The Influence of Attitudes, Beliefs, and Social Factors on Caregivers' Decisions on the Use of OTC Medications in Preschool Children Connie R. Ecklund, 1998 The purpose of this descriptive correlational study was to determine the extent that social factors, health beliefs, and attitudes influenced caregiver's decisions in home management with over-the-counter (OTC) medications. Home management decisions were studied in relation to seeking professional care. The association of

parents' decisions concerning OTC medications with social factors, as well as beliefs and attitudes related to illness, susceptibility and severity, and medication effectiveness was examined. A theoretical framework based on the Health Belief Model (Rosenstock, 1974) guided the conceptualization of this study. A convenience sample of caregivers with an index child of 3 - 5 years of age was recruited through county-based Head Start programs. Approximately 50 caregivers completed the study instrument at monthly parent counsel meetings. Data were analyzed using Pearson product-moment correlational coefficient. Significant correlations were noted between the age of the caregiver, perception of severity of the child's illness, and perception of the child's susceptibility to illness and calling the doctor for advice or intervention. There were also significant correlations between both the economic status of the household and the perceived effect of OTC medications with caregiver's report of when they would give OTC medications. No significant relationships were found between trust in doctors, barriers to seeking care, and gender of the child and either the choice of giving OTC medication or calling the doctor. It has been estimated that more than 50% of all 3 year olds have been given some type of OTC medication (Kogan, et al., 1994). Findings from this study suggest clinical counseling directions for nurses working in primary care settings.

Exploring Discourse Strategies in Social and Cognitive Interaction Manuela Romano, Maria Dolores Porto, 2016-03-31 This volume offers readers interested in Discourse Analysis and/or Socio-Cognitive models of language a closer view of the relationship between discourse, cognition and society by disclosing how the cognitive mechanisms of discourse processing depend on shared knowledge and situated cognition. An inter- and multidisciplinary approach is proposed that combines theories and methodologies coming from Conceptual Metaphor Theory, Multimodal Metaphor Theory, Critical Discourse Analysis, Narratology, Systemic Functional Linguistics, Appraisal Theory, together with the most recent developments of Socio-Cognitive Linguistics, for the analysis of real communicative events, which range from TV reality shows, commercials, digital stories or political debates, to technical texts, architectural memorials, newspapers and autobiographical narratives. Still, several key notions are recurrent in all contributions -embodiment, multimodality, conceptual integration, metaphor, and creativity- as the fundamental constituents of discourse processing. It is only through this wide-ranging epistemological and empirical approach that the complexity of discourse strategies in real contexts, i.e. human communication, can be fully comprehended, and that discourse analysis and cognitive linguistics can be brought closer together.

Social Issues in Living Color Arthur W. Blume, 2017-02-16 Offering fresh and exciting approaches to solving global problems, this book creatively views challenging social issues through the lens of racial and ethnic psychology. As the demographic makeup of the American population continues to evolve, understanding and addressing the psychological needs of ethnic minorities in the United States becomes more important to the overall health and well-being of society. This three-volume set is the first publication to explicitly tackle social issues from the perspective of racial and ethnic psychology. It uniquely presents racial and ethnic psychological perspectives on topics such as media, criminal justice, racism, climate change, gender bias, and health and mental health disparities. Volume one introduces readers to the basic scientific concepts of racial and ethnic minority psychology and then examines the intersectionality of race, ethnicity, gender, and sexual orientation. It also addresses how race and ethnicity affect communication styles, leadership styles, and media. The second volume discusses the experiences of individuals within racial and ethnic minorities, including overt racism, covert racism, and colonialism, and addresses how ethnic minority psychology plays a role in our educational system, poverty, global climate change, and sustainability. The third volume covers ethics in health and research, considers the causes of health and mental health disparities, and identifies diversity initiatives that can improve the health and well-being of all citizens, not just racial and ethnic minority citizens.

Social Work Treatment Francis J. Turner, 2017-03-23 First published in 1974, *Social Work Treatment* remains the most popular and trusted compendium of theories available to social work students and practitioners. It explores the full range of theoretical approaches that drive social work treatment and knowledge development, from psychoanalysis to crisis intervention. A treasure trove of practice knowledge, the text equips professionals with a broad array of theoretical approaches, each of which shine a spotlight on a different aspect of the human condition. Emphasizing the importance of a broad-based theoretical approach to practice, it helps readers avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts. This sweeping overview of the field untangles the increasingly complex problems, ideologies, and value sets that define contemporary social work practice. The result is an essential A-to-Z reference that charts the full range of theoretical approaches available to social workers, regardless of their setting or specialty.

Palliative Care in Amyotrophic Lateral Sclerosis David Oliver,Gian Domenico Borasio,Wendy Johnston,2014-03-20 Amyotrophic Lateral Sclerosis (ALS or motor neurone disease) is a progressive neurodegenerative disease that can cause profound suffering for both the patient and their family. Whilst new treatments for ALS are being developed, these are not curative and offer only the potential to slow its progression. Palliative care must therefore be integral to the clinical approach to the disease. Palliative Care in Amyotrophic Lateral Sclerosis: From diagnosis to bereavement reflects the wide scope of this care; it must cover not just the terminal phase, but support the patient and their family from the onset of the disease. Both the multidisciplinary palliative care team and the neurology team are essential in providing a high standard of care and allowing quality of life (both patient and carer) to be maintained. Clear guidelines are provided to address care throughout the disease process. Control of symptoms is covered alongside the psychosocial care of patients and their families. Case studies are used to emphasise the complexity of the care needs and involvement of the patient and family, culminating in discussion of bereavement. Different models of care are explored, and this new edition utilizes the increase in both the evidence-base and available literature on the subject. New topics discussed include complementary therapies, personal and family experiences of ALS, new genetics research, and updated guidelines for patient care, to ensure this new edition remains the essential guide to palliative care in ALS.

Perspectives on Corporate Social Responsibility Lez Rayman-Bacchus, 2017-03-02 Over the last decade the question of the relationship between organizations and society has been subject to much debate, often of a critical nature. The decade has seen protests concerning the actions of organizations, exposures of corporate exploitation and unfolding accounting scandals. At the same time ethical behaviour and a concern for the environment have been shown to have a positive correlation with corporate performance. The nature of corporate social responsibility is therefore a topical one for businesses and academics. There are, however, many different perspectives upon what is meant by corporate social responsibility and how this might be applied within organizations. The authors involved are respected academics from a variety of disciplines from around the world. The contributions to this book investigate theoretical perspectives on the topic, the application in practice of socially responsible behaviour and the ethical dimension of such behaviour.
