**African Landscapes** Michael Bollig, Olaf Bubenzer, 2009-06-12 Landscape studies provide a crucial perspective into the interaction between humans and their environment, shedding insight on social, cultural, and economic topics. The research explores both the way that natural processes have affected the development of culture and society, as well as the ways that natural landscapes themselves are the product of historical and cultural processes. Most previous studies of the landscape selectively focused on either the natural sciences or the social sciences, but the research presented in *African Landscapes* bridges that gap. This work is unique in its interdisciplinary scope. Over the past twelve years, the contributors to this volume have participated in the collaborative research center ACACIA (Arid Climate Adaptation and Cultural Innovation in Africa), which deals with the relationship between cultural processes and ecological dynamics in Africa's arid areas. The case studies presented here come from mainly Sahara/Sahel and southwestern Africa, and are all linked to broader discussions on the concept of landscape, and themes of cultural, anthropological, geographical, botanical, sociological, and archaeological interest. The contributions in this work are enhanced by full color photographs that put the discussion in context visually.

*Tutankhamun's Trumpet* Toby Wilkinson, 2022-11-01 Marking the one hundredth anniversary of the discovery of Tutankhamun's magnificent tomb, its incredible treasures are revealed as never before. In 1922, after fifteen years of searching, archaeologists finally discovered the tomb of King Tutankhamun. There, buried alongside the king's mummy, they found more than 5,000 unique objects, from the mundane to the extravagant, from the precious to the everyday. Tutankhamun's spectacular gold mask is justifiably famous, but the rest of the treasures remain largely unknown, their stories untold. In this rich and beautifully illustrated work of history, renowned Egyptologist Toby Wilkinson allows one hundred artifacts from the boy king's tomb to speak again—not only for themselves, but as witnesses of the civilization that created them. A gold-decorated chariot reveals the impressive scale of Egyptian technology. Loaves of bread, baskets of fruit, and jars of wine hint at the fertility of the Nile Valley and the abundant feasts enjoyed by its people. Ebony and ivory from Nubia and a jewel of Libyan desert glass show the range of Egypt's trading and diplomatic networks. Shaving equipment and board games provide a window into the everyday lives of the people. And perhaps most poignant of all the objects in the tomb is one that conjures up a lost world of human experience: Tutankhamun's silver trumpet. Through these treasures, Wilkinson brings us face-to-face with the culture of the pharaohs, its extraordinary development, its remarkable flourishing, and its

lasting impact. Filled with surprising insights and vivid details, Tutankhamun's Trumpet offers an indelible portrait of the history, people, and legacy of ancient Egypt.

*Atlas Obscura, 2nd Edition* Joshua Foer, Ella Morton, Dylan Thuras, Atlas Obscura, 2019-10-15 Discover wonder. "A wanderlust-whetting cabinet of curiosities on paper."— New York Times Inspiring equal parts wonder and wanderlust, *Atlas Obscura* is a phenomenon of a travel book that shot to the top of bestseller lists when it was first published and changed the way we think about the world, expanding our sense of how strange and marvelous it really is. This second edition takes readers to even more curious and unusual destinations, with more than 100 new places, dozens and dozens of new photographs, and two very special features: twelve city guides, covering Berlin, Budapest, Buenos Aires, Cairo, London, Los Angeles, Mexico City, Moscow, New York City, Paris, Shanghai, and Tokyo. Plus a foldout map with a dream itinerary for the ultimate around-the-world road trip. More a cabinet of curiosities than traditional guidebook, *Atlas Obscura* revels in the unexpected, the overlooked, the bizarre, and the mysterious. Here are natural wonders, like the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa so large it has a pub inside where 15 people can sit and drink comfortably. Architectural marvels, including the M. C. Escher-like stepwells in India. Mind-boggling events, like the Baby-Jumping Festival in Spain—and no, it's not the babies doing the jumping, but masked men dressed as devils who vault over rows of squirming infants. Every page gets to the very core of why humans want to travel in the first place: to be delighted and disoriented, uprooted from the familiar and amazed by the new. With its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, and new city guides, it is a book you can open anywhere and be transported. But proceed with caution: It's almost impossible not to turn to the next entry, and the next, and the next.

*Atlas Obscura* Joshua Foer, Dylan Thuras, Ella Morton, 2016-09-20 It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, *Atlas Obscura* celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thuras and Ella Morton, *ATLAS OBSCURA* revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. *ATLAS OBSCURA* is for

the explorer.

**Jaredites** Jim Hendleman, 2013-05 Jaredites: The Missing Civilization X Jim Hendleman This book covers the origin and archaeological development of selected categories of civilized elements identified as being Jaredite in origin. It is an attempt to elevate the Jaredite civilization into the light of day from the heretofore dark mists of history where science has forced it for the last 2,500-years. The Jaredite Civilization spanned a possible 2,530-years in length and their known achievements alone have far exceeded those of modern man's successes in many regards. In c.2500 BC, the Jaredites built a pair of concrete super highways over 2,700-miles, complete with paved exits and a secondary road network, nearly the entire length of the South American continent. Their civilization could answer the riddles of the Sphinx; the questions of who built the pyramids, and why; the mystery and likely origin of UFO's; prove whether or not George Lucas had the only ET; detail what Noah brought aboard the Ark besides three of his sons and their families and provide an answer to the question posed to Dr J. Robert Oppenheimer by a student as to whether Alamogordo's nuclear bomb in July 1945 was the first ever atomic bomb explosion in history. Many other possible but likely Jaredite achievements are incredibly fascinating and await only an honest archaeological effort to prove them. The historical facts exist; they are real and three-dimensional but to date, standard classical science has relegated them to the dustbin of history's forgotten basement closet. Satan has made a tremendous effort since mankind's beginning to keep man blinded to the true historical facts of our heritage, causing the deliberate destruction of millions of artifacts, scrolls, books and their libraries throughout the world to do so. This book is but a small effort to expose and make known a portion of mankind's previously hidden, but rightful heritage.

**Before the Pharaohs** Julian Maxwell Heath, 2021-08-04 An examination of the Paleolithic and Neolithic communities that inhabited not only the Nile Valley and Delta, but also the Western and Eastern Deserts. The remarkable archaeology of pharaonic Egypt continues to captivate countless people worldwide but evidence for Egypt's prehistoric or Stone Age past has been relatively neglected. This is perhaps understandable, as the archaeology of Stone Age Egypt often seems crude in comparison, and the number of works published on the subject is diminutive compared to those dealing with the revered ancient civilization that emerged in the Nile Valley some five thousand years ago. However, although less spectacular, the numerous remnants of prehistoric life found throughout Egypt represent an important chapter in the story of humanity's distant past. They also cast compelling light on the shadowy Stone Age peoples who lived in the Nile Valley and surrounding deserts, long before the mighty monuments of the pharaohs ever existed. This book examines the fascinating archaeology of Stone Age Egypt, from its very beginnings, when early members of the human species arrived in Egypt from sub-Saharan

Africa, to its end, when the impressive Naqada Culture emerged, setting in motion the processes that led to the formation of one of the world's greatest ancient civilizations. "Before the Pharaohs is a well-written and informative study of the Egyptian stone age . . . You get the feeling reading this of being in the company of a knowledgeable and amiable tour guide." —Beating Tsundoku

**Strange matter** Martin Bleisteiner, Jan-Peer Hartmann, Andrew James Johnston, 2025-09-02 Strange matter offers exciting new perspectives on the premodern fascination with materiality and the various ways in which the Middle Ages and subsequent periods experienced things in time. Drawing on a wide selection of examples that range from medieval texts and artefacts of both European and non-European origin to Macbeth's highly evocative meditation on bubbles, the essays compiled in this volume look beyond the confines of the Anglophone world. As they engage critically with the specific temporal otherness modernity has so often ascribed to medieval texts and artefacts, the contributors also enter into productive dialogue with recent trends in criticism, such as thing studies and the growing field of 'object biographies' in cultural studies and museology.

**A Gift of Geology** Colin D. Reader, 2023-01-10 An introduction to the geology of Egypt and its influence on ancient Egyptian culture While much is known about Egypt's towering pyramids, mighty obelisks, and extraordinary works of art, less is known about the role played by Egypt's geological history in the formation of pharaonic culture's artistic and architectural legacy. The fertile soils that lined the Nile Valley meant that the people of Egypt were able to live well off the land. Yet what allowed ancient Egypt to stand apart from other early civilizations was its access to the vast range of natural resources that lay beyond the Nile floodplain. In this engagingly written book, Colin Reader invites readers to explore the influence of geology and landscape on the development of the cultures of ancient Egypt. After describing today's Egyptian landscape and introducing key elements of the ancient Egyptian worldview, he provides a basic geological toolkit to address issues such as geological time and major earth-forming processes. The developments that gave the geology of Egypt its distinct character are explored, including the uplifting of mountains along the Red Sea coast, the evolution of the Nile river, and the formation of the vast desert areas beyond the Nile Valley. As the story unfolds, elements of Egypt's archaeology are introduced, together with discussions of mining and quarrying, construction in stone, and the ways in which the country's rich geological heritage allowed the culture of ancient Egypt to evolve. Ideal for non-specialists and specialists alike, and supported with over one hundred illustrations, A Gift of Geology takes the reader on a fascinating journey into Egypt's geological landscape and its relationship to the marvels of pharaonic culture.

**Mobility and pastoralism in the Egyptian Western Desert. Steinplätze in the Holocene regional settlement patterns** Marina Gallinaro, 2018-03-15 This volume presents the results of a long study begun in 2004 within the framework of the Archaeological Mission in the Farafra Oasis of Egypt directed by Barbara Barich and Giulio Lucarini, of the Sapienza

University of Rome (now under the auspices of ISMEO). The book focuses on the features known as “Steinplatz-type hearths” and their role in the settlement patterns of the human groups living in the Egyptian Western Desert during the middle and late Holocene. Steinplätze are concentrations of burned and fire-cracked stones that vary in shape and size, and have often been slightly elevated above the present ground level by post-depositional erosion processes. Occurring both as isolated features and in clusters, they are often the only visible structures – or even traces – of ancient settlements. The study of these features is closely interconnected with the mobility strategies of the communities that inhabited this desert region during a period of higher average rainfall than at present but also characterised by significant climate fluctuations, with humid periods interrupted by dry spells and eventually ending in an overall trend towards greater desertification. The use of the Steinplatz-type hearths was most widespread in the second half of the sixth millennium BC, when mobile occupation strategies replaced a more sedentary model. An analysis of the Farafra Oasis Steinplätze is coupled with a general reassessment of the subsistence and mobility models hitherto proposed for the Eastern Sahara, suggesting an integrated occupation system for Farafra itself. The economy of the forager-herders of the middle Holocene, during the climate optimum (6900-5550 cal BC), seems to have relied significantly on herding small livestock, but also on hunting, and likely concentrated on the gathering of wild cereals such as sorghum. During the climate optimum, forms of seasonal stabilisation of the settlement strategy seem to emerge, with the alternating occupation of two different winter and summer villages consisting of clusters of stone-slab huts; short-term task-specific camps, using Steinplätze, logistically completed the system. After this phase, only short-term camps with Steinplätze were occupied. These were probably directly dependent on the wettest areas at the centre of the oases and made use of a tethered exploitation strategy, with brief movements from the central oasis (“daisy-chain” movements). The use strategies of the Steinplatz-type hearths within the mobile settlement system are outlined adopting a clear and immediately assessable model. “Yet although they are among the most distinctive of the Sahara’s archaeological features, Steinplätze have received little systematic attention in recent decades. Marina Gallinaro’s work thus marks a new phase in their study, one that draws them back into discussions of how early livestock-keeping populations in Northeast Africa used the resources and landscapes to the west of the Nile along a trajectory of increasing aridification that eventually culminated in the desert we see today (...) Lucidly written, Gallinaro’s volume will, I believe, help inspire individuals to take up the research agenda she sets out. At a time when so much of the Sahara is off-limits to archaeological fieldwork, it is deeply gratifying to see here yet more evidence of the thoroughness and high quality that have characterized the work of Italian archaeologists in this region of Africa over many decades. The continuing publication of their research, Marina Gallinaro’s included, in the Arid Zone Archaeology monograph series will surely help sustain widespread interest in Saharan archaeology until it becomes possible to excavate and survey again free of current geopolitical restrictions. May that day come soon!” Prof. Peter Mitchell, University of Oxford, UK.

**Relics** Jamie Grove,Max Grove,Mini Museum,2021-10-26 Four billion years in the palm of your hand, Relics: A History of the World Told in 133 Objects is the story of our planet as you've never seen it before. The Mini Museum is a collection of treasures gathered from across space and time shared by tens of thousands of people in more than 120 countries. Each item in the collection is a story connected to a childhood dream of sharing all the wonders the universe has to offer while bringing all of us closer together. In this book, the Mini Museum team shares the stories of real objects that have shaped our very existence across billions of years of history. Beginning with the birth of our solar system and the very building blocks of life, you'll explore our dynamic planet, from the constant shifting of continents to dramatic and violent upheavals, which have changed the course of all life again and again. You'll visit mighty civilizations with cultures spanning millennia, as well as modern symbols of creativity and innovation, and the march of humanity as we reach toward the stars. Every item is photographed and presented in detail. There are also wild tales of adventure as the crew travels the world and prepares one of the most complex collections ever assembled.

Gilf Kebir National Park Alberto Siliotti,2010 In the far southwestern corner of Egypt lies one of the most fascinating and least known regions of the Sahara Desert, declared a National Park by the Egyptian government in 2007 for its great archaeological and natural-historical heritage. The Gilf Kebir, a broad massif twice the size of Corsica, and Gebel Uweinat, a 2,000-meter inselberg, were discovered only in the 1920s, and explored in the decades following, but today an increasing number of visitors are able to reach this unique area on long desert expeditions and experience for themselves the special geology and ecology of the place and the extraordinary rock paintings from Neolithic times. Now, in lucid text and colorful photographs, drawings, maps, and satellite images, Alberto Siliotti guides the intrepid visitor to the features of the National park, with notes on what to take on such a long desert trip and what not to leave behind.

Radioactive Geochronometry Heinrich D Holland,Karl K. Turekian,2010-09-30 The history of Earth in the Solar System has been unraveled using natural radioactivity. The sources of this radioactivity are the original creation of the elements and the subsequent bombardment of objects, including Earth, in the Solar System by cosmic rays. Both radioactive and radiogenic nuclides are harnessed to arrive at ages of various events and processes on Earth. This collection of chapters from the Treatise on Geochemistry displays the range of radioactive geochronometric studies that have been addressed by researchers in various fields of Earth science. These range from the age of Earth and the Solar System to the dating of the history of Earth that assists us in defining the major events in Earth history. In addition, the use of radioactive geochronometry in describing rates of Earth surface processes, including the climate history recorded in ocean sediments and the patterns of circulation of the fluid Earth, has extended the range of utility of radioactive isotopes as chronometric and tracer tools. Comprehensive, interdisciplinary and authoritative content selected by leading subject experts Robust

**The Geology of Egypt** Zakaria Hamimi, Ahmed El-Barkooky, Jesús Martínez Frías, Harald Fritz, Yasser Abd El-Rahman, 2019-09-19 This richly illustrated book offers a concise overview of the geology of Egypt in the context of the geology of the Arab Region and Northeast Africa. An introductory chapter on history of geological research in Egypt sheds much light on the stages before and after the establishment of Egyptian Geological Survey (the second oldest geological survey worldwide), Hume's book and Said's 1962, 1990 books. The book starts with the Precambrian geology of Egypt, in terms of lithostratigraphy and classifications, structural and tectonic framework, crustal evolution and metamorphic belts. A dedicated chapter discusses the Paleozoic-Mesozoic-Cenozoic tectonics and structural evolution of Egypt. A chapter highlights the Red Sea tectonics and the Gulf of Suez and Gulf of Aqaba Rifts. Subsequent chapters address the Phanerozoic geology from Paleozoic to Quaternary. The Egyptian Impact Crater(s) and Meteorites are dealt with in a separate chapter. The Earth resources in Egypt, including metallic and non-metallic ore deposits, hydrocarbon and water resources, are given much more attention throughout four chapters. The last chapter addresses the seismicity, seismotectonics and neotectonics of Egypt.

*Orphan's Quest* Pat Nelson Childs, 2007 Rokey, a poor orphan, has lived his entire life sheltered within the walls of the Noble Contemplative Monastery. Material World Ed Conway, 2025-06-10 THE NEW YORK TIMES BOOK REVIEW EDITORS' CHOICE • AN ECONOMIST BEST BOOK OF THE YEAR • Finalist for the Financial Times and Schroders Business Book of the Year Award Sand, salt, iron, copper, oil, and lithium. These fundamental materials have created empires, razed civilizations and fed our ingenuity and our greed for thousands of years. Without them, our modern world would not exist, and the battle to control them will determine our future. The fiber-optic cables that weave the World Wide Web, the copper veins of our electric grid, the silicon chips and lithium batteries that power our phones and cars: though it can feel like we now live in a weightless world of information—what Ed Conway calls “the ethereal world”—our twenty-first-century lives are still very much rooted in the material. In fact, we dug more stuff out of the earth in 2017 than in all of human history before 1950. For every ton of fossil fuels, we extract six tons of other materials, from sand to stone to wood to metal. And in *Material World*, Conway embarks on an epic journey across continents, cultures and epochs to reveal the underpinnings of modern life on Earth—traveling from

the sweltering depths of the deepest mine in Europe to spotless silicon chip factories in Taiwan to the eerie green pools where lithium originates. Material World is a celebration of the humans and the human networks, the miraculous processes and the little-known companies, that combine to turn raw materials into things of wonder. This is the story of human civilization from an entirely new perspective: the ground up.

*"It Aint Necessarily So" Book One* Bob Maddison, 2013-11-13 Discovering what is real or not real can be difficult. This Book One starts with the true nature of the 'universe', From the very basic Fabric of the Universe, then to following nature or all things, and that includes what is commonly known as God or gods. Following that we deal with human origins, evolution alternatives, then discover our true nature and problems with religions Reclaiming our individual value in life is critically covered. Human's lost prehistory is looked as a prelude to later books A mountain of lies and cover-ups are revealed. This book covers many original writings by Bob Maddison plus many items of interest compiled from research. Sufficient evidence is included in all cases so that you, the critical reader, is not faced with my assertions only, but can do your independent research.
