

Capital Of The Myanmar

Carlos Ramirez-Faria

'Capital' in the East Achin Chakraborty, Anjan Chakrabarti, Byasdeb Dasgupta, Samita Sen, 2019-10-23 This book pursues a Marxist approach with an emphasis on class to reflect on Marx's Capital in the context of the East. It critically reassesses some of the familiar concepts in Capital and teases out issues that are at its periphery. In various essays, it explores this borderland to promote new concepts and modes of analysing Marx's treatise in the twenty-first century. Accordingly, it represents an advance in Marxian theory and politics. Examining Marx's Capital from the perspective and location of the East, the book focuses on many issues that are at the 'borders' of Capital, which is concerned principally on unpacking developed capitalism. New concepts are introduced and set in relation to those championed by Marx in order to advance our understanding of economy, capitalism, development and politics. In this regard, the book offers a reading of Capital that is distinct from conventional reflections on it in the Western world. The scope is vast, covering much of the territory in Marx's Capital, as well as addressing a few new issues connected to Capital. The content is divided into the following sections: Reception of Capital in the East; Value, Commodity, Surplus Value and Capitalism; Population and Rent in Capital; and Issues Beyond Capital.

Historical Dictionary of Burma (Myanmar) Donald M. Seekins, 2017-03-27 Burma (Myanmar) is a Southeast Asian country that is emerging from crisis after more than a half century of hard-line military rule and cultural, diplomatic and economic isolation. With the dissolution of its military regime, the State Peace and Development Council, in 2011, a formally civilian but military-dominated constitutional government was inaugurated. By 2012, Burma's president, retired General Thein Sein, had established a working relationship with Daw Aung San Suu Kyi, the leader of the country's pro-democracy movement since 1988, and after a 2012 by-election she and members of her opposition party, the National League for Democracy (NLD), entered the new Union Parliament as legislators. However, even with the election victory of Daw Suu Kyi and the NLD in the General Election of November 2015, Burma faces daunting challenges: it is still one of the poorest countries in Southeast, fissured by longstanding ethnic conflicts that have made a nationwide peace agreement elusive and its people's security and the environment are threatened by foreign economic exploitation. Religious discord is also widely evident, as Buddhist militants instigate violence against the country's religious minorities, especially Muslims. Today Burma's prospects are the most hopeful they have been for over half a century, as the country takes steps along the road to a more open society

and economy. This edition of the Historical Dictionary of Burma (Myanmar) encompasses not only current developments, but also Burma's over 1,500 years-old recorded history and the most important features of its cultures, ethnicity, religions, society and economy. This is done through achronology, an introduction, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture.

Financial Resources for Development in Myanmar Myat Thein, 2000 Much attention has been paid to the increasingly substantial inflows of foreign direct investment into Myanmar since the country opened its doors to overseas investors in late 1988. In addition to bringing capital in the form of cash, such investment has also introduced new technology, training and skills, business and management acumen, as well as various other inputs that Myanmar undoubtedly requires if the country is to develop. However, there is a growing realization that FDI inflows alone will not enable the country to meet the ambitious economic growth targets. As evidenced by the Asian Tiger economies, there is also a need for considerable amounts of domestic capital. and in order to attain substantial levels of domestic investment a system of domestic savings vehicles -- that the state and industry can harness -- must be developed. Hence, this volume seeks to examine ways in which domestic savings and investment capital can be encouraged and increased. The contributors include not only Myanmar economists and policy-makers but also experts from ASEAN and Japan who share their experiences.

The Report: Myanmar 2019 Oliver Cornock, Although Myanmar has been faced with internal conflict, a new long-term economic agenda, alongside rising oil and gas prices and considerable growth in some manufacturing segments, are set to encourage increased foreign direct investment inflows into the country.

Flexible Work Organizations Sushil, Julia Connell, John Burgess, 2016-06-18 This book focuses on the challenges of capacity building for flexible work organizations in Asia, and demonstrates how business enterprises practice reactive flexible capacity (in the form of adaptiveness and responsiveness) to cope with changing and uncertain business environments. The book provides examples of how this can be achieved by means of various organizational change initiatives, leadership strategies, re-engineering, innovation in products and processes, the use of information and communication technology, reshaping learning orientations, and more. As these topics are supported by research and case studies situated in different sectors and countries across Asia, the book will provide a useful resource for a broad readership including: management students and researchers, practicing business managers, consultants, and professional institutions.

Insidious Capital Don Kalb,2024-01-05 With a team of anthropologists and geographers, *Insidious Capital* explores “value and values” in what may well be the last phase of capitalist globalization. In a global perspective of fast-transforming social spaces that move from East to West, the book explores the struggles around the exploitation and valuation of labor, environmental politics, expansion of the ground rent, new hierarchies, the contradictions of higher education, the offshoring of “immaterial” labor, the illiberal right, and the mobilizations against it. This is a book about the variegated frontlines of value within an uneven, but not random, geography of capitalist expansion.

Capital and Ecology Rakhee Bhattacharya,G. Amarjit Sharma,2023-08-28 This volume studies the intersection of capital and ecology primarily in one of the most sensitive geographies of the world, the Eastern Himalayan region. It looks at how the region has become a melting ground of neoliberal developmentalism and ecological subjectivities with the penetrating forces of global and state capitalism, economic projects, and complex power relations. The essays in the volume argue that specific focus on energy infrastructure and energy production has pushed technology and capital towards asset building which has had an adverse effect on the environment, labour relations, indigenous knowledge systems, and traditional livelihood practices in the area. They look at assets like mega dams, electricity transmission networks, natural gas grids, infrastructural and developmental projects, and other alternative ventures which require interventions in the natural world and its resource deposits. Interdisciplinary in approach, the volume adopts a variety of lenses — developmentalism, state strategy, indigenous voices, geopolitics, and environmentalism — to provide a unique and alternative narrative on the various dimensions of the ecological risks and livelihood threats. It will be of great interest to scholars and researchers of politics, development studies, indigenous studies, and Asian studies.

Myanmar's Transition Nick Cheesman,Monique Skidmore,Trevor Wilson,2012 With the world watching closely, Myanmar began a process of political, administrative and institutional transition from 30 January 2011. After convening the parliament, elected in November 2010, the former military regime transferred power to a new government headed by former Prime Minister (and retired general), U Thein Sein. With parliamentary processes restored in Myanmar's new capital of Naypyitaw, Thein Sein's government announced a wide-ranging reform agenda, and began releasing political prisoners and easing press

censorship. Pivotal meetings between Thein Sein and Aung San Suu Kyi led to amendment of the Election Law and the National League for Democracy contesting by-elections in April 2012. The 2011 Myanmar/Burma update conference considered the openings offered by these political changes and media reforms and the potential opportunities for international assistance. Obstacles covered include impediments to the rule of law, the continuation of human rights abuses, the impunity of the Army, and the failure to end ethnic insurgency.

Global Capital and Peripheral Labour Ravi Raman, 2010-01-21 Presents a historical account of plantations in India in the context of the modern world economy. This book shows how history can assist in explaining contemporary conditions and trends. It focuses on labour and economic development problems and interprets the dynamics of plantation capitalism.

Myanmar's Long Road to National Reconciliation Trevor Wilson, 2006 In late 2004, Myanmar's best known general and long-serving leader of the military regime was suddenly dismissed. This generated widespread uncertainty throughout the country and raised questions about the future. This book addresses some of the issues.

OECD Development Pathways Multi-dimensional Review of Myanmar Volume 1. Initial Assessment OECD, 2013-07-18 This assessment shows that Myanmar's success in achieving growth will depend on developing the institutional/social capital necessary for economic/financial stability, to ensure the rule of law, to achieve environmentally sustainable development, and creating an enabling private sector environment.

Capital Cities: Varieties and Patterns of Development and Relocation Vadim Rossman, 2018-03-12 The issue of capital city relocation is a topic of debate for more than forty countries across the world. In this first book to discuss the issue, Vadim Rossman offers an in-depth analysis of the subject, highlighting the global trends and the key factors that motivate different countries to consider such projects, analyzing the outcomes and drawing lessons from recent capital city transfers worldwide for governments and policy-makers. Capital Cities studies the approaches and the methodologies that inform such decisions and debates. Special attention is given to the study of the universal patterns of relocation and patterns specific to particular continents and mega-regions and particular political regimes. The study emphasizes the role of capital city transfers in the context of nation- and state-building and offers a new framework for thinking about capital cities, identifying six strategies that drive these decisions, representing the economic, political, geographic, cultural and security considerations. Confronting the popular hyper-critical attitudes towards new designed capital cities, Vadim Rossman shows the complex motives that underlie the proposals and the important role that new capitals might play in conflict resolution in the context of ethnic, religious and regional rivalries and federalist transformations of the state, and is seeking to identify the success and failure factors and more efficient implementation strategies. Drawing upon the insights from spatial economics, comparative federalist studies, urban planning and architectural criticism, the book also traces the evolution of the concept of the capital city, showing that the design, iconography and the location of the capital city play a critical role in the success and the

viability of the state.

The Report: Myanmar 2018 , Although recent GDP growth has moderated from the double-digit highs of the early 2000s, it has remained above 5% for more than 25 years, supported by robust natural resource exports, steady foreign direct investment (FDI), rising incomes and private consumption, and rapid expansion of the industrial and services sectors. External headwinds and internal conflict have dampened the near-term outlook; however, the country's long-term economic outlook remains positive, with rising investment in transport and power infrastructure expected to drive GDP and industrial growth, supported by a sharp increase in personal incomes and consumer spending.

The Report: Myanmar 2014 Oxford Business Group,2014-03-03 The "Golden Land", officially known as the Republic of the Union of Myanmar and formerly as Burma, has undergone dramatic reforms in recent years under the administration of President U Thein Sein. The rapid transition from a military junta to an open economy has surprised the global community and will see Myanmar assume the ASEAN chair for the first time in 2014. Known as the 'last frontier market' Myanmar is rich in natural resources and has an established extractive industries sector, with one of the world's oldest continuously producing oil fields. The country also enjoys significant mineral resources which remain greatly under explored by international mining firms - something the government is proactively trying to change. The easing of economic sanctions has accelerated the nation's economic growth, but Myanmar still faces political challenges, including ongoing ethnic conflict and religious tensions. However, with greater access to international markets and a growing number of business opportunities, investors are cautiously optimistic about the country's future.

Emerging Markets Megatrends Rajiv Biswas,2018-07-16 This book provides an assessment of the megatrends that are reshaping the emerging markets landscape. With developing countries already accounting for 40% of world GDP, emerging markets consumption growth will be an increasingly important growth engine for the world economy over the next two decades. However, emerging markets in many parts of Asia, Africa, the Middle East and Latin America are still facing tremendous economic challenges such as poverty, inequality, weak governance and inadequate infrastructure. The developed nations are no longer insulated from the economic shockwaves impacting developing countries, as globalisation and economic integration have also amplified the transmission effects to the West through immigration flows, cross-border crime and the proliferation of international terrorism. *Emerging Markets Megatrends* is an essential read for government policymakers, corporate executives, international investors and analysts wishing to understand more about the economic drivers and long-term outlook for emerging markets.

Mobilities of Labour and Capital in Asia Preet S. Aulakh,Philip F. Kelly,2020-02-20 Explores the mobilities of capital and labour in the contemporary global economy. Using an analytical framework around three dimensions related to the forms, institutions, and spatialities of mobility, it examines the interrelationships between mobilities of capital and labour at

multiple levels of analyses.

Myanmar International Monetary Fund. Asia and Pacific Dept, 2018-03-28 This Selected Issues paper analyzes banking sector developments in Myanmar. It highlights that latent banking sector risks are surfacing, following a period of rapid credit growth and as banks adjust to updated financial regulations. Over time banks will need to enhance their credit risk management, and reduce the over-reliance on collateral values to safeguard lending. A banking system action plan has been developed, to enhance the banking system's resilience, as well as strengthen the supervisory and resolution framework. The ongoing overhaul of the prudential framework and financial sector reforms will strengthen the banking sector and its role in supporting the economy.

Myanmar International Monetary Fund, 2012-05-07 This Article IV Consultation reports that Myanmar's authorities are moving forward with reforms of the exchange rate system. Priorities are establishing the market infrastructure for the planned move to a managed float, and monetary and foreign exchange policy capacity to complement plans to unify the exchange rates. Financial sector modernization remains essential to support the reform process and improve financial intermediation. Fiscal policy priorities include ending deficit monetization, reprioritizing spending, and increasing nonresource revenues for development spending within a medium-term fiscal framework.

Urban Heritage, Development and Sustainability Sophia Labadi, William Logan, 2015-10-23 More than half of the world's population now live in urban areas, and cities provide the setting for contemporary challenges such as population growth, mass tourism and unequal access to socio-economic opportunities. Urban Heritage, Development and Sustainability examines the impact of these issues on urban heritage, considering innovative approaches to managing developmental pressures and focusing on how taking an ethical, inclusive and holistic approach to urban planning and heritage conservation may create a stronger basis for the sustainable growth of cities in the future. This volume is a timely analysis of current theories and practises in urban heritage, with particular reference to the conflict between, and potential reconciliation of, conservation and development goals. A global range of case studies detail a number of distinct practical approaches to heritage on international, national and local scales. Chapters reveal the disjunctions between international frameworks and national implementation and assess how internationally agreed concepts can be misused to justify unsustainable practices or to further economic globalisation and political nationalism. The exclusion of many local communities from development policies, and the subsequent erosion of their cultural heritage, is also discussed, with the collection emphasising the importance of 'grass roots' heritage and exploring more inclusive and culturally responsive conservation strategies. Contributions from an international group of authors, including practitioners as well as leading academics, deliver a broad and balanced coverage of this topic. Addressing the interests of both urban planners and heritage specialists, Urban Heritage, Development and Sustainability is an important addition to the field that will encourage further discourse.
