Designing and Managing a Research Project Michael Jay Polonsky, David S. Waller, 2018-10-03 Designing and Managing a Research Project: A Business Student's Guide is a practical, step-by-step guide that shows business students how to successfully conduct a research project, from choosing the topic to presenting the results. The authors have applied their many years of experience in supervising student projects to provide examples of actual research problems and to offer practical solutions. The inclusion of topics such as supervision, group work and ethics, and both qualitative and quantitative data analysis, along with examples from real student research provide a unique perspective. The new Fourth Edition includes broader types of student project examples, such as an Economics thesis, additional international business cases, increased coverage of Questionnaire Design and Institutional Review Boards, and an integrated case throughout the book on "High Performance Shoes" with supporting materials and data.

Exploration and Engineering Erik M. Conway, 2015-03-30 Although the Jet Propulsion Laboratory in Pasadena, California, has become synonymous with the United States' planetary exploration during the past half century, its most recent focus has been on Mars. Beginning in the 1990s and continuing through the Mars Phoenix mission of 2007, JPL led the way in engineering an impressive, rapidly evolving succession of Mars orbiters and landers, including roving robotic vehicles whose successful deployment onto the Martian surface posed some of the most complicated technical problems in space flight history. In Exploration and Engineering, Erik M. Conway reveals how JPL engineers' creative technological feats led to major breakthroughs in Mars exploration. He takes readers into the heart of the lab's problem-solving approach and management structure, where talented scientists grappled with technical challenges while also coping, not always successfully, with funding shortfalls, unrealistic schedules, and managerial turmoil. Conway, JPL's historian, offers an insider's perspective into the changing goals of Mars exploration, the ways in which sophisticated computer simulations drove the design process, and

the remarkable evolution of landing technologies over a thirty-year period. A masterpiece of research and writing.—Quest: History of Spaceflight Quarterly A 'must' for any reader of modern astronomy who wants insights into how the lab conducts its research, solves problems, and handle[s] technological challenges.—Midwest Book Review A great tale of ambition, mishap and recovery, building on extensive archival research and interviews with JPL managers, scientists and engineers, to deliver a detailed overview of each mission's feats and failures . . . Exploration and Engineering is a great book for everyone seriously interested in the struggles and achievements of JPL as NASA's centre for Mars exploration.—Sky at Night Erik M. Conway is a historian of science and technology at the Jet Propulsion Laboratory, California Institute of Technology. He is the author of Atmospheric Science at NASA: A History.

Good Counsel is designed help organizations fulfill their missions to do the public good. Designed to impart confidence and demystify the issues, Good Counsel is a must-read for nonprofit professionals and board members as well as lawyers and law students. Using Good Counsel as their playbook, lawyers, executives, and trustees can get an overview of the most common legal, governance, and compliance issues facing their organization and together ramp up a top-notch legal function. Contains practice pointers, checklists, and assessment tools Features sample contracts, licenses, and other form documents Filled with case studies and end-of-chapter focus questions, as well as available lesson plans for easy classroom use by educators in business, management, public policy, and law schools Good Counsel is the first-of-its-kind guidebook written by the sitting General Counsel of a major nonprofit. Written by influential author, speaker, and Bar leader Lesley Rosenthal, the General Counsel of Lincoln Center for the Performing Arts, Good Counsel shares the insights of a Harvard Law School graduate with years of in-house and business law experience as well as board service.

Handbook of Construction Management Abdul Razzak Rumane, 2016-08-05 The book is developed to provide significant information and guidelines to construction and project management professionals (owners, designers, consultants, construction managers, project managers, supervisors, contractors, builders, developers, and many others from the construction-related industry) involved in construction projects (mainly civil construction projects, commercial-A/E projects) and construction-related industries. It covers the importance of construction management principles, procedures, concepts, methods, and tools, and their applications to various activities/components/subsystems of different phases of the life cycle of

a construction project. These applications will improve the construction process in order to conveniently manage the project and make the project most qualitative, competitive, and economical. It also discuss the interaction and/or combination among some of the activities/elements of management functions, management processes, and their effective implementation and applications that are essential throughout the life cycle of project to conveniently manage the project. This handbook will:

- Focus on the construction management system to manage construction projects
- Include a number of figures and tables which will enhance reader comprehension
- Provide all related topics/areas of construction management
- Be of interest to all those involved in construction management and project management
- Provide information about Building Information Modeling (BIM), and ISO Certification in Construction Industry
- Offer a chapter on Lean construction
- The construction project life cycle phases and its activities/elements/subsystems are comprehensively developed and take into consideration Henri Fayol's Management Function concept which was subsequently modified by Koontz and O'Donnel and Management Processes Knowledge Areas described in PMBOK® published by Project Management Institute (PMI). The information available in the book will also prove valuable for academics/instructors to provide construction management/project management students with in-depth knowledge and guidelines followed in the construction projects and familiarize them with construction management practices.

International Anti-Corruption Norms Cecily Rose, 2015-08-13 This book traces the creation of international anti-corruption norms by states and other actors through four markedly different institutions: the Organisation for Economic Co-operation and Development, the United Nations, the Extractive Industries Transparency Initiative, and the Financial Action Task Force. Each of these institutions oversees an international instrument that requires states to combat corruption. Yet, only the United Nations oversees anti-corruption norms that take the sole form of a binding multilateral treaty. The OECD has, by contrast, fostered the development of the binding 1997 OECD Anti-Bribery Convention, as well as non-binding recommendations and guidance associated with treaty itself. In addition, the revenue transparency and anti-money laundering norms developed through the Extractive Industries Transparency Initiative and the Financial Action Task Force, respectively, take the form of non-binding instruments that have no relationship with multilateral treaties. The creation of international anti-corruption norms through non-binding instruments and informal institutions has the potential to privilege the interests of powerful states in ways that raise questions about the normative legitimacy of these institutions and the instruments they produce. At the same time, the anti-corruption instruments created under the auspices of these institutions also show that non-binding instruments and informal institutions carry significant advantages. The non-binding instruments in the anti-corruption field have demonstrated a capacity to influence domestic legal systems that is comparable to, if not greater than, that of binding treaties. With corruption and money laundering at the forefront of political debate, International Anti-Corruption Norms provides timely expertise on how states and international institutions grapple with these global problems.

Critical Infrastructure Protection X Mason Rice, Sujeet Sheno, 2016-11-07 The information infrastructure - comprising computers, embedded devices, networks and software systems - is vital to day-to-day operations in every sector: information and telecommunications, banking and finance, energy, chemicals and hazardous materials, agriculture, food, water, public health, emergency services, transportation, postal and shipping, government and defense. Global business and industry, governments, indeed society itself, cannot function effectively if major components of the critical information infrastructure are degraded, disabled or destroyed. Critical Infrastructure Protection describes original research results and innovative applications in the interdisciplinary field of critical infrastructure protection. Also, it highlights the importance of weaving science, technology and policy in crafting sophisticated, yet practical, solutions that will help secure information, computer and network assets in the various critical infrastructure sectors. Areas of coverage include: themes and issues; control systems security; infrastructure modeling and simulation; risk and impact assessment. This book is the tenth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.10 on Critical Infrastructure Protection, an international community of scientists, engineers, practitioners and policy makers dedicated to advancing research, development and implementation efforts focused on infrastructure protection. The book contains a selection of fourteen edited papers from the Tenth Annual IFIP WG 11.10 International Conference on Critical Infrastructure Protection, held at SRI International, Arlington, Virginia, USA in the spring of 2016. Critical Infrastructure Protection is an important resource for researchers, faculty members and graduate students, as well as for policy makers, practitioners and

other individuals with interests in homeland security.

Implementing and Analyzing Performance Assessments in Teacher Education Joyce E. Many, Ruchi

Bhatnagar, 2017-12-01 Teacher education has long relied on locally-developed assessments that lack reliability and validity. Rigorous performance-based assessments for preservice teachers have been advanced as one possible way to ensure that all students receive instruction from a high-quality teacher. Recently, performance-based assessments have been developed which focus on the application of knowledge of teaching and learning in a classroom setting. Our book explores factors related to the implementation of teacher performance assessments in varying state and institutional contexts. The contributors, teacher educators from across the country, focus on what was learned from inquiries conducted using diverse methodologies (quantitative, qualitative, self-studies, and mixed methods). Their research encompassed faculty, supervisors, cooperating teachers, and students' perceptions and concerns of teacher performance assessments, case studies of curricular reform and/or resistance, analyses of experiences and needs as a result of the adoption of such assessments, and examinations of the results of program alignment and reform. The chapters showcase experiences which occurred during high-stakes situations, in implementation periods prior to high-stakes adoption, and in contexts where programs adopted performance assessments as an institutional policy rather than as a result of a state-wide mandate. Endorsements The chapters compiled for *Implementing and Analyzing Performance Assessments in Teacher Education* edited by Joyce E. Many

and Ruchi Bhatnagar, present a thoughtful look at the challenges and solutions embedded in the adoption of teacher performance assessments for preservice teachers. Most chapters feature edTPA, the most commonly used performance assessment now mandated in numerous states and used voluntarily by other programs across the country, and reveal how such assessments shine a bright light on the problems of practice in teacher preparation (stressful timelines, faculty silos, communication with P-12 partners, etc.) when new requirements disrupt the status quo. Each chapter tells a valuable story of performance assessment implementation and approaches that offset compliance in favor of inquiry and educative experiences for candidates and programs alike. Andrea Whittaker, Ph.D edTPA National Director Stanford University Graduate School of Education UL-SCALE Many and Bhatnagar launch the AAPE book series with a curated volume highlighting the contexts in which teacher educators implement and utilize performance assessments in educator preparation. Together, the chapters present research from various viewpoints—from candidates, faculty, university supervisors, and clinical partners—using diverse methodologies and approaches. The volume contributes significantly to the program assessment research landscape by providing examples of how performance assessments inform preparation at the intersection of praxis and research, and campus and field. These chapters provide a critical foundation for teacher educators eager to leverage performance assessments to improve their programs. Diana B. Lys, EdD. Anthropological Expertise and Legal Practice Marie-Claire Foblets, Maria Sapignoli, Brian Donahoe, 2024-06-05 This book draws on concrete cases of collaboration between anthropologists and legal practitioners to critically assess the use of anthropological expertise in a variety of legal contexts from the point of view of the anthropologist as well as of the decision-maker or legal practitioner. The contributions, several of which are co-authored by anthropologist-legal practitioner tandems, deal with the roles of and relationships between anthropologists and legal professionals, which are often collaborative, interdisciplinary, and complementary. Such interactions go far beyond courts and litigation into areas of law that might be called ‘social justice activism’. They also entail close collaboration with the people –often subjects of violence and dispossession –with whom the anthropologists and legal practitioners are working. The aim of this collection is to draw on past experiences to come up with practical methodological suggestions for facilitating this interaction and collaboration and for enhancing the efficacy of the use of anthropological expertise in legal contexts. Explicitly designed to bridge the gap between theory and practice, and between scholarship and practical application, the book will appeal to scholars and researchers engaged in anthropology, legal anthropology, socio-legal studies, and asylum and migration law. It will also be of interest to legal practitioners and applied social scientists, who can glean valuable lessons regarding the challenges and rewards of genuine collaboration between legal practitioners and social scientists. : The Open Access version of this book,
