Critical Thinking Alec Fisher, Michael Scriven, 1997 In this book, Alec Fisher aims to teach directly an important range of thinking skills. The skills are fundamental critical (and creative) thinking skills, and they are taught in a way which expressly aims to facilitate their transfer to other subjects and other contexts. The method is to use 'thinking maps' which help improve thinking by asking key questions of students when they are faced with different types of problems. Alec Fisher explains the language of reasoning, how to understand different kinds of arguments and how to ask the right question. Other topics include: different patterns of reasoning and standards which apply in different contexts, how to clarify and interpret ideas, how to judge the credibility of claims, and how to decide whether a person really justifies their conclusions, given their audience. Particular attention is given to understanding casual explanations and evaluating decisions. The book includes many examples and exercises which give extensive practice in developing critical-creative thinking skills.

Transforming Critical Thinking Barbara J. Thayer-Bacon, 2000-03 Thayer-Bacon argues that factors such as race, gender, and social status have direct bearing on philosophical inquiry: by abstracting theorists from their personal and social contexts, the absolutism of traditional critical thinking philosophies come into question. Thayer-Bacon encourages reevaluating the diversity of inquiry and suggests that diversity is a factor which constructs philosophy.

Critical Thinking and Language Tim John Moore, 2011-10-13 This book clarifies the idea of critical thinking by investigating the 'critical' practices of academics across a range of disciplines. Drawing on key theorists - Wittgenstein, Geertz, Williams, Halliday - and using a 'textographic' approach, the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching. Critical thinking is one of the most widely discussed concepts in debates on university learning. For many, the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of 'higher education'. But whilst there is general agreement about its importance as an educational ideal, there is surprisingly little agreement about what the concept means exactly. Also at issue is how and what students need to be taught in order to be properly critical in their field. This searching monograph seeks answers to these important questions.

Critical Thinking Jennifer Moon, 2007-09-12 In this book, Jennifer Moon explores and clarifies critical thinking and provides practical guidance for improving student learning and supporting the teaching process. Key themes covered

include: different views of and approaches to critical thinking with an emphasis on a practical basis that can be translated into use in the classroom. links between learning, thinking and writing the place of critical thinking alongside other academic activities such as reflective learning and argument critical thinking and assessment, class environments, staff knowledge and development, writing tasks and oral tasks. Teachers in all disciplines in post-compulsory education will find this approach to defining and improving students' critical thinking skills invaluable.

Handbook of Research on Critical Thinking and Teacher Education Pedagogy Robinson, Sandra P.A., Knight, Verna, 2019-04-12 Critical thinking is an essential skill for learners and teachers alike. Therefore, it is essential that educators be given practical strategies for improving their critical thinking skills as well as methods to effectively provide critical thinking skills to their students. The Handbook of Research on Critical Thinking and Teacher Education Pedagogy examines and explains how new strategies, methods, and techniques in critical thinking can be applied to classroom practice and professional development to improve teaching and learning in teacher education and make critical thinking a tangible objective in instruction. This critical scholarly publication helps to shift and advance the debate on how critical thinking should be taught and offers insights into the significance of critical thinking and its effective integration as a cornerstone of the educational system. Highlighting topics such as early childhood education, curriculum, and STEM education, this book is designed for teachers/instructors, instructional designers, education professionals, administrators, policymakers, researchers, and academicians.

The NPEC Sourcebook on Assessment: Definitions and assessment methods for critical thinking, problem solving, and writing T. Dary Erwin, 2000 Volume 1 of this sourcebook is a compendium of information about tests used to assess critical thinking, problem solving, and writing. It serves as a tool for people who want comparative data about the policy relevance of specific student outcomes measured in these areas. An interactive version of Volume 1 allows users to specify their areas of interest and create a customized search of assessment measures in the three domain areas. The tests described in Volume 1 are those that are designed to measure cognitive variables for traditional students. The compendium does not describe less traditional methods such as portfolios and competencies. In addition, the evaluations of the tests are based on the way test developers represent them in their materials and, in some cases, in information from third-party reviews. Volume 2 is a companion volume that provides eight case studies of institutions that have addressed related issues through the use of assessment methods in Volume 1. Volume 1 contains the following sections: (1) General and Specific Issues in Selecting Assessments; (2) Critical Thinking and Problem Solving; (3) Templates--Critical Thinking and Problem Solving; (4) Writing; (5) Templates--Writing Commercially Developed Tests; and (6) Templates--Writing Locally Developed Tests. Volume 2 discusses the eight case studies and contains four appendixes providing details about the methodology. (Volume 1 contains 10 tables and 150 references.) (SLD)

Critical Thinking for Global Citizenship Education Brigid Golden, 2025-06-17 This open access book shares a two-part conceptual framework for critical global learning which weaves together theory and practice. The author shares the outcomes of her research and experiences developing students' critical thinking skills within the context of global citizenship education. While rooted in literature and research findings, the book is personal and reflexive, as the author shares her experiences as a teacher trying, and sometimes failing, to support critical thinking development which allows readers to reflect on their own practice. The book will be of interest to academics working in higher education, initial teacher education, and global citizenship education.

Handbook of Research on Critical Thinking Strategies in Pre-Service Learning Environments Mariano, Gina J., Figliano, Fred J., 2019-01-25 Learning strategies for critical thinking are a vital part of today's curriculum as students have few additional opportunities to learn these skills outside of school environments. Therefore, it is of utmost importance for pre-service teachers to learn how to infuse critical thinking skill development in every academic subject to assist future students in developing these skills. The Handbook of Research on Critical Thinking Strategies in Pre-Service Learning Environments is a collection of innovative research on the methods and applications of critical thinking that highlights ways to effectively use critical thinking strategies and implement critical thinking skill development into courses. While highlighting topics including deep learning, metacognition, and discourse analysis, this book is ideally designed for educators, academicians, researchers, and students.

Critical Thinking and Reasoning Daniel Fasko, Jr., Frank Fair, 2020-10-12 The Partnership for 21st Century Skills states that critical thinking encompasses skills that students and professionals will need to succeed in their careers, school, and life. The demand for critical thinkers will increase in the future to meet the demands of world-wide problems. Educators need to show students how to eliminate errors, such as biases in their reasoning, and to be effective decision makers. To do this, teachers and leaders in schools and businesses need to provide an atmosphere conducive to developing critical thinking skills and dispositions. Meeting this challenge is the goal of the chapters collected in Critical Thinking and Reasoning. This book begins with experts laying out their best current understanding of the skills and attitudes critical thinking requires. Next, the relationship between critical thinking and the psychology of development and learning is explored to understand better how to develop critical thinkers from childhood to adulthood. But how can we best teach for critical thinking? How can we incorporate into the classroom the challenges presented in the workplace? This book provides several extensive examples of current practices from the elementary level through the secondary level to the university level of how to stimulate critical thinking skills and dispositions.

Fostering Critical Thinking Through Collaborative Group Work Dennis Chun-Lok Fung, Tim Weijun Liang, 2018-09-11 This book reports on studies contextualised within the curriculum development of General Studies in primary education and

Liberal Studies in secondary education in Hong Kong. Both areas call for a learning environment that is conducive to the use of collaborative group work to foster critical thinking. By employing a mixed-methods approach and undertaking a teaching intervention based on Anderson et al.'s (2001) study, the book evaluates the effectiveness of group work in learners' development of critical thinking skills and mindsets. In addition, it examines the influence of Chinese culture on the practice of group work. Findings from primary and secondary classrooms are subjected to a comparative analysis, yielding valuable insights into the relevance of group work for promoting critical thinking.

Handbook of Research on Advancing Critical Thinking in Higher Education Wisdom, Sherrie, Leavitt, Lynda, 2015-07-17 The importance of critical thinking has surged as academics in higher education realize that many students, upon entering college, lack the critical thinking skills necessary to succeed. While much has been written regarding the 'lack' of critical thinking, less has been written on the success of methods implemented to develop this fundamental skill. The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies. Due to the difficulties associated with teaching critical thinking skills to learners of any age, this publication is a crucial addition to the scholarly reference works available to pre-service and early career teachers, seasoned educational professionals, professors across disciplines, curriculum specialists, and educational administrators.

Enabling Health and Healthcare through ICT Omid Shabestari, Alex Mu-Hsing Kuo, 2013-02-15 For many people in both developing and developed countries universal healthcare is still not the norm. Socio-economic status and geographical restrictions have proved to be major barriers to accessible care. The use of information and communication technologies (ICT) is growing rapidly internationally as the need to provide more efficient and cost-effective care becomes increasingly urgent. Improving the health of a nation begins with the individual and recent developments in genomics and mobile networked information technologies have regenerated interest in individualizing healthcare. Harnessing the diversity and ubiquity of available ICT may be one of the keys to enabling more accessible healthcare across both geographic and socio-economic divides. This book presents the proceedings of the 2013 Information Technology and Communication in Health (ITCH 2013) conference. This conference, entitled Available, Tailored and Closer, was held in Victoria, BC, Canada, in February 2013. The theme of the ITCH 2013 conference was realizing the enabling potential of information and communications technology worldwide. Papers in this book are arranged according to subject. Sections include: electronic health records; telecare, telemedicine and telaboratory; public health informatics; clinical decision support systems; human/computer interaction; patient safety; and healthcare modeling, among others. This book will be of interest to all those involved in providing improved and cost-effective healthcare worldwide.

Developing Critical Thinking in EFL Classes Yue Lin, 2018-02-09 This book presents an innovative teaching experiment and an analytical study of critical thinking and the sociocultural theory of learning to illustrate the cognitive learning development mechanisms. It addresses the issues in developing critical thinking, including the controversy

surrounding the definition, measurement and teaching of critical thinking, particularly in the L2 context. The book explains how infusion-thinking lessons can be structured to help students develop critical thinking along with language learning. Further, it uses a case study as a real-world example to examine the applicability and feasibility of infusion-thinking lessons in the EFL context and their effectiveness in developing students' critical thinking and language learning. Packed with thinking activities and techniques, this practical, hands-on manual provides original ideas and empirical data, giving teachers everything they need to plan their lessons to improve students' critical thinking within language courses and evaluate their teaching.

Critical Thinking for Nursing, Health and Social Care Rena Frohman, Karen Lupton, 2020-04-02 This practical book will equip students with the critical thinking, reading and writing skills required to succeed both on their course and in their professional placements. It takes readers through the core stages of working on an assignment, from finding and evaluating sources through to critically reading material and demonstrating critical analysis in their writing. With chapters featuring content-specific examples and engaging exercises, this book is an essential resource for undergraduate students of Nursing, Health, Social Care and related disciplines.

Critical Thinking and Education John E. McPeck, 2016-09-13 The skills of 'critical thinking' occupy a contentious place in debates on education. It is of course widely recognised that education must consist of more than an unreasoning accumulation of facts and skills, and that modern society demands a highly-developed critical awareness to cope with its ever-increasing complexities. Yet the very term 'critical thinking' threatens to become a vague and unexamined slogan, displayed more in party tricks than in useful knowledge. In this book, first published in 1981, Professor McPeck offers a critique of the major ideas and important work in the field, including those of Ennis and de Bono, while at the same time presenting his own rigorous ideas on the proper place in critical thinking in the philosophy of education. The book aims to establish a sound basis on which the role of critical thinking in schools can be evaluated and the author makes a strong case for the contribution it can make to resolving current dilemmas of the curriculum.

Critical Thinking in Long-term Care Nursing Shelley Cohen, 2008 *Critical Thinking in Long-Term Care Nursing: Skills to Assess, Analyze and Act*, is an easy-to-read resource that explains the principles of critical thinking and how to encourage nurses to use critical thinking methods. This essential book covers how to lead classroom sessions for new graduate nurses and experienced nurses to develop critical thinking skills, including successful classroom processes and learning strategies.
