Modelos de actuación ante múltiples víctimas LÓPEZ BALLESTEROS, ALBERTO, GARCÍA-MOYA SÁNCHEZ,

RUTH, 2018-02-23 Esta obra presenta el contenido formativo que responde al currículo de la unidad UF0674 Modelos de actuación ante múltiples víctimas, primera unidad del módulo Logística sanitaria en situaciones de atención a múltiples víctimas y catástrofes, perteneciente al certificado de profesionalidad Atención sanitaria a múltiples víctimas y catástrofes (SANT0108), regulado por el RD 710/2011 de 20 de mayo. Las catástrofes y los incidentes de múltiples víctimas son sucesos cada vez más frecuentes. Desde el punto de vista de la asistencia sanitaria, implican una desproporción entre el número de víctimas y los recursos sanitarios disponibles para atenderlas. Este manual expone y desarrolla los modelos de actuación en la atención a múltiples víctimas y catástrofes; una suma de operaciones complejas que ocurren en un escenario con desorden y confusión que precisa una planificación previa, la activación de los planes de emergencia correspondientes, que exista un buen nivel de coordinación de las instituciones y servicios movilizados y, sobre todo, que los profesionales sanitarios que intervengan posean una formación actualizada y especializada en el manejo de este tipo de incidentes. El contenido se presenta de manera didáctica y práctica: imágenes, destacados, cuadros, mapas conceptuales, ejercicios de aplicación, de resolución y de evaluación, resúmenes, bibliografía, webgrafía y páginas de documentación contribuyen a profundizar en el aprendizaje, afianzándolo y reforzándolo. Por su estructura y estilo, docente y alumno lo utilizarán de manera sencilla, práctica y estimulante. En definitiva, una obra imprescindible tanto para profesionales sanitarios como para quienes inmersos en proceso de formación desempeñarán su actividad en este entorno laboral. El autor, titulado en Enfermería, experto universitario en cuidados críticos, urgencias extrahospitalarias y en gestión de servicios de enfermería, no solo cuenta con una amplia formación en urgencias, emergencias y atención a múltiples víctimas sino que posee una importante experiencia profesional en el ámbito de las urgencias de atención primaria, cuidados críticos hospitalarios y emergencias prehospitalarias, tanto en puestos asistenciales, como en cargos de dirección y gestión. Ha sido docente en el ámbito universitario y en el de la formación profesional en urgencias y emergencias, investigador principal en varios proyectos relacionados con las emergencias, y ha realizado diversas publicaciones en este campo, con ponencias en congresos y

jornadas nacionales como internacionales. Ello le permite abordar los contenidos desde una perspectiva especializada e interdisciplinar, destacar los aspectos clave para el desempeño de la práctica profesional y utilizar una metodología atractiva y adaptada al alumno.

Establishing a Mass Casualty Management System Pan American Health Organization,2001 When an accident or disaster involving large numbers of injuries occurs, the first to provide emergency assistance are communities closest to the site of the incident. During the last 20 years, Latin America and the Caribbean have given special attention to training emergency personnel in triage and in providing first aid either at the site of an accident or disaster, or at the hospital. The entire Region is now familiar with methods of classifying casualties, and this process has proved to be the most efficient means of ensuring survival of the injured in a mass casualty situation. However, there are still serious gaps in the coordination process, a situation that is most pronounced in remote areas or those with limited resources. Many lives have been lost in mass casualty situations because resources were not mobilized efficiently. The challenge we face is this: the more scarce the resource, the more efficient the organization must be. This publication describes the steps in designing a mass casualty management system that will ensure the highest possible survival rate. It focuses on the involvement of police, firefighters, Red Cross volunteers, and health center and hospital staff. If these professionals form part of the structure that we refer to as the mass casualty management system in this publication, they can contribute enormously to saving lives.

Manual de procedimientos en gestión de crisis Vol.2 C. Álvarez Leiva,2007

Principles of Disaster Mitigation in Health Facilities ,2000 This book focuses on problems encountered in areas of high risk for seismic events. It introduces the essential aspects of carrying out vulnerability assessments and applying practical measures to mitigate damage in hospitals addressing structural and nonstructural aspects as well as administrative and internal organization. In a period of only 15 years between 1981 and 1996 93 hospitals and 538 health care centers in Latin America and the Caribbean were damaged as a consequence of natural disasters. The direct cost of these disasters has been enormous; just as devastating has been the social impact of the loss of these critical facilities at a time when they were most needed. For these reasons special consideration must be given to disaster planning for these facilities. Assessing and reducing their vulnerability to natural hazards is indispensable. Principles of Disaster Mitigation in Health Facilities is an updated compilation of various documents on the topic already published by PAHO/WHO. Sections of previous publications have been revised to address the needs of professionals from a variety of disciplines particularly those involved in health facility planning operation and maintenance. Figures and photographs illustrate situations that can increase disaster vulnerability in health facilities. Examples are given of how countries in Latin America have conducted vulnerability assessments and applied specific disaster mitigation measures in their hospitals and health centers.

UF0678 - Apoyo al soporte vital avanzado Arantxa Barrios Granados,2017-07-17 La finalidad de esta Unidad

Formativa es enseñar a realizar apoyo en las situaciones que requieren soporte vital dentro del puesto médico avanzado (PMDA). Para ello, se estudiará la instrumentación y el apoyo a las técnicas de soporte vital avanzado, la medicación de emergencia y la atención sanitaria a emergencias colectivas. Además, se profundizará en la clasificación de las víctimas en emergencias colectivas y la evacuación de las víctimas a diferentes áreas asistenciales.

Simulación de Crisis: una Guía para la Preparación Operativa Edenilson Brandl,2024-11-24 En un mundo que enfrenta desafíos cada vez más complejos e impredecibles, la importancia de la preparación ante las crisis nunca ha sido más evidente. Las organizaciones, las comunidades y los gobiernos están llamados a responder con rapidez y eficacia a las emergencias que pueden surgir en cualquier momento. Sin embargo, la realidad es que la preparación no consiste simplemente en tener planes establecidos, sino en practicar y perfeccionar esos planes mediante simulaciones realistas. Esta guía está diseñada para proporcionar las herramientas y el conocimiento necesarios para diseñar, realizar y evaluar simulaciones de crisis. Ya sea para desastres naturales, violaciones de la ciberseguridad, emergencias de atención médica o amenazas a la seguridad pública, las simulaciones ofrecen un entorno seguro pero desafiante en el que los participantes pueden perfeccionar sus estrategias de respuesta y sus habilidades de toma de decisiones. Al simular crisis, obtenemos la perspectiva y la experiencia necesarias para mejorar nuestras respuestas cuando lo que está en juego es real. Espero que este libro sirva como un recurso práctico para quienes tienen la tarea de prepararse para lo imprevisto. Mediante una planificación cuidadosa, ejercicios estructurados y la aplicación continua de las lecciones aprendidas, podemos fortalecer nuestra capacidad para enfrentar cualquier crisis con confianza y resiliencia.

MF0361_2 Atención sanitaria inicial a múltiples víctimas (2.^a edición) Ana Díaz Herrero,Jorge Álvarez López,Luis Pardillos Ferrer,2014-11-11 La organización y el desarrollo de la logística sanitaria ante un incidente de múltiples víctimas y catástrofes constituyen un tema fundamental en las emergencias colectivas, puesto que una rápida y eficaz asistencia médica es determinante en estas situaciones. Ideaspropias Editorial presenta este manual con la finalidad de ofrecer al lector un conjunto de técnicas y herramientas de apoyo al soporte vital avanzado en urgencias y emergencias, con el fin de orientarle para proporcionar una asistencia apropiada. También se darán a conocer los principales signos y síntomas que hacen sospechar de alteraciones orgánicas graves y los dispositivos apropiados en cada caso. Con este completo manual, adquirirá los conocimientos necesarios para proceder correctamente ante cualquier emergencia sanitaria que se presente. Paralelamente, se profundizará en los protocolos de actuación así como en la comunicación entre los profesionales de este ámbito.

Emergencias sanitarias y dispositivos de riesgo previsible LÓPEZ BALLESTEROS, ALBERTO,VILLALOBOS BUITRAGO, DIEGO,GARCÍA-MOYA SÁNCHEZ, RUTH,2018-02-23 Esta obra presenta el contenido formativo que responde al currículo del módulo MF0362_2 Emergencias sanitarias y dispositivos de riesgo previsible, perteneciente al certificado de profesionalidad

Atención sanitaria a múltiples víctimas y catástrofes (SANT0108), regulado por el RD 710/2011 de 20 de mayo. La prevención y atención de desastres es un proceso de planificación avanzado, ante una situación incierta, en el que se deciden los escenarios y los objetivos, se definen las acciones, las directivas y los procedimientos y se estructuran los posibles sistemas de respuestas con el fin de prevenir o responder mejor a una emergencia. La organización de los planes de emergencias, la elaboración de mapas de riesgo, la activación del plan y la aplicación de dispositivos de riesgo previsible son piezas fundamentales en la gestión de emergencias y desastres en los que se atienden a múltiples víctimas. El contenido se presenta de manera didáctica y práctica: imágenes, destacados, cuadros, mapas conceptuales, ejercicios de aplicación, de resolución y de evaluación, resúmenes, bibliografía, webgrafía y páginas de documentación contribuyen a profundizar en el aprendizaje, afianzándolo y reforzándolo. Por su estructura y estilo, docente y alumno lo utilizarán de manera sencilla, práctica y estimulante. En definitiva, una obra imprescindible tanto para profesionales sanitarios como para quienes inmersos en proceso de formación desempeñarán su actividad en este entorno laboral. Los autores, titulados en Enfermería, son expertos universitarios en cuidados críticos, urgencias extrahospitalarias, gestión de servicios de enfermería y Prevención de riesgos laborales en todas las especialidades. Cuentan con una amplia experiencia profesional en el ámbito de las urgencias de atención primaria, cuidados críticos hospitalarios y emergencias prehospitalarias, tanto en puestos asistenciales, como en cargos de dirección y gestión. Han sido docentes en el entorno universitario y en el de la formación profesional en urgencias y emergencias, investigador principal en varios proyectos relacionados con las emergencias, y han realizado diversas publicaciones en este campo, con ponencias en congresos y jornadas nacionales como internacionales. Ello les permite abordar los contenidos desde una perspectiva especializada e interdisciplinar, destacar los aspectos clave para el desempeño de la práctica profesional y utilizar una metodología atractiva y adaptada al alumno.

Heridas por proyectiles de armas de fuego J. Octavio Ruiz Speare, 2024-11-13 En el pasado las lesiones traumáticas eran poco frecuentes y las lesiones por arma de fuego se restringían prácticamente a situaciones de conflictos armados o eventos de las fuerzas armadas. En la actualidad esta situación ha sufrido un cambio radical, independientemente, además, de que la frecuencia del trauma cerrado ha aumentado debido al desarrollo de vehículos cada vez más potentes y veloces y su asociación con el alcohol. La verdadera catástrofe actual es la presencia cada vez más frecuente, cotidiana, diríamos, de lesiones por proyectiles de armas de fuego a todos niveles de la sociedad, tanto en las zonas urbanas como en las rurales, y lo que es aún peor, la alarmante frecuencia con que estas lesiones son causadas por armas que eran restringidas al ejército y de las que, sin embargo, en la actualidad cualquier persona puede disponer. Este libro proporciona a todo cirujano los

conocimientos necesarios para enfrentarse a los problemas que causan las heridas por proyectiles de armas de fuego, y abrirá las puertas para que las habilidades y actitudes adquiridas en su entrenamiento logren el éxito deseado en la atención del paciente que tiene la desgracia de sufrir una herida de este tipo.

Trauma, cirugía de urgencia y cuidados intensivos. Tercera edición Aurelio Rodríguez,Ricardo Ferrada,2023-03-03
PREFACIO Los temas tratados en este libro, Trauma, cirugía de urgencia y cuidados intensivos, plantean un reto importante por muchas razones. Obviamente, sería inapropiado tratar de analizarlas en el prefacio. Me gustaría, sin embargo, alertar al lector sobre algunos aspectos básicos que reflejan el perfil del acceso a la salud ofrecido a la población de los países involucrados y las características de la atención médica proporcionada. El trauma sigue siendo un reto en todos los países de América, y particularmente en América Latina, donde los homicidios son extremadamente frecuentes y afectan, especialmente, a la población más joven. Todas las iniciativas para dar a conocer el impacto del trauma y para promover la prevención y mejorar el servicio han sido ineficaces, lo que demuestra claramente que el trauma sigue siendo visto por los funcionarios públicos y políticos como un fenómeno accidental. Es interesante observar que, por el contrario, recursos altamente significativos han sido invertido en las áreas del cáncer y de las enfermedades cardiovasculares, enfermedades que, en la mayoría de los casos, nada más representan mecanismos fisiológicos del final de la vida. Hoy día, al visitar las unidades de cuidados intensivos, es común que las pocas camas disponibles se encuentren ocupadas por pacientes de edad avanzada, a menudo personas con enfermedades incurables y tratados en unidades con equipamiento y recursos pobres. Se incentiva la inutilidad médica. Se invierten enormes recursos para permitir que los pacientes sobrevivan unas pocas semanas más, al costo de una calidad de vida totalmente inaceptable. El acceso a los cuidados paliativos es visto, a menudo, como una falta de respeto al paciente y su familia. Las causas más importantes de tales distorsiones inaceptables se pueden agrupar en los siguientes aspectos. Inicialmente, se debe considerar el cambio del perfil de la población. Cada año aumenta la proporción de personas mayores y, en consecuencia, se incrementa el número de pacientes con trastornos neurodegenerativos, los candidatos a la muerte por cáncer y enfermedades cardiovasculares que, a pesar de los avances de diagnóstico y terapéuticos, siguen siendo incurables.

MF0360_2 Logística sanitaria en situaciones de atención a múltiples víctimas y catástrofes Carlos Alberto Fernández Otero,Susana Manso Vázquez,2014-11-24 Una situación de riesgo colectivo es aquella en la que más de un equipo médico es necesario y en la que estos pueden llegar a verse desbordados durante los primeros momentos de actuación. Lamentablemente estos accidentes ocurren con cierta frecuencia y la disponibilidad de profesionales capacitados es fundamental para que todo transcurra con el menor número de daños, tanto humanos como materiales. En este manual se tratará cómo trabaja la logística en situaciones de crisis, desde el momento de la delimitación de la catástrofe hasta la gestión de suministros y residuos en la zona, pasando por la aplicación de la inteligencia sanitaria, la clasificación y

preparación del material logístico y la organización de las estructuras eventuales para la asistencia a múltiples víctimas. Mediante esta obra, el profesional aprenderá los mecanismos para trabajar en circunstancias de este calibre, además de los medios y herramientas que facilitarán la realización de actividades de protección y atención sanitaria de forma ordenada, segura y eficaz.

PHTLS Spanish: Soporte Vital de Trauma Prehospitalario National Association of Emergency Medical Technicians (NAEMT), 2015-03-05 PHTLS: Soporte Vital de Trauma Prehospitalario, octava edición, es el siguiente paso en la evolución del principal programa educativo de Trauma Prehospitalario. Durante tres décadas, el PHTLS ha mejorado la calidad del cuidado del paciente traumatizado y ha salvado vidas. La octava edición del PHTLS continúa con la misión de promover la excelencia en el manejo del paciente traumatizado en todos los proveedores involucrados en el cuidado prehospitalario por medio de una educación global. Este programa legendario fue desarrollado a principios de la década de los ochenta del siglo pasado por la Asociación Nacional de Técnicos en Urgencias Médicas (Association of Emergency Medical Technicians, NAEMT), con la cooperación del Comité para el Trauma del Colegio Americano de Cirujanos (American College of Surgeons Committee on Trauma, ACS-COT). El contenido médico se revisa y actualiza de manera continua para que refleje lo último y lo más actualizado del conocimiento y la práctica. El PHTLS promueve el pensamiento crítico como la base para proporcionar un cuidado de calidad. Se fundamenta en la creencia de que los practicantes de los servicios médicos de urgencia toman las mejores decisiones en beneficio de sus pacientes cuando se les da una buena base de conocimiento y principios clave. La octava edición de PHTLS presenta un nuevo capítulo, Fisiología de la vida y la muerte, que crea un entendimiento sólido de la fisiología de la vida y de la fisiopatología que puede llevar a la muerte. Ese entendimiento es esencial para el proveedor del cuidado prehospitalario para que pueda tratar las anomalías rápidamente, en caso de encontrarlas en el paciente traumatizado. Natural Disasters Pan American Health Organization, 2000 This work is aimed primarily at health sector professionals who participate in disaster preparedness, response, and mitigation. The intersectoral perspective is now so essential, however, that anyone interested in disaster reduction will find here a useful primer. Public health students and professors also can rely on this book as a manual for formal or informal courses.

Asistencia Sanitaria en crisis humanitarias Estébanez Estébanez, Pilar Jiménez Navarro, Carolina Alvar Ezquerra, Jorge, 2017-01-01 En las últimas décadas hemos asistido a nuevos tipos de crisis que han obligado a revisar el papel de la asistencia, las formas de actuación sobre el terreno, el diseño de las estrategias de intervención, o incluso la preparación de los equipos que acuden al terreno. A principios de este siglo fueron los grandes desastres naturales, como el terremoto de

Haití, los que movilizaron a los grandes equipos logísticos y médicos. Actualmente, la mayoría de las crisis humanitarias se producen por conflictos bélicos en los que la población civil es la víctima, como está sucediendo ahora en Siria o Yemen. También hemos visto epidemias con alta morbilidad en países que carecían de estructuras sanitarias adecuadas y que, precisamente por esas carencias estructurales crónicas, han visto cómo dichas epidemias han diezmado a la población, como en Sierra Leona o Liberia. Han surgido nuevos factores que ya requieren nuevas formas de abordar futuras crisis, como las derivadas del cambio climático y las consecuencias que este está ya provocando. Cada vez se hace más necesario que la respuesta a las crisis, que las actuaciones e intervenciones relacionadas con la salud y con la medicina humanitaria, estén basadas en la evidencia científica. En este sentido, este libro aporta guía y protocolos para hacer de las intervenciones en Salud de la Acción Humanitaria una respuesta más científica, de más calidad y más eficaz. Se trata de un libro práctico, para llevar en la mochila cuando se acude a trabajar en una crisis humanitaria, porque de él se sacan lecciones prácticas necesarias para el día a día de las intervenciones en Salud. También es un libro de texto para usar en las universidades y como base de investigaciones y publicaciones. No podemos olvidarnos de que la medicina humanitaria es la medicina que salva vidas, y este libro pretende aportar rigour y ciencia para lograrlo.
