**Tae Kwon Do - The Way to Win** Konstantinos Beis,2020-10-07 The present INTERACTIVE BOOK expands on the evolution of Taekwondo as an Olympic sport, revealing the hidden parts of a competition, supporting everyday training in theory and describing every technique used with combinations in detail (Kinesiology, Kicks, Punches - 477 techniques). Emphasis is paid on categorizing kicks and kinesiology and organizing techniques into homogenous categories with the purpose of making their learning and use easier and in the right way. The book contains EVERY (Kinesiology and Kicking) technique, without exceptions, that has been used in Taekwondo - WTF competitions throughout the years. The change in sparring regulations substantially affects the use of techniques (some techniques are being favoured more often, some are being marginalized, etc). The reader has an opportunity to find and choose those techniques and combinations that suit him/her better. Each technique is broken down in variations of attacks and counterattacks. The basic form of the technique is described first, followed by combinations with other techniques and variations, according to level of difficulty (easy to difficult). The order in which the techniques have been assembled facilitates faster learning, enabling the reader to memorize them in a sequence and use them later on in sparring automatically, from memory alone. Technical execution and tactic used in competitions are described in every move, taking into account other parameters such as flexibility, injuries, analysis of advantages and disadvantages of every movement, common mistakes committed by trainees, and the negative consequences of mistakes. The book consists of 402 pages and contains 24 Chapters. The Theory part includes: Analysis of competition Taekwondo, Brain function in competition, Injuries (causes, prevention, treatment), Improving Performance, Teaching & Methodology, Technical components of kicking, Evolution of competition and training as a result of the electronic scoring system. Practice Part A is an analysis of Kinesiology: Fighting stances & blocking, Steps (attack & counterattack, changes of stance), Feints, Sideways movement, Clinching. Practice Part B is an analysis of Kicks: Mirro chagi, Yop chagi, Bituro chagi, Paltung chagi, Dollyo chagi, Naerio chagi, An chagi, Bakat chagi, Dwit chagi, Huryeo chagi, Bandal Dollyo chagi, Double kicking techniques, Triple kicking techniques, and Punching. The book has been enriched with 231 Images, 44 tables and 64 quotes that are most relevant to the context. The purposes of these adages is for the reader to become acquainted with the high intellect of wise individuals and be exposed through their wisdom to a positive stimulus for inner culture, a sparkle for thinking to improve, enlightened, and of better quality. Every technique is presented online and realistically in videos, in the same order and number as described in the book. Access to videos is gained through the unique codes at:

**Taekwondo** Marc Tedeschi,2022-07-20 The most comprehensive book ever written on Taekwondo's most widely practiced forms systems, including those sanctioned by the World Taekwondo Federation: P'algwae, T'aeguk, and WTF Black Belt. ----- This unique text is the first to offer a detailed, comprehensive presentation of Taekwondo's three most widely practiced forms systems, including those sanctioned by Taekwondo's largest governing organization, the World Taekwondo Federation. More than 5,000 photographs and 1,200 drawings spanning 512 pages document 25 individual forms that make up the P'algwae, T'aeguk, and WTF Black Belt forms systems. Detailed introductory chapters provide a brief overview of Taekwondo's structure, review the historical origins of forms, outline general principles of execution and interpretation, and thoroughly describe the underlying philosophical concepts and meanings associated with each individual form and form system. In subsequent chapters, each of the 25 forms begins with summary pages for quick reference, followed by a detailed breakdown of each movement, which includes larger photos, descriptive text, alternate views, closeups of complex actions, Korean nomenclature, precise footwork drawings, pattern diagrams on every page for constant reference, and examples of select movements applied to practical self-defense. Since forms training is intended to be a reflection of actual combat, descriptive text also outlines the combative purpose behind each movement, as well as common alternate interpretations. While many books on forms have been produced over the years, none offer the level of detail, accuracy, and technical description provided by this text.
