*Latrinae: Roman Toilets in the Northwestern Provinces of the Roman Empire* Stefanie Hoss, 2018-01-31 This book is the first collection on Roman toilets of the northwestern provinces, and gives a good overview of the possibilities for human waste removal in Roman times. The volume provides a fascinating introduction to this under-researched group of Roman installations.

Roman Toilets Gemma C. M. Jansen, Jesús Acero, Ann Olga Koloski-Ostrow, Eric M. Moormann, 2011 Multi-seater latrines, as we find them in Roman Ostia and in many other sites across the Mediterranean, are well known both to tourists and archaeologists, but very few people understand how they really functioned technically or how they may have been perceived in the context of Roman society. This handbook by an international group of specialists in archaeology, anthropology, and classical literature addresses a wide variety of questions regarding toilets in the Greco-Roman world. Chapters on the technology and construction of toilets, on the archaeology of toilets and their contents, on toilets in various ancient contexts (such as in private houses, baths, or military installations), on the impact of toilets on society and personal hygiene, especially in the Roman world, and on the decorations and graffiti from toilets, all combine to make this the most complete study of this important subject to date.

**The Technology of Ancient Rome** Naomi V. McCullough, 2016-12-15 Ancient Rome was a civilization developed over many centuries. At its height, it had the world's greatest army, rulers, and language, influencing much of the known world. Their technologies during this time were likewise improvements on older concepts, mostly from the Greeks, whom they conquered. Nevertheless, their influence continued long after the fall of the Roman Empire. Today, several technologies have their origins in Ancient Rome. This book examines the history of Ancient Rome and its key contributions to society, past and present.

The Archaeology of Sanitation in Roman Italy Ann Olga Koloski-Ostrow, 2015-04-06 The Romans developed sophisticated methods for managing hygiene, including aqueducts for moving water from one place to another, sewers for removing used water from baths and runoff from walkways and roads, and public and private latrines. Through the archeological record, graffiti, sanitation-related paintings, and literature, Ann Olga Koloski-Ostrow explores this little-known world of bathrooms and sewers, offering unique insights into Roman sanitation, engineering, urban planning and development, hygiene, and

public health. Focusing on the cities of Pompeii, Herculaneum, Ostia, and Rome, Koloski-Ostrow's work challenges common perceptions of Romans' social customs, beliefs about health, tolerance for filth in their cities, and attitudes toward privacy. In charting the complex history of sanitary customs from the late republic to the early empire, Koloski-Ostrow reveals the origins of waste removal technologies and their implications for urban health, past and present.

Ancient Rome Monica M. Bontty, 2020-03-17 This book shares little-known facts from and excerpts of primary source documents to correct popular misconceptions about Ancient Rome and to show how those misconceptions became widespread. Roman personalities and history have always had a larger-than-life profile in American popular culture, but most people think of this ancient civilization as merely decadent, cruel, and elitist. Most of our stereotypical conceptions of the empire and its people, however, are wrong. This book corrects popular misconceptions about the ancient Roman world, thus making ancient history relevant and accessible to modern readers and allowing modern critics of American politics and society to draw accurate comparisons. Each chapter discusses how a particular misconception developed, spread, and evolved into what we now believe to be the historical truth. Topics discussed include crucifixion, the destruction of Carthage, Julius Caesar's last words, and Roman hygiene. Excerpts from primary source documents provide evidence of both the rise of the historical fictions and the truths behind the myths.

*Ancient Rome* Louise Spilsbury, 2018-07-15 The amazing accomplishments of Ancient Rome can still feel like a mystery to many. Along with learning about the culture, readers get the chance to study amazing Roman artifacts. They're asked to put their thinking caps on, and using questions and prompts, draw their own conclusions about Ancient Rome. This book is sure to wow readers with Rome's impressive civilization and excite them enough to discover some facts on their own.

**A Day in Old Rome** William Stearns Davis, 1925

Latrinae et Foricae Barry Hobson, 2009-07-09 The Romans are renowned for their aqueducts, baths and water systems, achievements equalled in the modern world only over the past few hundred years. Their toilets, both single ('latrinae') and

multi-seater ('foricae') form part of the Roman sanitation system that continues to fascinate the modern visitor to ancient sites today. In this well illustrated overview, Barry Hobson describes toilets in the Roman empire from Iberia to Syria, and from North Africa to Hadrian's Wall. Particular emphasis is given to Pompeii, where many toilets are preserved and where some evidence for change over time can be found. The discussion encompasses not only details of location, construction and decoration of toilets, but also questions of privacy, sewage, rubbish disposal, health issues, references in Latin literature, and graffiti.

Multisensory Living in Ancient Rome Hannah Platts, 2019-11-28 Classicists have long wondered what everyday life was like in ancient Greece and Rome. How, for example, did the slaves, visitors, inhabitants or owners experience the same home differently? And how did owners manipulate the spaces of their homes to demonstrate control or social hierarchy? To answer these questions, Hannah Platts draws on a diverse range of evidence and an innovative amalgamation of methodological approaches to explore multisensory experience – auditory, olfactory, tactile, gustatory and visual – in domestic environments in Rome, Pompeii and Herculaneum for the first time, from the first century BCE to the second century CE. Moving between social registers and locations, from non-elite urban dwellings to lavish country villas, each chapter takes the reader through a different type of room and offers insights into the reasons, emotions and cultural factors behind perception, recording and control of bodily senses in the home, as well as their sociological implications. *Multisensory Living in Ancient Rome* will appeal to all students and researchers interested in Roman daily life and domestic architecture.

*Evolution of Sanitation and Wastewater Technologies through the Centuries* Andreas N. Angelakis, Joan B. Rose, 2014-09-14 Most of the technological developments relevant to water supply and wastewater date back to more than five thousand years ago. These developments were driven by the necessity to make efficient use of natural resources, to make civilizations more resistant to destructive natural elements, and to improve the standards of life, both at public and

private level. Rapid technological progress in the 20th century created a disregard for past sanitation and wastewater and stormwater technologies that were considered to be far behind the present ones. A great deal of unresolved problems in the developing world related to the wastewater management principles, such as the decentralization of the processes, the durability of the water projects, the cost effectiveness, and sustainability issues, such as protection from floods and droughts were intensified to an unprecedented degree. New problems have arisen such as the contamination of surface and groundwater. Naturally, intensification of unresolved problems has led to the reconsideration of successful past achievements. This retrospective view, based on archaeological, historical, and technical evidence, has shown two things: the similarity of physicochemical and biological principles with the present ones and the advanced level of wastewater engineering and management practices. *Evolution of Sanitation and Wastewater Technologies through the Centuries* presents and discusses the major achievements in the scientific fields of sanitation and hygienic water use systems throughout the millennia, and compares the water technological developments in several civilizations. It provides valuable insights into ancient wastewater and stormwater management technologies with their apparent characteristics of durability, adaptability to the environment, and sustainability. These technologies are the underpinning of modern achievements in sanitary engineering and wastewater management practices. It is the best proof that “the past is the key for the future”. *Evolution of Sanitation and Wastewater Technologies through the Centuries* is a textbook for undergraduate and graduate courses of Water Resources, Civil Engineering, Hydraulics, Ancient History, Archaeology, Environmental Management and is also a valuable resource for all researchers in the these fields. *Sixty-Six Toilets and Urinals in the Ancient City of Rome* Gemma Jansen,Ann Olga Koloski-Ostrow,Richard Neudecker,2024-10 This book is the first ever in presenting a complete overview of all Roman toilets known in the capital of the Roman empire. Roman toilet specialists, Gemma Jansen, Ann Olga Koloski-Ostrow and Richard Neudecker, together with 31 collaborating archaeologists working in Rome, provide a comprehensive description of these excavated toilets with abundant illustrations. Some of these toilets have been known for years, others have been excavated only recently and are presented for the first time in this work. Another first is that this assembly of toilets has been analyzed as a group, and in a greater context. The work discusses not only their cultural context, but also their hygiene, their water supply and drainage, architecture, seat design and their place in the urban and mental environment of the ancient city of Rome. The presented investigations are based on both archaeological remains and Roman text-based sources. This unprecedented compendium does not just aim to address specialists of the field; interested readers will find that they can exit the immediate confines of the toilets and step right into the heart of Roman culture and society.

Not a Drop to Drink . . . Norman Keifetz, 2019-03-19 The trouble started when the water in the little college town of Wickstead, Pennsylvania, was found to be tainted. This aroused the citizens, led by a college professor and a decorated war veteran, Nick Adamson. He decides to go to war against the water companies. Nick is an eccentric character. He is under constant surveillance not only the local sheriff but also by the state police, who suspect him of being the illusive sniper who had earlier shot and wounded state officials after they had signed off on the senseless slaughter of dozens of blackbirds. The story hangs on whether or not they will finally arrest him.
