La antropología Javier San Martín,1985

Antropología y feminismo Henrietta L. Moore,1991 El objetivo de este estudio es analizar las aportaciones de la teoría feminista a la antropología y algunas áreas de esta disciplina científica. La obra se estructura en cinco capítulos en los que se examinan los aspectos históricos de la relación entre feminismo y antropología, el debate sobre el género y el futuro de los estudios antropológicos comparativos, la relación entre la antropología marxista y la antropología feminista, el capitalismo y la modificación del ámbito laboral y de la división sexual del trabajo, las teorías feministas sobre la relación entre tareas productivas y reproductoras dentro del sistema capitalista, los cambios en la estructura familiar, la mujer y el estado: La mujer en las sociedades socialistas, la mujer en las instituciones políticas, burocráticas y de decisión y las instituciones estatales y la resistencia de las mujeres. Por último, se exponen las nuevas aportaciones y perspectivas de la antropología feminista.

Antropología mexicana Julio César Olivé Negrete,2000-01-01

Antropología lingüística Alessandro Duranti,2000-05-25 Este libro parte del presupuesto de que la antropología lingüística es una disciplina con entidad propia, que merece estudiarse tanto por sus logros pasados como por las perspectivas de futuro que se vislumbran en el trabajo de un grupo activo de investigadores interdisciplinares. Sus contribuciones sobre la naturaleza del lenguaje como instrumento social, y del habla como práctica cultural, han establecido un campo de investigación que imprime un nuevo sesgo a las tradiciones del pasado y a las actuales dentro de las humanidades y las ciencias sociales, y nos invita a todos a pensar de nuevo la relación entre lenguaje y cultura.

Fundamentos de antropología rural ,1994

Antropología urbana Amalia Signorelli,Raúl Nieto Calleja,1999 Partiendo de la investigación de campo de algunas antiguas ciudades italianas, sometidas a violentos procesos de masificación, la autora aborda los problemas centrales de una antropología urbana, considerando las diversas concepciones del mundo y de la vida, los sistemas cognitivos-valorativos constituidos en y por los contextos urbanos, las dinámicas culturales que se entrelazan en el tejido híbrido y complejo de toda metrópoli actual, proponiendo una vía entre el racionalismo urbanístico y sociológico, que concibe la ciudad como espacio

abstracto, y el empirismo antropológico, a menudo limitado a descubrir las peculiaridades de lo concreto.--Página [4] de la cubierta.

El texto aborda la teoría de la interpretación y las vertientes que los antropólogos y otros científicos sociales le imprimen con el fin de interpretar y comprender nuestro entorno.

Antropología Carmelo Lisón Tolosana,2005

Artefactos metodológicos para las ciencias sociales desde la antropología y el pragmatismo Elías Sevilla Casas,2022-12-06 Este libro estudia y comenta los fundamentos éticos y epistémicos de la investigación en las ciencias sociales. Los primeros atienden al qué, por qué, para qué, y con quién se investiga; los segundos al cómo. Se focaliza el cómo sin olvidar los otros interrogantes que encarnan los valores que orientan el trabajo y la vida. Artefactos fue escrito pensando en investigadores y docentes que desean ir un poco más allá de las reglas y protocolos de los manuales estándar de investigación científica. Los complementa. Profundiza en aquellas razones (wording) que eventualmente llevan a revisar y modificar lo aceptado para que la investigación cumpla mejor su tarea de mejorar el mundo en que vivimos (worlding). La mediación entre los dos componentes W y W, es decir W/W, se llama Metodología, con mayúscula. Es el ejercicio a que se dedica el texto. Detrás de esta propuesta hay 50 años de trabajo y reflexión desde cuando el autor, después de obtener su PhD en Northwestern University, área de Chicago, se dedicó en Colombia a la docencia (en todos los niveles, desde pregrado a doctorado), a la investigación y a la intervención social y política tanto en sectores rurales como urbanos. Para hacerla el autor acude a los autores 'últimos'. Son aquellos muy antiguos o muy recientes que están detrás de los conceptos y esquemas con que se teje el texto. Estas ideas se toman selectivamente de tres fuentes principales: la antropología como empresa global intelectual; el pragmatismo como filosofía de la vida y del conocimiento; y los saberes ancestrales andinos que han

tejido por siglos fibras materiales, y también conocimiento y vida. Al estudiar estos saberes se da preferencia a una concepción unitaria de la materia, la que va desde las metáforas y símbolos hasta los electrones de la mecánica cuántica. Por tratarse de ciencias sociales, concentra la atención en el dominio que los físicos llaman ‘macroscópico’. Allí se estudian las relaciones y conexiones que los agentes humanos establecen entre sí y con los otros agentes de los procesos biológicos, químicos y físicos. La mejor estrategia de lectura sería aquella en que el lector tiene en mente su propio molino (proyecto) al que lleva el agua de la exposición que hace el autor. Sería una aplicación en el dominio académico del consabido acrónimo CVY, “cómo voy yo”; o “cómo he ido yo” en los casos de investigadores experimentados.

ANTROPOLOGÍA Y DIVERSIDAD CULTURAL. LECTURAS CLÁSICAS Y CONTEMPORÁNEAS PÉREZ GALÁN, Beatriz ,Katarzyna Porada, Desde una perspectiva crítica, reflexiva y de género, los textos incluidos en este volumen tienen como objetivo proporcionar a los lectores herramientas teóricas y metodológicas básicas para acercarse al estudio de la diversidad humana en sus múltiples dimensiones. Situado en diferentes tiempos y áreas etnográficas, el libro aborda la naturaleza cultural de los procesos socioeconómicos tanto dentro como fuera del mercado, los sistemas de parentesco y organización familiar en diferentes contextos, las prácticas políticas, los sistemas de dominación y las estrategias de resistencia, los sistemas sexo-género y la construcción social de las desigualdades, y, por último, algunos campos de aplicación del conocimiento antropológico enfatizando la necesaria relación entre teoría y práctica.

Antropología unicista de mercado Peter Belohlavek,

Antropología y colonialismo en África Subsahariana Nuria Fernández Moreno,2009-10-29 Este libro nos ofrece un estudio de algunas parcelas de las culturas de África Subsahariana a través de los trabajos antropológicos realizados. La primera parte del libro, comprende tres capítulos dedicados respectivamente a: contextualizar la trayectoria histórica del colonialismo, analizar el vínculo entre el colonialismo y la disciplina antropológica y exponer el desarrollo que tuvo la disciplina en el ámbito europeo, las escuelas teóricas y los principales autores que en aquel tiempo realizaron trabajos en África. La segunda parte del libro, recoge una selección de trabajos etnográficos y de extractos de monografías sobre África subsahariana agrupados en cuatro epígrafes: parentesco, religión, política y economía.

Antropología, bioética e ingeniería genética José R. Lezama Q.,2002

Antropología Juan Oliver Sánchez,2019-09-05 La antropología estudia la variabilidad biológica y cultural del ser humano en el espacio y en el tiempo. La segunda edición del presente libro, completamente actualizada, ofrece una introducción multidisciplinar a las distintas dimensiones que constituyen su amplio campo, desde la biológica, la ecológica, la económica, su estructura social y actividad política hasta su organización cognitiva y simbólica, y la relación entre cultura y personalidad. Asimismo, expone los fundamentos metodológicos de las técnicas de recogida de datos para el diseño de un proyecto de investigación, de forma que por su alcance y tratamiento constituye un texto imprescindible para los estudios de

ciencias sociales.

Textos de antropología contemporánea Francisco CRUCES VILLALOBOS,Beatriz PÉREZ GALÁN,2011-04-28 Esta compilación busca proporcionar al estudiante elementos de crítica reflexiva en relación con el canon heredado en antropología, mostrando algunas áreas que se han desarrollado en las últimas décadas en estrecha relación con otras disciplinas. Abordan asuntos como el relativismo cultural, la importancia de la diferencia y su representación en el lenguaje, las gramáticas identitarias, los sistemas etnocientíficos de clasificación, los relatos de movilidad global, el papel de la música en la vida cotidiana, las transformaciones urbanas y ciudadanas, el análisis del poder y la autoridad, las diferencias e inequidades de género, las relaciones entre cultura y desarrollo, la aplicación del conocimiento etnográfico a los sistemas de salud.
