**The Robot Who Looked Like Me** Robert Sheckley, 2014-05-13 "If the Marx Brothers had been literary fantasists, they would have been Robert Sheckley." —Harlan Ellison In "The Robot Who Looked Like Me," a busy man and a busy woman find a way to carve out time to romance each other—by having look-alike robots made to do the job—who then run away together. Open Road is proud to republish his acclaimed body of work, with nearly thirty volumes of full-length fiction and short story collections. Rediscover, or discover for the first time, a master of science fiction who, according to the New York Times, was "a precursor to Douglas Adams."

**The Robots Are Coming!** Andres Oppenheimer,2019-04-30 Staying true to his trademark journalistic approach, Andrés Oppenheimer takes his readers on yet another journey, this time across the globe, in a thought-provoking search to understand what the future holds for today's jobs in the foreseeable age of automation. *The Robots Are Coming!* centers around the issue of jobs and their future in the context of rapid automation and the growth of online products and services. As two of Oppenheimer's interviewees -- both experts in technology and economics from Oxford University -- indicate, forty-seven percent of existing jobs are at risk of becoming automated or rendered obsolete by other technological changes in the next twenty years. Oppenheimer examines current changes in several fields, including the food business, legal work, banking, and medicine, speaking with experts in the field, and citing articles and literature on automation in various areas of the workforce. He contrasts the perspectives of techno-optimists with those of techno-negativists and generally attempts to find a middle ground between an alarmist vision of the future, and one that is too uncritical. A self-described cautious optimist, Oppenheimer believes that technology will not create massive unemployment, but rather will drastically change what work looks like.

**More of Monkey & Robot** Peter Catalanotto,2014-03-18 Four stories about best friends Monkey and Robot, who try out Halloween costumes, visit the beach, consider what to do with a tire they find, and figure out if it's morning or night.

**Joe'S Trip Around the Sun** Mark D. Weeks,2017-01-23 Joes Trip Around the Sun is a novel for anyone who has ever felt the apparent conflict between religion and the discoveries of modern science. It tells the story of everyman Joe Gray, a humble trucker desperate to find evidence for the spiritual world and his own place within it. Lonely in his reluctant agnosticism, yet inspired by a persistent sense of the metaphysical, Joe must endure a harrowing journey beset with mind-bending technological obstacles, heartbreaking setbacks, and near-death experiences, before he has any chance of uncovering the truth. But will it be in time to be reunited with the love of his life? Will this newfound understanding enable

him to overcome a dark evil that has grown to threaten the world? Joes Trip Around the Sun blurs the line between the physical and spiritual worlds to the point where the reader may question the existence of that demarcation altogether.

**Suggested in the Stars** Yoko Tawada,2024-10-01 On the heels of *Scattered All Over the Earth*, Yoko Tawada's new and irresistible *Suggested in the Stars* carries on her band of friends' astonishing and intrepid adventures. It's hard to believe there could be a more enjoyable novel than *Scattered All Over the Earth*—Yoko Tawada's rollicking, touching, cheerfully dystopian novel about friendship and climate change—but surprising her readers is what Tawada does best: its sequel, *Suggested in the Stars*, delivers exploits even more poignant and shambolic. As Hiruko—whose Land of Sushi has vanished into the sea and who is still searching for someone who speaks her mother tongue—and her new friends travel onward, they begin opening up to one another in new and extraordinary ways. They try to help their friend Susanoo regain his voice, both for his own good and so he can speak with Hiruko—and amid many often hilarious misunderstandings (some linguistic in nature)—they empower each other against despair. Coping with carbon footprint worries but looping singly and in pairs, they hitchhike, take late-night motorcycle rides, and hop on the train (learning about railway strikes but also packed-train-yoga) to convene in Copenhagen. There they find Susanoo in a strange hospital working with a scary speech-loss doctor. In the half-basement of this weird medical center (with strong echoes of Lars von Trier's 1990s TV series *The Kingdom*), they also find two special kids washing dishes. They discover magic radios, personality swaps, ship tickets delivered by a robot, and other gifts. But friendship—loaning one another the nerve and heart to keep going—sets them all (and the reader) to dreaming of something more... *Suggested in the Stars* delivers new delights, and Yoko Tawada's famed new trilogy will conclude in 2025 with *Archipelago of the Sun*, even if nobody will ever want this “strange, exquisite” (The New Yorker) trip to end.

*Heirs of Earth* Sean Williams, Shane Dix, 2014-04-01 On the brink of extinction, a suicide mission is humanity's last hope. The Gifts of an alien race called the Spinners gave Peter Alander hope for the future of humanity. All the Gifts did, though,

was draw down the wrath of the Starfish, another alien race apparently intent on wiping out all forms of competition. Caught between the two, humanity faces the hard decision of evolving into something else entirely simply to survive. As their new alien allies prepare to leave human space forever, a handful of survivors band together to make one last attempt to communicate with their enemies. A single ship will leap into the very heart of the Starfish fleet, attempting to find reason where none exists... "Space opera can be a very comforting, cozy mode, with its interstellar empires and royalty and guilds. But when dramatic Darwinian forces are brought into play, as here, space opera can become a kind of bracing, near-apocalyptic tale." —Paul di Filippo "A melodramatic (or space-operatic) take on Stapledon, a grittier, bleaker take on Clarke.... a vision very different from the triumphalism of traditional SF adventure, but its darkness seems entirely appropriate to the twenty-first century we actually inhabit." —Locus Nominated for the Aurealis Award.

But Maan did not know then. He could see the collaterals of war there and everywhere! Locked humans in the confine of homes, terror struck. Everything would appear to have been destroyed. The world had been surreptitiously and smartly attacked by bio-weapon of deadly virus, stored in its lab. One night Kina army had overtaken the lab silently. They would let loose the bio-weapon on world. All worlds appeared to have been defeated. But this defeat would be termed by the defeated powers of the world as pandemic.
