Eric Mielants,Katsiaryna Bardos

Impensar las ciencias sociales Immanuel Wallerstein,1999 Minuciosa crítica del legado de las ciencias sociales del siglo XIX al pensamiento social de finales del siglo XX. En vez de las ideas incorporadas al concepto de “desarrollo”, Wallerstein subraya las transformaciones en tiempo y espacio, que no deberían de considerarse como influencias externas sino como aspectos clave para lo que es la transformación social. Se presenta también un análisis crítico de algunos personajes como Marx y Braudel, cuyas ideas han ejercido influencias en el planteamiento del autor.

Immanuel Wallerstein Carlos Antonio Aguirre Rojas,2013-08-08 Singular libro-entrevista, compuesto de dos partes, persigue un doble objetivo: el de servir como introducción a las principales tesis y contribuciones esenciales desarrolladas, en el último cuarto de siglo, por la creativa perspectiva teórica y analítica del “análisis de los sistemas-mundo”, y el de permitir un acercamiento directo a las ideas y a la concepción del más importante constructor de esta perspectiva, Immanuel Wallerstein.

La decadencia del poder estadounidense Immanuel Maurice Wallerstein,2005 Immanuel Wallerstein sostiene, como idea central que articula este libro, la tesis de que, desde hace aproximadamente tres décadas, Estados Unidos se ha convertido en una potencia hegemónica que vive un claro proceso de decadencia porque, más allá de su todavía indudable superioridad militar planetaria, asistimos en los últimos lustros a su decadencia económica, social, política, cultural y geopolítica. Pero también, plantea la situación y las perspectivas de los actuales movimientos antisistémicos, que luchan contra los terribles efectos de esa decadencia hegemónica de Estados Unidos -como la reciente invasión a Iraq-, y buscan caminos frente a la crisis terminal del capitalismo que ahora atravesamos.

Economic Cycles and Social Movements Eric Mielants,Katsiaryna Bardos,2020-10-04 Economic Cycles and Social Movements: Past, Present and Future offers diverse perspectives on the complex interrelationship between social challenges and economic crises in the Modern World System. Written with a balance of quantitative, qualitative and theoretical contributions and insights, this volume provides a great opportunity to reflect upon the ongoing conceptual and empirical

challenges when confronting the complex interrelations of various economic cycles and social movements. By engaging wide-ranging ideas and theoretical points of view from different disciplines, different countries and different perspectives, this study breaks new ground and offers novel insights into the way the capitalist world economy functions as well as the way social and political movements react to these constraints. Different chapters in this volume bring about novel interdisciplinary approaches to study business cycles, economic changes and social as well as political movements, offer new interpretations and, while examining the complexity of socioeconomic cycles in the long run, present epistemological challenges and a wide variety of empirical data that will increase our understanding of these complex interactions.

Dependency, Neoliberalism and Globalization in Latin America Carlos Eduardo Martins,2019-12-09 The Marxist Theory of Dependency (TMD) managed to articulate the insertion of peripheral societies into the international market with the capital accumulation processes of each country. It has become an essential theory for the understanding of our societies. Since Ruy Mauro Marini laid out its foundations, many transformations have occurred in global capitalism and in our societies, leaving us the challenge of updating it against a more complex context. The real test of theory is its adequacy as an instrument of understanding contemporary reality. The TMD has been enriched and renewed from this work of Carlos Eduardo Martins. It considers capitalism from the perspective of anti-capitalism, dependence from the standpoint of emancipation and reality through a vision for its revolutionary transformation. Emir Sader - CLACSO General Secretary (2006-2012) This book is a revised edition of a work first published in 2011 as Globalização, dependência e neoliberalismo na América Latina by Boitempo Editorial, São Paulo, Brazil. La teoría marxista de la dependencia (TMD) logró articular la inserción de las sociedades periféricas en el mercado internacional con los procesos de acumulación de capital de cada país. Se ha convertido en una teoría esencial para la comprensión de nuestras sociedades. Desde que Ruy Mauro Marini expuso sus fundamentos, muchas transformaciones ocurrieron en el capitalismo global y en nuestras sociedades, poniendo el desafío de actualización en condiciones más complejas La prueba real de la teoría es su adecuación como instrumento de comprensión de la realidad contemporánea. La TMD sale enriquecida y renovada de esta obra de Carlos Eduardo Martins dedicada a pensar el capitalismo bajo la perspectiva del anticapitalismo, la dependencia en la óptica de la emancipación y la realidad en la perspectiva de su transformación revolucionaria. Emir Sader - Secretario General CLACSO (2006-2012)

Problemas metodológicos de las ciencias sociales en el Perú Julio Víctor Mejía Navarrete,2002 Se recoge los avances del pensamiento postpositivista, en especial del papel decisivo del sujeto en la construcción del conocimiento científico. También se resalta las implicancias de la teoría de la reflexividad en el proceso de la investigación social. Finalmente, se analiza las principales técnicas de investigación social desarrolladas en los últimos años.

Investigación en ciencias sociales y transdisciplinariedad Roberto Rivera,Ricardo Andrade,Carlos Delgado,Edgar Vanegas,Carlos Cardona,Manuela Urrea,Alexandre Pomposo,José Alonso Andrade,2021-08-04 Este libro se esfuerza por

promover la exploración conjunta del pensamiento transdisciplinario y con ello, una reflexión acerca de su aplicación metodológica e investigativa. Para ello, integra saberes y experiencias reflexivas, las cuales posibilitan pensar académicamente la investigación en ciencias sociales desde un escenario de transdisciplinariedad. Así, se plantea que el diálogo de saberes, como aptitud e intensión dialógica, a la vez que la transdisciplinariedad, a modo de horizonte epistémico deconstructivo, estrategia investigativa y método, se constituyan en vías o ejes que articulen al contexto la complejidad per se de los fenómenos investigados. En dicho espacio, es posible reconocer desde una mirada compleja marcos epistémicos comunes, la relación entre transdisciplina y metodología de la investigación, campos relacionales del conocimiento, el cuestionamiento a la ciencia moderna y sus métodos, y la importancia de la relación entre Bioética y transdisciplinariedad, tópicos de amplio desarrollo a lo largo de este texto. En aras de revelar nuevos itinerarios y estrategias investigativas aplicables a las ciencias sociales, se propone la necesidad de generar redes de reflexiones y experiencias investigativas que faciliten encuentros, desencuentros y reorganizaciones epistémicas y metodológicas, todas ellas con la capacidad de reconocer y dar cabida a nuevos flujos y discusiones en torno a los desafíos que la investigación integrativa despliega en las ciencias sociales.

La enseñanza de la contabilidad Maria Elena Escobar Ávila,2020-11-01 Con este trabajo se propone una forma de enseñar la contabilidad respuesta a la enseñabilidad de la contabilidad partiendo del concepto demuseo contable como proyecto social de memoria histórica en cultura contable. La importancia de la historia, estudiada bajo la óptica de la complejidad, de la eliminación de las líneas divisorias de las disciplinas sociales y de la transdisciplinariedad y la puesta en la realidad que proporciona un museo virtual, se presenta como respuesta y propuesta de enseñabilidad. El libro utiliza un aparato conceptual referido en especial a teorías como la complejidad, la transdisciplinariedad, el constructivismo, el aprendizaje significativo y la mediación pedagógica, así como también un conjunto de datos precisos provenientes de la convergencia de problemas de las áreas de investigación, docencia y gestión en programas de contabilidad.

Academic Dependency and Professionalization in the South Fernanda Beigel,Hanan Sabea,2023-09-08 Since 1960, an unequal international structure is recognized in terms of production and circulation of knowledge in the international science system. This phenomenon is called academic dependency and motivated actions towards promoting the education of scientist and stimulating the bond between institutions and scholars of the periphery. This, considering that the peripheral knowledge-production structures were compromised by colonialism and its lasting effects.

The Politics of Academic Autonomy in Latin America Fernanda Beigel,2016-03-03 Academic autonomy has been a dominant issue among Latin American social studies, given that the production of knowledge in the region has been mostly suspected for its lack of originality and the replication of Euro-American models. Politicization within the higher education system and recurrent military interventions in universities have been considered the main structural causes for this

heteronomy and, thus, the main obstacles for 'scientific' achievements. This groundbreaking book analyses the struggle for academic autonomy taking into account the relevant differences between the itinerary of social and natural sciences, the connection of institutionalization and prestige-building, professionalization and engagement. From the perspective of the periphery, academic dependence is not merely a vertical bond that ties active producers and passive reproducers. Even though knowledge produced in peripheral communities has low rates of circulation within the international academic system, this doesn't imply that their production is - or always has been - the result of a massive import of foreign concepts and resources. This book intends to show that the main differences between mainstream academies and peripheral circuits are not precisely in the lack of indigenous thinking, but in the historical structure of academic autonomy, which changes according to a set of factors -mainly the role of the state in the higher education system. This historical structure explains the particular features of the process of professionalization in Latin American scientific fields.

Aníbal Quijano Deni Alfaro Rubbo, 2024-09-09 One of the prominent thinkers in the Social Sciences, Aníbal Quijano (1930-2018), has a fundamental work for the compression of contemporary dilemmas since his main theoretical and political concerns have always been linked to the mutations of world capitalism and its reverse paths. This book aims to contribute with analyses of his voluminous and diversified production distributed practically over 60 years of intellectual trajectory. In the first decades, the Peruvian author produced essential works on peasant movements, the urbanization process, and the class structure in Peru and Latin America by mobilizing sociological categories such as marginality, dependency and structural heterogeneity. He devoted himself to investigating imperialist domination in Peru and its implications for social classes and created the journal Sociedad y Política. In the 1990s and 2000s, the Peruvian sociologist published a set of texts on the coloniality and decoloniality of power, which represents a theoretical construction inseparable from the processes and experiences that were occurring in Peru, Latin America and the world, from the "globalization" of "neoliberalism" to global and local resistances. Thus, this book is addressed to all those, with or without specialized training in social sciences, interested in knowing not only the history of social sciences in Latin America but mainly in understanding the historical roots and the political dilemmas of peripheral capitalist societies.

Las incertidumbres de la educación media Velasco Molina, David, Girón Galeano, Yeny, 2019-12-02 En este libro se plantea cómo en el marco del neoliberalismo la educación queda relegada al plano de mediadora entre conocimiento y empleabilidad, acentuando a nivel hegemónico las relaciones sociales de producción que se desprenden de la ecuación diferencial entre Capital y Trabajo.

Constelaciones interdisciplinarias Víctor Manuel Toledo Manzur, 2023-11-10 Víctor Manuel Toledo, un destacado referente académico en el pensamiento ambiental, presenta en su libro una antología de sus contribuciones teóricas y metodológicas. Sus planteamientos se materializan en experiencias concretas, enriqueciendo el libro. Toledo analiza ecos

históricos y se destaca como un crítico comprometido, iluminando posibilidades en medio de la crisis. No se conforma con la descomposición, sino que identifica resistencias y semillas de transformación. El autor abarca temas interdisciplinarios, etnoecología, axioma biocultural, agroecología, espiritualidad, ecología política y metabolismo social. Su obra es un lienzo donde traza proposiciones y conceptos que enseñan y provocan. Además, reflexiona sobre la ciencia y su relación con paradigmas, promoviendo un enfoque integrador y espiritual. Su estilo claro y directo lo convierte en un retratista crítico de la realidad, un hombre rebelde que desafía lo establecido. Esta ofrece herramientas esenciales para comprender el mundo y destaca la importancia de la imaginación y la resistencia en tiempos desafiantes.

La teoría social en América Latina: problemas, tendencias y desafíos actuales Esteban Torres,Juan Pablo Gonnet,2016-01-02 El siguiente libro colectivo recoge un conjunto de análisis críticos sobre la práctica teórica en las ciencias sociales de nuestro país y en menor medida de América Latina. El hecho de ocuparnos de la práctica teórica no es una elección casual. Tampoco remite a la problematización de un área de interés específico entre otras posibles. Por el contrario, constituye un objeto de revisión prioritario para disputar un escenario de investigación en el cual la construcción teórica, pese a su indiscutible centralidad, tiende a presentarse como una tarea prescindible.

Hacia una economía política desde el Sur Ernesto Molina Molina,2022-12-21 La economía es parte fundamental de la vida del ser humano, y la política su guía. Juntas, hacen la base programática de un país, o sistema político. Así lo entendieron en el pasado y así será el futuro. En el presente texto, el autor nos propone una estrategia, una guía necesaria para la sobrevivencia del llamado Sur Político, o sea, todos los países, sin distinción de cultura, religión o continente, que estemos debajo del Norte, o sea, los países industrializados, o del Primer Mundo.

Pedagogía y formación docente en Colombia Absalón Jiménez Becerra,2021-12-01 Sin duda, la instauración de la escuela pública a lo largo del siglo XIX se constituyó en la principal condición de existencia de lo que serían luego las Escuelas Normales, que se configuraron como instituciones especializadas en la formación de maestros de primeras letras, es decir, para los niños de la básica primaria. Luego, en el transcurrir del siglo XX, se conformarían las Facultades de Educación para la formación de 'licenciados', dueños de un saber disciplinar, quienes formarían ya no a niños, sino a los adolescentes y jóvenes de la educación media o básica secundaria. En el presente escrito el lector podrá dar cuenta de las tensiones, los encuentros y las diferenciaciones de esta primera experiencia de formación institucional y comunitaria, en lo que respecta a la formación docente —la formación de maestros y la formación de licenciados—. El peso relativo que en cada uno de ellos tiene la pedagogía como disciplina fundante en su proceso formativo; la importancia del estatuto de infancia; la reivindicación del contacto con la escuela y la práctica pedagógica; y la reivindicación disciplinar o científica, no solo de un saber específico, sino de la pedagogía en su proceso formativo. Una vez constituidas las instituciones modernas como Escuelas Normales y Facultades de Educación, aparecen las disposiciones pedagógicas y las políticas de formación docente

que han buscado profesionalizar a un funcionario del Estado, de carácter laico y civil. La formación docente hace referencia a la adquisición de saberes a nivel profesional y emocional para desarrollar dicha labor; en términos de política puede ser vista como parte de un perfeccionamiento permanente de quien se dedica a la educación y a la formación de personas, particularmente niños y jóvenes, como también de quien está al tanto de las prácticas de enseñanza y de aprendizaje en las escuelas y colegios. Esta formación ha pasado de ser una experiencia institucional y comunitaria a ser vista como sinónimo de 'socialización' e internalización de la realidad escolar, de 'profesionalización de un sujeto inacabado' que debe desenvolverse en un escenario profesional que nunca termina de conocer o como un ejercicio 'de formación continua'; como sinónimo de un espacio pensado para 'la innovación y el cambio de las prácticas pedagógicas', que establece como centro de preocupació.

Modernidades periféricas Adolfo Chaparro Amaya, 2020-04-27 Esta obra se propone problematizar los conceptos a través de las cuales académicos e intelectuales han intentado aclarar cómo y por qué las tradiciones premodernas, las expectativas de la modernidad y los efectos de la condición posmoderna resultan indiscernibles a la hora de describir las sociedades latinoamericanas. El resultado es un texto fronterizo en el que se inscriben múltiples racionalidades insertas en formas de vida complejas y contradictorias entre sí que definen las distintas épocas y formaciones sociales a partir de la Conquista de América. Visto en conjunto, si en la primera parte del libro se impone la pregunta por la presencia del pasado prehispánico en el presente de la modernidad colonial y el de la colonialidad en la República, en la segunda prima lo paradójico, lo múltiple y lo heterogéneo que caracteriza las periferias contemporáneas. Con el trasfondo de la discusión filosófica contemporánea, este libro es un trabajo de archivo conceptual atraído por el proyecto de una teoría que dé cuenta de las sociedades periféricas en el devenir de su propia modernidad.

Cuestiones de familia, 2007 Este libro es la resultante del trabajo realizado por los miembros del Equipo Familia del Grupo de Investigación Programa de Estudios sobre Población y Trabajo [P&T] de la Facultad de Humanidades de la Universidad Nacional de Mar del Plata. Un aporte a los saberes sobre la familia desde distintas perspectivas disciplinares. Una mirada a la sociedad desde una de sus instituciones medulares puede permitir una más precisa y compleja interpretación de la propensión o resistencia a un cambio social tendiente a condiciones sociales más equitativas. -- Descripción del editor.
