**On Christian Doctrine** St. Augustine,Wyatt North,2014-05-20 Augustine of Hippo, also known as Augustine, St. Augustine, St. Austin, St. Augoustinos, Blessed Augustine, or St. Augustine the Blessed, was Bishop of Hippo Regius (present-day Annaba, Algeria). He was a Latin-speaking philosopher and theologian who lived in the Roman Africa Province. His writings were very influential in the development of Western Christianity. According to his contemporary, Jerome, Augustine "established anew the ancient Faith." In his early years he was heavily influenced by Manichaeism and afterward by the Neo-Platonism of Plotinus. After his conversion to Christianity and baptism (AD 387), Augustine developed his own approach to philosophy and theology, accommodating a variety of methods and different perspectives. He believed that the grace of Christ was indispensable to human freedom, and he framed the concepts of original sin and just war. This classic work, On

Christian Doctrine, was translated into several languages and played an important role in the spreading of the ideals of Eastern and Western Christianity

*Reason and Emotion* John M. Cooper, 1999-01-03 This book brings together twenty-three distinctive and influential essays on ancient moral philosophy--including several published here for the first time--by the distinguished philosopher and classical scholar John Cooper. The volume gives a systematic account of many of the most important issues and texts in ancient moral psychology and ethical theory, providing a unified and illuminating way of reflecting on the fields as they developed from Socrates and Plato through Aristotle to Epicurus and the Stoic philosophers Chrysippus and Posidonius, and beyond. For the ancient philosophers, Cooper shows here, morality was good character and what that entailed: good judgment, sensitivity, openness, reflectiveness, and a secure and correct sense of who one was and how one stood in relation to others and the surrounding world. Ethical theory was about the best way to be rather than any principles for what to do in particular circumstances or in relation to recurrent temptations. Moral psychology was the study of the psychological conditions required for good character--the sorts of desires, the attitudes to self and others, the states of mind and feeling, the kinds of knowledge and insight. Together these papers illustrate brilliantly how, by studying the arguments of the Greek philosophers in their diverse theories about the best human life and its psychological underpinnings, we can expand our own moral understanding and imagination and enrich our own moral thought. The collection will be crucial reading for anyone interested in classical philosophy and what it can contribute to reflection on contemporary questions about ethics and human life.

Logic and Aristotle's Rhetoric and Poetics in Medieval Arabic Philosophy Black, 2022-07-04 This book examines a widespread, and often misunderstood, doctrine within the medieval Aristotelian tradition, namely the inclusion of Aristotle's Rhetoric and Poetics within the scope of the Organon. It studies this doctrine, as presented by the Islamic philosophers Al-Fārābī, Avicenna, and Averroes, from a purely philosophical perspective, and argues that the logical construal of the arts of rhetoric and poetics is both interesting and illuminating. The book begins by examining some prevalent misconceptions regarding the logical interpretation of the Rhetoric and Poetics. Chapter two considers the Greek background of the doctrine, first through an examination of the Aristotelian divisions of the sciences, and then through an examination of the beginnings of the logical classification of the Rhetoric and Poetics among the Greek commentators from the school of Alexandria. The remainder of the work is devoted to a detailed consideration of the Arabic philosophers' development of the doctrine, both their understanding of its general epistemological and logical underpinnings, and their elaboration of the specific logical structures upon which poetical and rhetorical discourse is based. Consideration is also given to the relationship between contemporary philosophical views of rhetoric and poetics, and the views of these medieval authors.

*St. Augustine : On Christian Doctrine* Saint Augustine, St Augustin, Saint Augustine of Hippo, 2018-10-19 One of Saint Augustine's most important contributions to Christian Theology, *On Christian Doctrine* is essential reading for any serious believer interested in learning more about faith in God. The four books of St. Augustin *On Christian Doctrine* (*De Doctrina Christiana*, iv libri) are a compend of exegetical theology to guide the reader in the understanding and interpretation of the Sacred Scriptures, according to the analogy of faith. The first three books were written ad 397; the fourth was added 426. It is the first and best patristic work on biblical Hermeneutics, and continued for a thousand years, together with the Prefaces of Jerome, to be the chief exegetical guide. Although it is superseded as a scientific work by modern Hermeneutics and Critical Introductions to the Old and New Testaments, it is not surpassed for originality, depth and spiritual insight.

**The Oxford Handbook of Rhetorical Studies** Michael J. MacDonald, 2017-09-20 One of the most remarkable trends in the humanities and social sciences in recent decades has been the resurgence of interest in the history, theory, and practice of rhetoric: in an age of global media networks and viral communication, rhetoric is once again contagious and communicable (Friedrich Nietzsche). Featuring sixty commissioned chapters by eminent scholars of rhetoric from twelve countries, *The Oxford Handbook of Rhetorical Studies* offers students and teachers an engaging and sophisticated introduction to the multidisciplinary field of rhetorical studies. The Handbook traces the history of Western rhetoric from ancient Greece and Rome to the present and surveys the role of rhetoric in more than thirty academic disciplines and fields of social practice. This combination of historical and topical approaches allows readers to chart the metamorphoses of rhetoric over the centuries while mapping the connections between rhetoric and law, politics, science, education, literature, feminism, poetry, composition, philosophy, drama, criticism, digital media, art, semiotics, architecture, and other fields. Chapters provide the information expected of a handbook-discussion of key concepts, texts, authors, problems, and critical debates-while also posing challenging questions and advancing new arguments. In addition to offering an accessible and comprehensive introduction to rhetoric in the European and North American context, the Handbook includes a timeline of major works of rhetorical theory, translations of all Greek and Latin passages, extensive cross-referencing between chapters, and a glossary of more than three hundred rhetorical terms. These features will make this volume a valuable scholarly resource for students and teachers in rhetoric, English, classics, comparative literature, media studies, communication, and adjacent fields. As a whole, the Handbook demonstrates that rhetoric is not merely a form of stylish communication but a pragmatic, inventive, and critical art that operates in myriad social contexts and academic disciplines.

Reference and Beyond Michael Devitt, 2025-07-20 In *Reference and Beyond*, Michael Devitt explores philosophy of language from a naturalistic approach. A dominant theme of this book is the semantics of proper names, definite descriptions, and demonstratives. It shows that these terms have conventional referential uses to express singular thoughts. Those uses are explained by a unified causal theory: a term's reference is largely fixed in an object by a causal link between the person and the object when it is, or was, the focus of that person's perception. Furthermore, Devitt argues that a term's meaning is its largely causal mode of reference. So, a related theme is the rejection of the direct reference view that the meaning of a name is its bearer. Another theme in *Reference and Beyond* concerns thoughts and their ascriptions, including *de se* thoughts and Kripke's Paderewski puzzle. Devitt approaches the semantics of ascriptions from a perspective on thoughts, thus according with the slogan, *Put Metaphysics First*, that governs the author's approach to all philosophical problems. A further framework is naturalism. Languages are parts of the spatio-temporal world playing causal roles in virtue of certain properties, meanings. The task of a theory of language is then to explain the nature of those causally significant properties. The book takes a very dim view of the popular idea that propositions have a place in explanations of meanings. The naturalism leads to a rejection of the received view that theories of language must rest on an evidential base of speakers' intuitions and to a search for a respectable empirical base.

The Philosophy, Theology, and Rhetoric of Marius Victorinus Stephen A. Cooper, Václav Němec, 2022-10-07 Pagan rhetor, (Neo-)Platonist philosopher, Christian theologian This collection of essays is devoted to the rhetoric, Neoplatonic philosophy, and Christian theology of Marius Victorinus, a mid-fourth-century professor of rhetoric and philosopher who converted to Christianity late in life. Scholars from eight different countries, some of whom have not previously published in English, reflect on debates about his writings and theological development. These topics include Victorinus's deployment of philosophical sources for trinitarian theology, possible connections in his work to Origen, Augustine, Plotinus, Porphyry, and Gnosticism, as well as his contributions to Latin rhetoric and dialectic. Contributors include Jan Dominik Bogataj, Michael Chase, Nello Cipriani, Stephen A. Cooper, Volker Henning Drecoll, Lenka Karfíková, Josef Lössl, Václav Němec, Thomas

Riesenweber, Guadalupe Lopetegui Semperena, Miran Špelič, Chiara O. Tommasi, John D. Turner, and Florian Zacher. The chapters in this volume are of great interest to students of late antique philosophy, Christian theology, and Latin rhetoric.
