Revolution'): Carlos Martinez has excelled in defending frontier positions on the nature of the Chinese socioeconomic formation. In fact, it is very rare to find intellectuals with his argumentative power and intellectual sophistication. In this book, the reader will have access to a wide source of information and living theory necessary to understand China and its unique socialism. Carlos Martinez, great intellectual and friend, is an honourable exception among Marxists in the West. Marxism in the West depends heavily on the talent and creativity of people like Martinez

Is the East Still Red? Gary Blank, 2015-02-27 Does China represent a non-capitalist alternative to neoliberal development models? Commentators on the left have offered sharply divergent assessments over the last two decades. A few still cling the old dream of market socialism, twinning efficiency with social justice. For most, however, China is proof that market reforms invariably yield dispossession, inequality, and capitalist restoration. *Is the East Still Red?* argues that both interpretations are wrong and exhibit a common failure to distinguish between market mechanisms and capitalist imperatives. Gary Blank situates the Chinese experience within broader Marxist debates on socio-historical transitions and primitive accumulation, highlighting the need to conceptualize capitalism as a unique system in which producers and appropriators depend on the market for their reproduction. Despite years of marketization, the mandarins in Beijing have not yet imposed full market dependence in industry and agriculture. He shows how the resistance of workers and peasants, the imperatives of party-state legitimacy, and the reproductive strategies of individual Communist officials and managers all act to perpetuate central aspects of a bureaucratic-collectivist system, in which direct producers and bureaucrats are effectively merged with the means of production. The People's Republic may be a non-capitalist market alternative, albeit one that is hardly edifying for socialists.

A Continuous Revolution Barbara Mittler, 2020-03-17 Cultural Revolution Culture, often denigrated as nothing but propaganda, was liked not only in its heyday but continues to be enjoyed today. *A Continuous Revolution* sets out to explain its legacy. By considering Cultural Revolution propaganda art—music, stage works, prints and posters, comics, and literature—from the point of view of its *longue durée*, Barbara Mittler suggests it was able to build on a tradition of earlier art works, and this allowed for its sedimentation in cultural memory and its proliferation in contemporary China. Taking the aesthetic experience of the Cultural Revolution (1966–1976) as her base, Mittler juxtaposes close readings and analyses of cultural products from the period with impressions given in a series of personal interviews conducted in the early 2000s with Chinese from diverse class and generational backgrounds. By including much testimony from these original voices, Mittler

illustrates the extremely multifaceted and contradictory nature of the Cultural Revolution, both in terms of artistic production and of its cultural experience.

State Capitalism and Development in East Asia since 1945, 2023-08-28 During the second half of the twentieth century the countries of East Asia saw one of the most remarkable transformations in human history, from relatively poor societies to global powerhouses of accumulation, proletarianisation and mega-urbanisation. This volume features Marxist scholars from East Asia and Europe who are pioneering a new approach to this transformation using the theory of state capitalism. The essays analyse the histories of countries on either side of the Cold War divide within the broader framework of twentieth century global capitalist expansion, while at the same time offering a sophisticated critique of Developmental State Theory. Contributors are: Tobias ten Brink, Gareth Dale, Jeong Seongjin, Michael Haynes, Kim Ha-young, Kim Yong-uk, Lee Jeong-goo, and Owen Miller

Return of Marxian Macro-dynamics in East Asia Masao Ishikura, Seongjin Jeong, Minqi Li, 2017-08-21 This important and timely volume brings together experts in political economy from across the globe, to comment on the return of Marxian macro-dynamics in East Asia. The contributions explore macro-dynamics, the role of the state and hegemony in the context of transnational capitalism, and Marxian alternatives for East Asia.

Those Great Old-Time Radio Years Aubrey J. Sher PH.D., 2013-08-15 Those Great Old-Time Radio Years takes the listener on a memorable ride from the invention of the radio into its nostalgic Golden Age when the author brings back memories of programs that developed a listeners power of imagination before television made its debut. The book is comprised of an Introduction and eleven chapters, each headed by a picture that aptly pertains to it. The eleven chapters cover the following subjects: (1) The Golden Age of Radio; (2) Adventure, Mystery, and Suspense; (3) Broadcasting: News, Sports, Gossip and Disc Jockeys; (4) Childrens Programs; (5) Comedy and Variety; (6) Music; (7) Quiz and Panel; (8) Sitcom; (9) Soap Opera; (10) Theater; and (11) Western.

New Directions in Uneven and Combined Development Justin Rosenberg, Jack Brake, Tatiana Pignon, Lucas de Oliveira Paes, 2021-11-28 This book introduces Uneven and Combined Development as an approach in international studies and showcases some of the latest and most innovative research in this field. The theory of Uneven and Combined Development originated in the writings of Leon Trotsky. However, in recent years it has become the subject of flourishing literature in the discipline of International Relations, due to its unique ability to reintegrate social and international theory. The first and second generations of this literature were focused upon retrieving the idea, expanding it into a social theory of 'the international', and applying it to numerous empirical cases – such as the rise of political Islam, the causes of the First World War and the Bolshevik Revolution, and even the origins of capitalism as a world system. In the present volume, a third generation has arrived which further extends the reach of UCD, connecting it in new and exciting ways to such subjects as

ecology, macro-economic policy, culture, Science and Technology Studies, Comparative Literature and even science-fiction. The chapters in this book were originally published in the journal, the Cambridge Review of International Affairs.

30 Years since the Fall of the Berlin Wall Alexandr Akimov, Gennadi Kazakevitch, 2020-01-08 The year 2019 marks 30 years since the fall of the Berlin wall. This symbolic event led to German unification and the collapse of communist party rule in countries of the Soviet-led Eastern bloc. Since then, the post-communist countries of Central, Eastern and South-eastern Europe have tied their post-communist transition to deep integration into the West, including EU accession. Most of the states in Central and Eastern Europe have been able to relatively successfully transform their previous communist political and economic systems. In contrast, the non-Baltic post-Soviet states have generally been less successful in doing so. This book, with an internationally respected list of contributors, seeks to address and compare those diverse developments in communist and post-communist countries and their relationship with the West from various angles. The book has three parts. The first part addresses the progress of post-communist transition in comparative terms, including regional focus on Eastern and South Eastern Europe, CIS and Central Asia. The second focuses on Russia and its foreign relationship, and internal politics. The third explores in detail economies and societies in Central Asia. The final part of the book draws some historical comparisons of recent issues in post-communism with the past experiences.

The Sociology of Globalization Luke Martell, 2016-12-16 The new edition of this accessible and wide-ranging book demonstrates the distinctive insights that sociology has to bring to the study of globalization. Taking in the cultural, political and economic dimensions of globalization, the book provides a thorough introduction to key debates and critically evaluates the causes and consequences of a globalizing world. Bringing the discussion right up to date, the new edition includes an increased emphasis on the rise of China, the aftermath of the financial crisis and austerity, the benefits of migration and open borders, and the changing structure of global inequality. Data and literature have been updated throughout the book, with new sections on global cities, the environment and international protests, and expanded discussion of gender. Martell argues that globalization offers many opportunities for greater interaction and participation in societies throughout the world, for instance through the media and migration, but also has dark sides such as conflict, global poverty, climate change and economic insecurity. This book will continue to be an ideal companion to students across the social sciences taking courses that cover globalization, and the sociology of globalization in particular.

Routledge Handbook of Africa-Asia Relations Pedro Amakasu Raposo, David Arase, Scarlett Cornelissen, 2017-10-30 The Routledge Handbook of Africa-Asia Relations is the first handbook aimed at studying the interactions between countries across Africa and Asia in a multi-disciplinary and comprehensive way. Providing a balanced discussion of historical and on-going processes which have both shaped and changed intercontinental relations over time, contributors take a thematic

approach to examine the ways in which we can conceptualise these two very different, yet inextricably linked areas of the world. Using comparative examples throughout, the chronological sections cover: • Early colonialist contacts between Africa and Asia; • Modern Asia-Africa interactions through diplomacy, political networks and societal connections; • Africa-Asia contemporary relations, including increasing economic, security and environmental cooperation. This handbook grapples with major intellectual questions, defines current research, and projects future agendas of investigation in the field. As such, it will be of great interest to students of African and Asian Politics, as well as researchers and policymakers interested in Asian and African Studies.

The Cold War Spencer C. Tucker, 2020-10-27 This sweeping reference work covers every aspect of the Cold War, from its ignition in the ashes of World War II, through the Berlin Wall and the Cuban Missile Crisis, to the collapse of the Soviet Union in 1991. The Cold War superpower face-off between the Soviet Union and the United States dominated international affairs in the second half of the 20th century and still reverberates around the world today. This comprehensive and insightful multivolume set provides authoritative entries on all aspects of this world-changing event, including wars, new military technologies, diplomatic initiatives, espionage activities, important individuals and organizations, economic developments, societal and cultural events, and more. This expansive coverage provides readers with the necessary context to understand the many facets of this complex conflict. The work begins with a preface and introduction and then offers illuminating introductory essays on the origins and course of the Cold War, which are followed by some 1,500 entries on key individuals, wars, battles, weapons systems, diplomacy, politics, economics, and art and culture. Each entry has cross-references and a list of books for further reading. The text includes more than 100 key primary source documents, a detailed chronology, a glossary, and a selective bibliography. Numerous illustrations and maps are inset throughout to provide additional context to the material.

The Socialist Market Economy in Asia Arve Hansen, Jo Inge Bekkevold, Kristen Nordhaug, 2020-10-26 This book is intended for policy-makers, academics and students of development studies, area studies, political economy, geography and political science. Three of the best global performers in terms of economic growth are authoritarian states led by communist parties. The 'socialist market economy' model employed in China, Vietnam and Laos performs better than the economic systems in countries at a similar level of income per capita on a wide range of development indicators, yet market reforms and governance failures have led to highly unequal societies and significant environmental problems. This book presents the first comparative study of development in these three countries. Written by country experts and scholars of development studies, it explores the ongoing quest for market versus state within their model, and the coherence of their development. Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Capitalism, Alone Branko Milanovic, 2021-09-07 For the first time in history, the globe is dominated by one economic system. Capitalism prevails because it delivers prosperity and meets desires for autonomy. But it also is unstable and morally defective. Surveying the varieties and futures of capitalism, Branko Milanovic offers creative solutions to improve a system that isn't going anywhere.

Connectivity and Global Studies Jan Nederveen Pieterse, 2021-02-19 This textbook provides readers with evocative and analytical accounts of social processes that are linked to globalization and connectivity, which includes a wide range of multi-centred connections in history, DNA analysis, technology, art, populism and political economy. Rather than globalization, Nederveen Pieterse focuses on connectivity. His approach to globalization differs from both structuralist accounts of the world-system, and the institutionally-centred focus of much work in international studies. This synthesis will provide a new resource to reconstruct theoretical approaches to globalization and global studies. Fluently written, clearly organized and with an interdisciplinary approach, the book will be accessible to upper division undergraduates and graduates in social sciences, including students and researchers from the fields of sociology, politics, political economy, development studies and international relations.

The Political Economy of Sanctions: Resilience and Transformation in Russia and Iran Ksenia Kirkham, 2022-08-25 This book presents a comparative analysis of Russia and Iran under sanctions. Whilst the growing literature on sanctions has focused primarily on their effectiveness, much less attention has been paid to the ways in which sanctions have transformed target societies and states. Despite, or indeed because of, the relentless enactment of sanctions, Russia and Iran have become increasingly Hobbesian in their governance – more self-reliant, less democratic, and more aggressive towards the West. The author explores these developments through a novel Welfare State Regime framework (WSR) that combines welfare state functionality with institutional, economic, and cultural structural dimensions.

Global Governance and Transnationalizing Capitalist Hegemony Ian Taylor, 2016-11-25 The book is a critique of the excited talk about how various emerging economies (often teleologically extended to them being powers) are re-writing the rules of global governance and ushering in a new set of economic assumptions.

Female Ghost from the Phone Tong ErMiao, 2020-04-28 My name is Zhang Yifan, I'm a small employee in the company. As a result of my work, I go on business trips every few days. Traveling outside lonely, in the cell phone WeChat shake I wave to a beautiful woman, we agreed to play in the small park in the middle of the night to play in the woods. But I was surprised to find that she was pale and cold, and there was no sign of her.

Crises and Hegemonic Transitions Lorenzo Fusaro, 2018-11-26 Crises and Hegemonic Transitions reworks the concept of hegemony at the international level and analyses its relation to world market crises. Returning to the critical edition of Gramsci's Quaderni and maintaining that the author's work is permeated by Marx's Capital and the law of value, Fusaro

argues that imperialist states strive to constructing hegemonic relations in order to secure capital accumulation using domination and leadership, coercion and consensus, and that economic crises have only the potential to provoke crises of hegemony. Tracing the vicissitudes of US hegemony from the interwar period to the present and assessing the Great Depression's and the Great Recession's impact, Fusaro provides a novel way to interpret past and present developments within the world economy.
