**Martin Rovers, Judith Malette, Manal Guirguis-Younger**

**Avicenna, ›The Healing, Logic: Isagoge‹** Avicenna, Silvia Di Vincenzo, 2021-04-19 This book offers a new edition, with English translation and commentary, of the Kitāb al-Madḥal, which opens Avicenna's (d. 1037) most comprehensive summa of Peripatetic philosophy, namely the Kitāb al-Šifā'. For the first time, the text is established together with a stemma codicum showing the genealogical relations among 34 manuscripts, the twelfth-century Latin translation, and the literal quotations by Avicenna's first and second-generation students. In this book, Avicenna's reappraisal of Porphyry's Isagoge is examined from both a historical and a philosophical point of view. The key-features of Avicenna's theory of predicables are analyzed in the General Introduction and in the Commentary both in their own right and against the background of the Greek and Arabic exegetical tradition. Readers shall find in this book the first systematic study of the Madḥal which, in addition to being the only logical work of the Šifā' ever transmitted in its entirety both in Arabic and in Latin, is crucial for understanding Avicenna's conception of universal predicables at the crossroads between logic and metaphysics.

*Dreams and Divination from Byzantium to Baghdad, 400-1000 CE* Bronwen Neil, 2021-01-14 Why did dreams matter to Jews, Byzantine Christians, and Muslims in the first millennium? *Dreams and Divination from Byzantium to Baghdad, 400 - 1000 CE* shows how the ability to interpret dreams universally attracted power and influence in the first millennium. In a time when prophetic dreams were viewed as God's intervention in human history, male and female prophets wielded was unparalleled power in imperial courts, military camps, and religious gatherings. The three faiths drew on the ancient Near Eastern tradition of dream key manuals, which offer an insight into the hopes and fears of ordinary people. They melded pagan dream divination with their own scriptural traditions to produce a novel and rich culture of dream interpretation. Prophetic dreams enabled communities to understand their past and present circumstances as divinely ordained and helped to bolster the spiritual authority of dreamers and those who had the gift of interpreting their dreams. Bronwen Neil takes a gendered approach to the analysis of the common culture of dream interpretation across late antique Jewish, Byzantine, and Islamic sources to 1000 CE, in order to expose the ways in which dreams offered women a unique opportunity to exercise influence. The epilogue to the volume reveals why dreams still matter today to many men and women of the monotheist traditions.

Touch in the Helping Professions Martin Rovers, Judith Malette, Manal Guirguis-Younger, 2018-04-10 Inappropriate touch cases have sparked public outcry and made headlines, but a discussion on the importance and ethics of positive, caring, appropriate touch in the helping professions such as teaching, nursing and counselling is long overdue. Touch may well be one of the least understood or talked about subjects in the helping professions. A discussion on the importance and ethics of positive, caring, and appropriate touch in professions such as teaching, nursing and counselling is long overdue. Touch in the Helping Professions delivers just that, weaving together scholarly evidence, research and clinical practice from a wide range of perspectives encompassing philosophy, theology, psychology, and anthropology to challenge assumptions about the role of touch in the helping professions. The contributors to the volume focus not only on the overarching roles of gender, age,

culture and life experience, but go beyond to encompass canine-assisted therapy, touch deprivation, sacred objects, as well as key ethical considerations. The prevailing lack of dialogue, due to fear of contravening ethical boundaries, has stood in the way of an open and responsible discussion on the use of touch in therapy. Touch in the Helping Professions is a welcome and much needed contribution to the field—a window onto a fundamental need. Published in English.

Philosophers, Sufis, and Caliphs Ali Humayun Akhtar,2017-06-09 What was the relationship between government and religion in Middle Eastern history? In a world of caliphs, sultans, and judges, who exercised political and religious authority? In this book, Ali Humayun Akhtar investigates debates about leadership that involved ruling circles and scholars of jurisprudence and theology. At the heart of this story is a medieval rivalry between three caliphates: the Umayyads of Cordoba, the Fatimids of Cairo, and the Abbasids of Baghdad. In a fascinating revival of Late Antique Hellenism, Aristotelian and Platonic notions of wisdom became a key component of how these caliphs debated their authority as political leaders. By tracing how these political debates impacted the theological and jurisprudential scholars and their own conception of communal guidance, Akhtar offers a new picture of premodern political authority and the connections between Western and Islamic civilizations. It will be of use to students and specialists of the premodern and modern Middle East.

**Medicinal Plants used in Traditional Persian Medicine** Hartwig Schulz,Seyed Ahmad Emami,Farsad Nadjafi,2023-10-06 Medicinal plants and the natural products within them, still remain the starting point for breakthroughs in the development of safe, pharmacologically active synthetic molecules for use in a wide variety of clinical situations. Traditional Persian Medicine (TPM) is one of the most ancient medical doctrines, and is well-documented in terms of information about diseases, diagnoses and treatments, especially in the application of medicinal plants. TPM has been used

for centuries worldwide, and many of these methods are still used in Iran today. The book introduces the basics of TPM, and describes the key medicinal plants used for the treatment of different diseases. It also highlights possible new targets for research activities in drug discovery of natural products. The book is richly illustrated with historic drawings from old Persian pharmacopoeia and photos of plants in their natural habitats. Reference to Ayurvedic, Traditional Chinese Medicine and monastic medicine in Europe are also made. This book provides a valuable, evidence-based resource on TPM for researchers, practitioners and students in medicinal plants, ethnobotany and herbal medicine.

**Lost Enlightenment** S. Frederick Starr, 2015-06-02 The forgotten story of Central Asia's enlightenment—its rise, fall, and enduring legacy In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia's medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China. Lost Enlightenment recounts how, between the years 800 and 1200, Central Asia led the world in trade and economic development, the size and sophistication of its cities, the refinement of its arts, and, above all, in the advancement of knowledge in many fields. Central Asians achieved signal breakthroughs in astronomy, mathematics, geology, medicine, chemistry, music, social science, philosophy, and theology, among other subjects. They gave algebra its name, calculated the earth's diameter with unprecedented precision, wrote the books that later defined European medicine, and penned some of the world's greatest poetry. One scholar, working in Afghanistan, even predicted the existence of North and South America—five centuries before Columbus. Rarely in history has a more impressive group of polymaths appeared at one place and time. No wonder that their writings influenced European culture from the time of St. Thomas Aquinas down to the scientific revolution, and had a similarly deep impact in India and much of Asia. Lost Enlightenment chronicles this forgotten age of achievement, seeks to explain its rise, and explores the competing theories about the cause of its eventual demise. Informed by the latest scholarship yet written in a lively and accessible style, this is a book that will surprise general readers and specialists alike.

**Saints, Heretics, and Atheists** Jeffrey K. McDonough, 2022 Does God exist? What is the nature of evil, and where does it come from? Are humans free? Responsible? Immortal? Does it matter? Saints, Heretics and Atheists offers a historical introduction to fundamental questions in the philosophy of religion. Ranging from ancient times to the twentieth century, it is divided into twenty-five succinct, chronological chapters. Individual chapters discuss philosophies from history's greatest thinkers including Plato, Augustine, al-Ghazali, Aquinas, Marguerite Yourcenar, Spinoza, Hume, Mary Shepherd, and Nietzsche. The book closes with an exploration of William James's defense of the right to believe, possible limitations of that right, and the

nature of philosophical progress. Based on lectures from a popular course taught in the Program for General Education at Harvard University for over a decade, *Saints, Heretics, and Atheists* invites readers along for a journey that is unique in its sweeping historical approach to the philosophy of religion and the balance it strikes between traditional, non-traditional, and atheistic standpoints with respect to religion in the western tradition.

**Soft Force** Ellen Anne McLarney, 2015-06-09 The unheralded contribution of women to Egypt's Islamist movement—and how they talk about women's rights in Islamic terms In the decades leading up to the Arab Spring in 2011, when Hosni Mubarak's authoritarian regime was swept from power in Egypt, Muslim women took a leading role in developing a robust Islamist presence in the country's public sphere. *Soft Force* examines the writings and activism of these women—including scholars, preachers, journalists, critics, actors, and public intellectuals—who envisioned an Islamic awakening in which women's rights and the family, equality, and emancipation were at the center. Challenging Western conceptions of Muslim women as being oppressed by Islam, Ellen McLarney shows how women used soft force—a women's jihad characterized by nonviolent protest—to oppose secular dictatorship and articulate a public sphere that was both Islamic and democratic. McLarney draws on memoirs, political essays, sermons, newspaper articles, and other writings to explore how these women imagined the home and the family as sites of the free practice of religion in a climate where Islamists were under siege by the secular state. While they seem to reinforce women's traditional roles in a male-dominated society, these Islamist writers also reoriented Islamist politics in domains coded as feminine, putting women at the very forefront in imagining an Islamic polity. Bold and insightful, *Soft Force* transforms our understanding of women's rights, women's liberation, and women's equality in Egypt's Islamic revival.

**Ecotheology and Love** Bahar Davary,2022-06-01 In *Ecotheology and Love: The Converging Poetics of Sohrab Sepehri and James Baldwin*, Bahar Davary points to the interrelation of religion, poetry, and ecology from a comparative perspective with an emphasis on decoloniality. This work shows how authors Sohrab Sepehri and James Baldwin sought social justice by building their work on love and an authentic way of knowing the world based on an interconnected knowledge of the self. The layers of depth in Sepehri and Baldwin's works and their immediacy for our time has yet to be fully understood, but through *Ecotheology and Love*, Davary takes a significant step towards achieving such a fuller understanding.

**An Anthology of Philosophy in Persia, Vol. 5** S. H. Nasr, Mehdi Aminrazavi, 2014-11-17 Persia is home to one of the few civilizations in the world that has had a continuous tradition of philosophical thought lasting more than two and a half millennia. From the time Zoroaster brought the Gathas, the sacred scripture of Zoroastrianism, until today, it has had a philosophical tradition comprising diverse schools and various languages including Avestan and Pahlavi as well as Arabic and Persian. The West has seen surveys of Persian art and anthologies of Persian literature, but this work is the first to present a millennial tradition of philosophy in Persia in the form of translated selections and introductory sections for each period and figure. Existing translations have been used where possible but most of the selections have been newly translated for this work which, with the help of the explanatory introductions, makes possible an intellectual journey into a philosophical continent much of which has been uncharted for Westerners until now. The fifth and final volume of An Anthology of Philosophy in Persia deals with some seven centuries of Islamic thought stretching from the era following the Mongol invasion to the end of the Qajar period. Organized around the cities which became the main centres of philosophical activity during this long period, the volume is divided into three parts: 'The School of Shiraz', whose importance not only for Persia but also for Ottoman Turkey and Muslim India is only now being recognized; 'The School of Isfahan', which marks the integration of some eight centuries of Islamic thought and culminates with Mulla Sadra; and finally 'The School of Tehran', where traditional philosophy first encountered modern thought in Persia, bringing this series into present times.
