Deborah Pavan-Langston

Eye Chart William Germano, 2017-09-07 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Desert nomads tested their vision by distinguishing a pair of stars. But we have since created more disquieting ways to test the strength of the eyes. Reading the eye chart is an exercise in failure, since it only gets interesting when you cannot read any further. It is the opposite of interpretative reading, like one does with literature. When you have finished reading an eye chart, what exactly have you even read? From a Spanish cleric's Renaissance guide to testing vision, to a Dutch ophthalmologist's innovation in optical tech, to the witty subversion of the eye chart in advertising and popular culture, William Germano's Eye Chart lets people see the eye chart at last. Object Lessons is published in partnership with an essay series in The Atlantic.

I Sight James Eliot Mercer, 2022-11-23 *I Sight: The Power of Perception* By: James Eliot Mercer Harrowing and deeply personal, *I Sight: The Power of Perception* is a memoir detailing the journey of author James Mercer as he comes to the realization that he suffers from a rare genetic eye disorder, one that deteriorates with time and threatens to leave him fully blind by middle age. Starting in early childhood, Mercer recognizes he is different from his peers; his parents never let him stay out past sundown, and often in low light or bright light conditions, the world becomes an indecipherable blur. With adolescence comes a better understanding of his sight deficiency, but it also creates a greater divide between Mercer and other “normal” teenagers, who can freely go to school dances and to local nightly hangouts, getting to experience a freedom Mercer may never know. This memoir tells a story of how disability can bring fear, shame, and isolation, but through the love of family and true friends, one can find acceptance and joy.

Ischemic Optic Neuropathies Sohan Singh Hayreh, 2011-08-28 Ischemic optic neuropathy, often referred to as a stroke of the optic nerve, is one of the major causes of visual impairment or loss of vision. Yet it is a highly controversial and confusing subject because of the general lack of in-depth scientific understanding of the subject. In this book the leading authority in the field describes in detail the current knowledge about the different forms of the often devastating disease. Insights into the underlying pathogenesis and peculiar clinical features are given, leading the reader to the most appropriate way of management. This information will help any physician dealing with patients who suffer from sudden loss of vision.

Medical Tests in Context Randi Minetor, 2019-10-07 This encyclopedia examines more than 125 of the most important and commonly performed medical tests, providing readers with information about how and why they are performed and how each test contributes to monitoring health and diagnosing and treating medical conditions. Whether it's to proactively monitor health, diagnose a condition, or assess how well a particular treatment is working, we all undergo a variety of medical tests throughout our lives. While these tests provide valuable information for doctors and patients, they can sometimes carry significant risks, provide ambiguous or incorrect results, or raise more questions than they answer. Contrary to what some may think, medical testing isn't a simple yes or no science carried out by computers in a lab—it is a dynamic process that relies heavily on human detective work and interpretation. *Medical Tests in Context: Innovations and Insights* highlights more than 125 tests performed across a wide range of medical specialties. Each entry in this encyclopedia follows a standardized format that provides readers with information about how, when, and why the test is conducted; the preparation and risks; how results are determined and where errors might occur; and its history. A collection of case studies offers real-world examples of the successes—and shortcomings—of medical testing.
