New Manifestations from the Creation and Thought of the Fantastic Cuéllar Santiago, Francisco Pérez Valero, Vicente Javier, The figure of the monster is, almost from its very definition, a product of the imagination and the scientific and technological skills of its creator, who is usually described as a prodigious and exceptional individual. Beyond the meanings conveyed by representations of the monstrous, however, the central question of all works of fiction that use this resource in the realm of the fantastic is also that of the role of man and the task he sets himself as creator and, therefore, as a true monster, according to the etymological meaning of the Latin *-monstrum*: something unusual, exceptional or a prodigy contrary to the natural order-. The question manifests itself in different ways in the realms of cinema, comics and, of course, literature.

*Ian Ogilvy's Withering Slights* Ian Ogilvy,2022-09-14 Perhaps the most haunting and tormented love story ever written, Emily Bronte's Wuthering Heights is the tale of the troubled orphan Heathcliff and his doomed love for Catherine Earnshaw. This isn't quite that. Ian Ogilvy's Withering Slights is a slightly less haunting but no less tormented love story between the celebrated author and actor, and his ever-looming wife - known simply as SHE. Here within are Mr. Ogilvy's unique and verbatim reviews of many films he's seen with his other half (his stream of consciousness style so beloved of his social media followers), with exclusive reviews written just for this collection. And an Afterword by SHE herself. Gulp.

**Inferno** Ellen Datlow,2023-11-14 This multiple award-winning anthology of twenty psychological and supernatural horror stories explores the outer limits of fear. To create this volume, renowned horror editor Ellen Datlow wrote to her favorite authors asking for stories that would provide the reader with a frisson of shock, or a moment of dread so powerful it might cause the reader outright physical discomfort; or a sensation of fear so palpable that the reader feels impelled to turn up the lights very bright and play music or seek the company of others to dispel the fear. Mission accomplished. The resulting collection draws together some of the most powerful voices in the field: Pat Cadigan, Terry Dowling, Jeffrey Ford, Christopher Fowler, Glen Hirshberg, K. W. Jeter, Joyce Carol Oates, and Lucius Shepard, to name a few. Each author approaches fear in a different way, but all of the stories' characters toil within their own hell. Winner of the 2008 World Fantasy Award, International Horror Guild Award, and Shirley Jackson Award for Best Anthology.

**Corpses, Fools and Monsters** Willow Maclay,Caden Gardner,2024-07-09 A radical history of transness in cinema, and an exploration of the political possibilities of its future. In the history of cinema, trans people are usually murdered, made into a joke, or viewed as threats to the normal order — relegated to a lost highway of corpses, fools, and monsters. In this book, trans film critics Caden Mark Gardner and Willow Catelyn Maclay take the reader on a drive down this lost highway, exploring the way that trans people and transness have evolved on-screen. Starting from the very earliest representations of transness in silent film, through to the multiplex-conquering Matrix franchise and on to the emergence of a true trans-authored cinema, Corpses, Fools and Monsters spans everything from musicals to body horror to avant garde experimental film to tell the story of the trans film image. In doing so, the authors investigate the wider history of trans representation — an exhilarating journey of compromise, recuperation, and potential liberation that they argue is only just the beginning.

**A Conceptual History of Psychology** Brian Hughes,2022-11-17 What is modern psychology and how did it get here? How and why did psychology come to be the world's most popular science? A Conceptual History of Psychology charts the development of psychology from its foundations in ancient philosophy to the dynamic scientific field it is today. Emphasizing psychology's diverse global heritage, the book explains how, across centuries, human beings came to use reason, empiricism, and science to explore each other's thoughts, feelings, and behaviours. The book skilfully interweaves conceptual and historical issues to illustrate the contemporary relevance of history to the discipline. It shows how changing historical and cultural contexts have shaped the way in which modern psychology conceptualizes individuals, brains, personality, gender, cognition, consciousness, health, childhood, and relationships. This comprehensive textbook:

- Helps students understand psychology through its origins, evolution and cultural contexts
- Moves beyond a 'great persons and events' narrative to emphasize the development of the theoretical and practical concepts that comprise psychology
- Highlights the work of minority and non-Western figures whose influential work is often overlooked in traditional accounts, providing a fuller picture of the field's development
- Includes a range of engaging and innovative learning features to help students build and deepen a critical understanding of the subject
- Draws on examples from contemporary politics, society and culture that bring key debates and historical milestones to life
- Meets the requirements for the Conceptual and Historical Issues component of BPS-accredited Psychology degrees.

This textbook will provide students with invaluable insight into the past, present and future of this exciting and vitally important field. Read more from Brian Hughes on his blog at [thesciencebit.net](http://thesciencebit.net)
