Frontier Naturalist Russell M. Lawson, 2012-11-01 This is a true story of discovery and discoverers in what was the northern frontier region of Mexico in the years before the Mexican War. In 1826, when the story begins, the region was claimed by both Mexico and the United States. Neither country knew much about the lands crossed by such rivers as the Guadalupe, Brazos, Nueces, Trinity, and Rio Grande. Jean Louis Berlandier, a French naturalist, was part of a team sent out by the Mexican Boundary Commission to explore the area. His role was to collect specimens of flora and fauna and to record detailed observations of the landscapes and peoples through which the exploring party traveled. His observations, including sketches and paintings of plants, landmarks, and American Indians, were the first compendium of scientific observations of the region to be collected and eventually published. Here, historian Russell Lawson tells the story of this multinational expedition, using Berlandier's copious records as a way of conveying his view of the natural environment. Lawson's narrative allows us to peer over Berlandier's shoulder as he traveled and recorded his experiences. Berlandier and Lawson show us an America that no longer exists.

Volunteers in the Texas Revolution Gary Brown, 2004-09-08 The New Orleans Greys were a group of young men, out for the adventure and money to be gained from war. This book details the importance of their participation in the Battle of the Alamo, as well as several other battles in the rebellion of 1835. Historian Brown has taken some little known history and created a fascinating and well-crafted story for the mainstream reader.

Slavery, Mobility, and Networks in Nineteenth-Century Cuba Daylet Domínguez, Victor Goldgel Carballo, 2023-09-06 With a focus on nineteenth century Cuba, this volume examines understudied forms of mobility and networks that emerged

during Second Slavery. After being forcibly taken across the Atlantic, enslaved Africans were moved within Cuba, and sometimes sold to owners in other Caribbean islands or the U.S. South. The chapters included in this book, written by historians and literary critics, pay special attention to debates between abolitionists and proslavery ideologues, the ways in which people and ideas moved from the countryside to the city, from one Caribbean Island to the next, and from the United States or the coasts of West Africa to the sugarcane fields. They examine how enslaved persons ran away or were captured and coerced to relocate; how they mobilized information and ideas to ameliorate their situation; and how they were used to advance other people's interests. Movement, these chapters show, was regularly deployed to reinforce enslavement and the suppression of rights, while at times helping people in their struggle for freedom. This book will be a great resource for academics, researchers, and advanced students of Latin American Literature, Global Slavery and Postcolonial Studies. The chapters were originally published in the journal *Atlantic Studies: Global Currents*.

The Forgotten Frontier John William Reps, 1981 Americans imagine the Early West as a vast expanse of almost empty land populated only by farmers, ranchers, cattle, and horses. Now a leading scholar challenges this stereotype with his concise examination of early city planning and urban development in the region. Extending and elaborating on studies by Carl Bridenbaugh and Richard Wade of the Atlantic Seaboard and the Ohio Valley, John Reps demonstrates that throughout the Trans-Mississippi West cities and towns, not farms and ranches, formed the vanguard of frontier settlement. Urban communities thus stimulated rather than followed the opening of the West to agriculture. These cities did not grow randomly, for their founders established patterns of streets, lots, and public sites to guide expansion as population increased. Reps supports his thesis with 100 illustrations-plans, maps, surveys, and views-showing the original designs of every major Western city and of dozens of smaller places. Based on Reps's massive *Cities of the American West* (winner of the Beveridge Prize in 1980), this succinct account includes extensive notes and references that will be useful to readers who wish to pursue his penetrating critique.
