Materiales educativos Martha Vargas de Avella,2003

Psicología de la Educación Jesús Beltrán,1995-10 Esta obra en la que han intervenido una treintena de profesores universitarios como coautores, constituye un excelente y solido manual de introduccion a la tematica de la psicologia educativa, tanto por su rigor cientifico como por sus aciertos didacticos. Articulado en siete partes (historia, conceptos y metodos, aspectos cognitivos del estudiante, personalidad y motivacion, aprendizaje, interaccion educativa, enseñanza, y contexto social) mantiene no obstante unidad en su corpus tematico y completitud en la problematica general de la disciplina.

The Routledge Handbook of Spanish Language Teaching Javier Muñoz-Basols,Elisa Gironzetti,Manel Lacorte,2018-10-17 The Routledge Handbook of Spanish Language Teaching: metodologías, contextos y recursos para la enseñanza del español L2, provides a comprehensive, state-of-the-art account of the main methodologies, contexts and resources in Spanish Language Teaching (SLT), a field that has experienced significant growth world-wide in recent decades and has consolidated as an autonomous discipline within Applied Linguistics. Written entirely in Spanish, the volume is the first handbook on Spanish Language Teaching to connect theories on language teaching with methodological and practical aspects from an international perspective. It brings together the most recent research and offers a broad, multifaceted view of the discipline. Features include: Forty-four chapters offering an interdisciplinary overview of SLT written by over sixty renowned experts from around the world; Five broad sections that combine theoretical and practical components: Methodology; Language Skills; Formal and Grammatical Aspects; Sociocultural Aspects; and Tools and Resources; In-depth reflections on the practical aspects of Hispanic Linguistics and Spanish Language Teaching to further engage with new theoretical ideas and to understand how to tackle classroom-related matters; A consistent inner structure for each chapter with theoretical aspects, methodological guidelines, practical considerations, and valuable references for further reading; An array of teaching techniques, reflection questions, language samples, design of activities, and methodological guidelines throughout the volume. The Routledge Handbook of Spanish Language Teaching contributes to enriching the field by being an essential reference work and study material for specialists, researchers, language practitioners, and current and future

educators. The book will be equally useful for people interested in curriculum design and graduate students willing to acquire a complete and up-to-date view of the field with immediate applicability to the teaching of the language.

Comprender y transformar la enseñanza José Gimeno Sacristán,Ángel I. Pérez Gómez,2009-12-01 Sin comprender lo que se hace, la práctica pedagógica es una reproducción de hábitos y supuestos dados, o bien respuestas que los profesores dan a demandas y consignas externas. Conocer la realidad heredada, discutir los supuestos de cualquier propuesta y sus posibles consecuencias es una condición de la práctica docente ética y profesionalmente responsable.Las teorías y el pensamiento educativo se presentan en muchos casos como legitimadores de realidades y proyectos con una autoridad técnica que oculta las dimensiones éticas, sociales, pedagógicas y profesionales de los hechos y usos en el sistema educativo. En Comprender y transformar la enseñanza los autores analizan los problemas y prácticas que han sido y son esenciales para llenar de contenido y sentido la realidad de la enseñanza. La obra es la oferta de una reflexión pública sobre el tema y alternativas que son relevantes a cualquier profesor para ayudarle en la clarificación de las opciones que sólo él puede tomar en la realidad profesional en que trabaja.

JUEGOS COOPERATIVOS Y EDUCACIÓN FÍSICA Raul Omeñaca Cilla,Jesús Vicente Ruiz Omeñaca,2007-03-21 La diversión, la alegría, la exploración de las propias posibilidades y la relación con los demás se mantienen para quienes participan en la actividad lúdica, al margen de definiciones y categorías. Lo importante para quien juega es el juego mismo. En consecuencia, desde esta perspectiva, no resulta funcional establecer una definición que permita categorizar inequívocamente una conducta como lúdica. Por lo tanto, debemos distinguir entre lo que es actividad lúdica de lo que no lo es. Para ello, el libro comienza refiriéndose a los rasgos que diferentes investigadores han atribuido al juego para, con posterioridad, buscar una solución ecléctica en su definición. Dividido en tres partes, el libro empieza con una introducción a lo que es el juego, para introducirse, seguidamente, al juego vinculado a la actividad física y finalizar con actividades lúdicas cooperativas y educación física. El libro incluye, además, 263 fichas de juegos. Cada una de ellas describe: la situación inicial, el desarrollo del juego, las variantes y un análisis de contenidos.

Hacia un currículum guiado por las competencias. Propuesta para la acción Irene López-Goñi,Jesús María Goñi Zabala,2015-01-20 Este libro recoge una reflexión sobre los problemas y disfunciones que el actual currículum escolar tiene, planteando elementos para repensar teóricamente el currículum deseable. Los autores hablan del desajuste entre lo que la escuela obligatoria enseña y lo que la sociedad actual demanda, incidiendo en la existencia de graves problemas escolares (alta tasa de fracaso y abandono), derivados, en parte, de esa crisis del saber escolar organizado. ¿Cómo reformular el actual currículum escolar? En estas páginas se plantea como posible solución priorizar aquellos conocimientos que sean útiles para la vida y que estén en la base de las competencias necesarias para el desarrollo personal, la integración social y la inserción laboral. Es lo que los autores denominan un currículum guiado por las competencias. Ofrece, a su vez, una propuesta de

acción para enfrentar esta problemática, basada en el trabajo llevado a cabo en diferentes centros de enseñanza (ikastolas) con la finalidad de poner en práctica un currículum guiado por competencias, aportando datos e información sobre los objetivos, recursos, metodología y forma de evaluación utilizados en esta experiencia.

Colección Oposiciones Magisterio Educación Física. Tema 8 José María Cañizares Márquez,Carmen Carbonero Celis,2016-08-29 Este volumen tiene dos partes claramente diferenciadas: a) Por un lado tratamos diversos aspectos comunes a todos los temas escritos. Es decir, nos centramos en cómo hay que estudiarlos a partir de los propios criterios de valoración del examen que indica la Consejería de Educación de la Junta de Andalucía, y que suelen ser similares a los de otras autonomías. También incluimos los criterios de otras comunidades, pero no de todas porque se nos haría interminable. Esta parte también incluye una serie de consejos acerca de cómo estudiar los temas, cuestión que no es baladí porque el opositor está muy limitado por el tiempo disponible para realizarlo. Esto nos lleva a siguiente punto, el “perfil” de cada opositor, su capacidad grafomotriz muy a tener en cuenta para que en el tiempo dado seamos capaces de tratar el tema elegido con una estructura adecuada a los criterios de evaluación que el tribunal va a usar en la corrección. Es muy corriente el comentario de “mientras más sepas, más nota sacas y más posibilidades de obtener plaza tienes”. Esto trae consigo, en muchas ocasiones, que el opositor se encuentre con “montañas de papeles” sin estructurar, sin saber si un documento reitera lo de otro, sin dominar la capacidad de síntesis ante tanto volumen de definiciones, clasificaciones, teorías, opiniones, etc. La realidad es muy distinta. El opositor debe llevar preparado al menos veinticuatro documentos (para tener el 100% de que le va a salir en el sorteo un tema estudiado concienzudamente), con la información muy exacta de lo que le da tiempo a escribir correctamente desde todos los puntos: científico, legislativo, autores, estructura del propio examen, sintaxis, ortografía, etc. Muchas veces nos han preguntado por el conocimiento de los tribunales, si están al día, etc. Nuestra respuesta ha sido siempre la misma: “sabrán más o menos de cada uno de los veinticinco temas, lo leerán con más o menos detenimiento, pero seguro que lo que más saben es corregir escritos porque lo hacen a diario en sus aulas, de ahí que debamos prestar la máxima atención a estos aspectos formales”. Para ello añadimos al final una hoja-tipo. Completamos este primer capítulo con una tabla de planificación semanal que debemos hacer desde un principio para “obligarnos” y seguirla con disciplina espartana, si de verdad queremos tener éxito. b) Por otro, el Tema 8 totalmente actualizado a fecha de hoy. La persona opositora debe, una vez conozca el volumen de contenidos que es capaz de escribir, hacer un resumen equitativo de cada punto y “cuadrarlo” a su capacidad grafomotriz. A partir de aquí, a estudiarlo... pero escribiéndolo ya que la nota nos la van a poner por lo que escribamos y cómo expresemos esos contenidos. Pero, si en la comunidad donde nos examinemos, el escrito hay que leerlo al tribunal, de nuevo lo haremos, cuanto antes mejor, para ensayar la lectura y que determinadas palabras no se nos “atraganten”.

Concept Mapping in Mathematics Karoline Afamasaga-Fuata'i,2009-04-21 Concept Mapping in Mathematics: Research

into Practice is the first comprehensive book on concept mapping in mathematics. It provides the reader with an understanding of how the meta-cognitive tool, namely, hierarchical concept maps, and the process of concept mapping can be used innovatively and strategically to improve planning, teaching, learning, and assessment at different educational levels. This collection of research articles examines the usefulness of concept maps in the educational setting, with applications and examples ranging from primary grade classrooms through secondary mathematics to pre-service teacher education, undergraduate mathematics and post-graduate mathematics education. A second meta-cognitive tool, called vee diagrams, is also critically examined by two authors, particularly its value in improving mathematical problem solving. Thematically, the book flows from a historical development overview of concept mapping in the sciences to applications of concept mapping in mathematics by teachers and pre-service teachers as a means of analyzing mathematics topics, planning for instruction and designing assessment tasks including applications by school and university students as learning and review tools. This book provides case studies and resources that have been field tested with school and university students alike. The findings presented have implications for enriching mathematics learning and making problem solving more accessible and meaningful for students. The theoretical underpinnings of concept mapping and of the studies in the book include Ausubel's cognitive theory of meaningful learning, constructivist and Vygotskian psychology to name a few. There is evidence particularly from international studies such as PISA and TIMSS and mathematics education research, which suggest that students' mathematical literacy and problem solving skills can be enhanced through students collaborating and interacting as they work, discuss and communicate mathematically. This book proposes the meta-cognitive strategy of concept mapping as one viable means of promoting, communicating and explicating students' mathematical thinking and reasoning publicly in a social setting (e.g., mathematics classrooms) as they engage in mathematical dialogues and discussions. Concept Mapping in Mathematics: Research into Practice is of interest to researchers, graduate students, teacher educators and professionals in mathematics education.

Curriculum cibernetico y gestión del conocimiento Marcelo Careaga Butter, Angélica Avendaño Veloso, 2017 La lenta inclusión de las nuevas tecnologías y la educación constituye un punto de tensión para los sistemas escolares, que cada vez sienten más necesario formar una generación de educadores que comprendan cómo utilizar las tecnologías para una nueva concepción de escuela. Los autores explican los conceptos con tal claridad que hacen de esta una lectura obligatoria para los estudiantes de las carreras de educación, medicina, ciencias de la salud y otras cuyos programas de formación profesional y académica consideren el estudio de cuestiones relacionadas con la integración curricular de las Tecnologías de Información y Comunicación (TIC).

Determinantes Del Rendimiento Académico José Carlos Núñez Pérez, Julio Antonio González-Pienda, 1994 En los últimos años, son numerosos los estudios sobre el papel que el autoconcepto desempeña en la conducta y en el aprendizaje escolar.

Este interés, en parte, viene propiciado por la idea de que cada sujeto actúa y rinde no como lo que es, sino como lo que cree que es. Esta idea es reafirmada por las investigaciones recientes sobre la motivación académica y sobre las características de los sujetos que autorregulan de modo eficaz su aprendizaje. Atender a las percepciones que los estudiantes tienen de sí mismos y de su competencia académica parece crucial en el desarrollo de un modelo comprensivo del aprendizaje escolar y además se deben tener en cuenta a la hora de proyectar la práctica educativa, si se quiere que los alumnos se impliquen activamente en su proceso de aprendizaje. En el libro que aquí se presenta, se aborda de una manera amplia y exhaustiva esta problemática.

La producción escrita: Teoría y práctica desde el tópico discursivo Pablo Enrique Arellano García,2024-07-24

Producir un texto escrito es una de las habilidades de comunicación con mayor complejidad ya que, implica no solo la correcta utilización del lenguaje sino también la capacidad de estructurar ideas de manera coherente y persuasiva. El proceso de escritura abarca múltiples etapas, desde la planificación y organización de las ideas hasta la revisión y edición del texto final. Cada una de estas etapas requiere una reflexión crítica sobre el contenido y un entendimiento profundo del mensaje que se desea transmitir. Al escribir el autor debe considerar el público al que se dirige; esto implica adaptar el estilo y el léxico para que el mensaje resuene de manera efectiva con la audiencia. Por ello, la escritura no se da en un vacío: se desarrolla desde un tópico, es decir, a partir de una idea central o el tema principal que se aborda en un fragmento determinado del texto. Es el elemento sobre el cual gira la información y que guía el desarrollo del contenido.

Educación Y Estilos de Enseñanza ,2003

Teorías del aprendizaje en el contexto educativo Yolanda Heredia Escorza,Ana Lorena Sánchez Aradillas,2020-07-02 Se ofrece esta segunda edición del libro cuya finalidad es presentar a los estudiantes una versión breve pero exhaustiva de los hallazgos que, a lo largo de las últimas cinco décadas, se han descubierto sobre el complejo proceso del aprendizaje. La capacidad de aprender no es únicamente humana, sin embargo esta publicación se centrará únicamente en el aprendizaje humano.
